AGRICULTURE.

With a view to the encouragement of Agriculture, Societies have been formed in nearly every County of Canada, which the Government have greatly aided by annual grants of funds. Shows of stock, grain, and general produce, with a variety of other objects of industry, are held generally twice a year in each County, besides a Provincial Show annually in each section of the Province, at which are exhibited a great variety of productions of Agriculture, Manufactures, Artistical Industry, &c., and from which the most commendable are selected for prizes. Under the auspices of the Bureau of Agriculture and Statistics, a Department recently

incorporated with the Administration of the Province, Agricultural Associations and Boards of Agriculture have been established for both sections of Canada.

There is a Branch Society in nearly every township of each County, in connection with the County Society. Fairs are held by nearly all the Societies in April or May, and in September or October. The dates are not fixed, except in a very few cases, but vary slightly from year to year, according to decision of the Directors. As a general rule the County Fairs are held at the County Towns, and the Township Fairs at the leading Town or Village of the Township.

Besides the above-mentioned amounts the rewere granted toeach Provincial Agricultural Association $ 4000; and the Legislature have granted, for 1857, the like sum to each Association, $80,000 to the County Agricultural Societies, and $1000 to each of the two Boards of Arts and Manufactures in Canada East and West.

The following extracts are taken from the last Report of the Minister of Agriculture presented to the Legislature in May, 1857:—

After alluding to the difficulty of collecting correct statistical information with regard to the agricultural produce of the country, in the absence of any statute supplying or authorising the required machinery—an evil severely felt in England and Scotland, but within the last year partially remedied in Scotland—the Minister makes the following approximate estimate of the agricultural produce of the colony for the year 1856: and having had, as a guide, the census of 1852 and former years, with the trade exports of grain, cattle, &c., and the extent of home consumption of produce of various kinds, the estimate may be considered *very nearly correct*.

In the articles of wheat and flour the exports of 1856 have been far beyond all precedent, viz.:—

	Bushels.
Calculating the flour at 5 bushels per barrel	9,391,531
Against that of 1855	6,413,428
Increase	2,978,103

being an increase in one year of very nearly 46½ per cent. in the number of bushels.

Allowing 5½ bushels for the home consumption of each individual in Canada (viz. 2,500,000 souls), the home consumption would be 14,750,000, which, added to the export 9,391,530, gives 24,141,530, to which add the seed, (one bushel for every ten), and the whole produce of wheat in 1856 amounts to 26,555,684 bushels, of 60 lbs. per bushel, or 10 37-60ths bushels for every soul in the province. By the census of 1851-2 the produce per individual in all Canada was 8 58-60ths bushels. The crop of 1851 was 16,155,946, showing an increase in 5 years of 10,399,738 bushels, being over 64½ per cent. in that period.

In the export of barley and rye there is a still greater increase, viz., from 566,534 bushels in 1855, to 989,447 in 1856, being more than 74½ per cent. in one year.

In Indian corn the increase of export exceeds that of wheat or barley, viz., from 73,066 in 1855, to 164,497 in 1856, being 125 per cent.

The export of Indian corn appears to be increasing in a very rapid ratio. In 1853 there were only 831 bushels exported: in 1854 there were 57,636; in 1855, 73,066; and in 1856, 164,495.

In oats the increase of export has exceeded that of every other grain. In 1855 there were 370,275 bushels exported. In 1856, 1,296,677 bushels, an increase of 250 per cent. in one year.

In the article of hops, too, there has been a very great increase, viz. from 43,275 lbs. to 177,260 lbs. In flax seed from 6,072 bushels to 11,879 bushels; and in tobacco a very considerable increase, from 13,730 lbs. to 17,435 lbs.

These are the chief articles under the head of agricultural produce. The vast annual increase in them attests the rapid progress of the country. The *money value* of the agricultural exports of 1856 exceeded that of 1855 by £485,469, notwithstanding the great reduction in the prices during 1856 below those of 1855. As an example: the average price of wheat during 1856 was 6s. 11½d., whilst during 1855 it was 9s. 3½d., per bushel of 60 lbs.; and in other grain there was a like disparity of price in favor of 1855.

IMMIGRATION.

There is no subject which can engage the attention of any one interested in the welfare and future progress of Canada so important as that of the Emigration that annually resort to her shores; for upon the increase of her population must depend the due development of her vast resources and the accomplishment of her destiny as a nation in the van of civilization. To attain to this consummation, her great agricultural capabilities, extensive fisheries, hidden minerals, with her natural aids to the establishment of manufactures, and her constantly improving facilities for commerce, all demand the one essential ingredient—human industry;—to raise from these opportunities that Wealth, without which no country, however otherwise blessed, was ever great or respected among nations. But not only is Immigration thus needed; since, for obvious reasons, it is equally necessary, and the highest policy of our Government, to watch its progress, character, and destination—to regulate as well as encourage it: in short, to adopt for it the best scheme of Colonization, for the good of all, that experience and wisdom can devise. Hence it is deemed that the following Tables, giving the immigration of each year from 1831, and the countries whence it came, must possess a general interest.

Dividing the total number of Emigrants arrived from 1831 to 1855 inclusive into five quinquennial periods, we obtain the following numbers—for the first period, 167,218; for the second, 82,568; for the third, 139,704; for the fourth, 221,628; and for the last, 191,404; but notwithstanding that there has been a slight improvement on the whole as to the numbers arrived during the last period, we find that the numbers for the last two years, 1855 and 1856, fall far short of the annual average (31,729) of the whole period embraced by the Return—a disproportion, however, very satisfactorily modified by the increased emigration of the present season.

Mr. Buchanan, the Chief Agent for Emigration, states in his Report for 1856, that the result of the working of the Imperial Passenger Act for 1855, "so far, has on the whole been satisfactory, and would appear to have fulfilled the object of its framers; but it is also evident that it has operated unfavorably on the emigration to this Province, and especially from the Irish ports, by enhancing the price of passage, which formerly averaged £3 10s., to £4 and £5; and I should not omit to observe that the masters of several vessels, who have always heretofore brought out a full complement of passengers, have informed me, that their owners preferred to send them out in ballast, rather than subject them to the increased liability imposed by the Act." He further shows that this decrease of emigration to Canada applies chiefly if not wholly to the poorest class of emigrants, who, with difficulty procuring the smallest amount of means to cross the Atlantic, take passage to ports of the United States at a lower rate than that charged to Quebec: thus we find that the emigration from Ireland to these ports in 1856 has been equal to an advance of 3 per cent., whilst the direct emigration from the same country to Quebec has fallen off nearly 59 per cent.

But any question or argument suggested by the *amount* of Emigration to Canada becomes of little moment in comparison with the considerations that arise from a knowledge of the fact, that we retain actually only a moderate proportion of the Emigrants that annually arrive in the Province; for it must be observed that besides those who proceed at once through Canada into the United States, many more, necessarily not noticed in the official returns, seek the same ultimate destination in the course of a few months. This is the evil that requires an early and energetic treatment; and hence arises the important question—Does this untoward distribution appertain to us as an inevitable consequence of some condition or state of circumstances that naturally affects us from our position; or is it owing to some adverse influence—some neglect or want of information; and to which remedial measures are possible and applicable?

No official Returns are now made of the Distribution of the Emigrants; but we abstract from one made for 1848, that 27,939 arrived at Quebec, whose distribution, as near as could be ascertained, was as follows:—

Remained in Canada East		1,046
Proceeded to settlements in Canada West		19,482
" " New Brunswick, Nova Scotia and Prince Edward Island		56
" the Western States (a great proportion of whom were miners)	3,355	
" other of the United States, from Montreal, *viâ* Lake Champlain	4,000	
	—	7,355
Total		27,939

There is no reason to believe that the number here stated to have proceeded directly to the States *exceeds* the fact, nor, from all that can be inferred of the western tendency of our emigration, that this disproportion has not since been constantly increasing.

Of the Emigration that leaves Europe, for this or any other part of North America, more than three-fourths of the male adults are agricultural and common laborers, whose wages range in this country from about $10 to $20 per month, with board and lodging—a rate of remuneration considerably higher than prevails in any European country, and nearly if not quite equal to the wages really paid to the same class in the United States. Nor does Canada present any difficulty in the way of the poorest laborer realizing his long-cherished hope of acquiring land of his own; for, besides the fact that cleared farms are frequently sold, in many situations, at from $8 to $30 per acre, inclusive of cost of buildings, &c., and that wild lands are procurable at much lower prices, the Government offer free grants of 100 acres to each male adult upon the performance of certain conditions. Another important and very gratifying fact is that the general sanatory statistics obtained from various countries lead necessarily to the conviction that Canada enjoys a specially favorable climate.—These truths, never yet questioned, should forcibly induce settlement in the Province, and still further promote a desire to participate in the substantial advantages of our "Poor Man's Home"—a title that has been fairly and generally conferred on this country.

The three elements of a nation's wealth are its labor, skill, and capital, in due proportions, according to the exigencies of the country. Here, from our very abundant resources, we could not, but for a very short period, experience inconvenience from a large accession to our laboring population, even if unaccompanied by such a proportion of capitalists as is ever deemed desirable and necessary; for the former very soon reverse their position by becoming employers themselves, and, unthinkingly, as loud declaimers as any against the high price of labor—to the former prevalence of which, in most cases, they owe their own substantial position in the country. But, although the laborer is thus apparently independent of the capitalist, yet practically there is originally such a degree of helpless dependence as ever to throw the former immediately in the wake of the latter: hence, therefore, may immigration be well described as a tide, which leaves scarcely a sign of its passage in the districts through

which it has flowed. The bulk of it has indeed gone to the "far West," which is by no means a proof of the superiority of its ultimate destination, but rather because the El Dorado has been so colored as to attract the capitalist immigrants, who enhance there the market that all other classes follow and flock to as their natural and only support.

The Government, by their measure of Free Grants, have evinced a laudable desire to induce settlement in Canada; and, probably, the results already ascertained will enable them to form a correct judgment as to the advisableness of continuing the original conditions of these grants, or of so modifying them as to ensure the desideratum of a perfect and enlarged system of colonization. But avoiding, as beyond the proper sphere of this Work, any observations that might be construed into an attempt to propound any new theory upon the subject, it may yet be permitted to call public attention to the above considerations, with a view to such action as the really-vital interests of the Province require.

The best class of Emigrants we can receive, and that we should encourage with every possible facility, especially for the occupation of the Free Grants, is that which combines, as it were, the capitalist and the laborer in the same individual—those who can commence with means amply sufficient to sustain themselves for at least fifteen or eighteen months, while they have their whole labor at command to clear land, raise their first crops, and especially perfect to the utmost the means of ingress and egress of their occupation. Upon the latter point immigrants cannot be too particularly advised, if they would avert the risk of utter failure of settlement upon a Bush farm. Such a result too often happens, which has for its effect the wide-spread representation of the hardships and privations *hitherto* incidental to a bush-life, and the deterring of many immigrants, despite their original intentions and long-cherished hopes, from attempting such a plan of settlement, especially if they have the means to purchase some one of the many run-out farms that are constantly offered for sale; while, under proper arrangements and a *judicious* outlay of their capital, their location upon wild land may be made to afford them the surest permanent benefit and ultimate independence. The mass of timber upon a lot of wild land that too frequently frightens a settler to rush to the western prairies, where he may find none, not even sufficient for fencing, would under certain circumstances be a source of much comfort, and probably profit, according to his proximity to a mill to convert it into marketable value.

Mr. T. P. French, the Agent for the Settlement of the Ottawa and Opeongo Road, and the author of a pamphlet abounding with useful information, has given £56 2s. 1d. as the requisite outlay for one year for a man his wife, and three young children, located upon one of the Free Grants, assuming, of course, that the parties should be characterized by strict sobriety and untiring industry: but it should be observed upon this point (for it is one of great importance), that the success or failure of such undertakings is much less dependent upon the amount of capital possessed by the parties than upon their personal qualifications; which indeed, are more frequently exhibited by those inured to indigence than by those who have become habituated to even only the commonest indulgences of life: hence the apparent anomaly, that many of the former rise to some of the highest positions in society, while the latter too frequently retrograde in circumstances and social status. Even were there not this probable consequence of previous influences upon character, the sufficiency or otherwise of any given sum is so dependent on various other circumstances that very great caution should be used in acting on any estimate. Under some favorable circumstances much less than Mr. French's estimate might suffice to bring a family of the number and description he has supposed through their difficulties; but there are also very probable exigencies, such for instance as a very bad road, that would render a much larger sum actually indispensable to mere existence. A settler, especially if newly arrived in the country, and about to avail himself of a Government grant, should, in the first place, guard himself from a too implicit trust to his own preconceived notions of the country and the requirements demanded of him; but rather seek and act upon the advice of experienced and disinterested persons, particularly as to choice of location and some other matters connected with his settlement: secondly, he should most determinedly change any habit that might interfere with an observance of the strictest frugality—at least, for the first few years of his forest life; since nothing but an undignified dependence upon friends (if he have such), or neighbours, can compensate for the pecuniary detriment he would otherwise inflict upon his family: and, thirdly, he should accommodate his manners to promote an interchange of civilities and services with his neighbours; for, positively, not only his comfort but every chance of success in the "Bush" would be destroyed by a demeanour betraying the least semblance to pride, austerity, or ill-will. A particular attention to these points of general advice, trifling as they are to intrinsic rather than extrinsic requirements, will effect much in enabling a settler to accomplish the one great object of his emigration.

Of the Canadian ocean steamers Mr. Buchanan very encouragingly reports that "the successful and satisfactory manner in which the 'Montreal Ocean Steamship Company' have carried out their contract with the Provincial Government has called forth a spontaneous feeling of approbation, from one end of the Province to the other. These vessels have proved themselves admirably adapted for this trade; combining together not only safety and comfort, but securing a more rapid diffusion of the benefits of commerce; and I am happy to observe, that these are greatly enhanced by the high testimonials which the passengers have at all times borne, with regard to the kindness and attention of the officers, added to the excellence of the accommodations, as well as the treatment and fare they received, while on board of these steamers.

"The successful establishment of this line cannot fail of exercising an important and beneficial influence on the Province generally, by attracting a large number of the better and more wealthy class of emigrants by this route; who in the absence of such facilities have heretofore been obliged to take that by Boston or New York. These ships made 14 voyages between April and November, bringing out 1033 cabin, and 1669 steerage passengers, and performing the passage out in an average of 12 days."

But a very important advantage, in connection with these steamers, claims particular notice; while, as we see by the above, that they have performed the passage on an average in 12 days, the sailing-vessels from the same country have taken on an average 44 days—a difference of more than a month; the wages of which time in Canada, to a working man, would go far to make up the difference in cost of passage-money, especially if the greater liberality of the steamers' scale of provisions be taken into account.

It is also gratifying to notice in Mr. Buchanan's Report, that the per-centage of deaths on the passage was only 0.43; but still more so that on the emigrants' first residence in Canada (referring particularly to those passengers it was deemed necessary to receive at Grosse Isle) the mortality was only 0.09 per cent,—a practical testimony to the salubrity of the climate, even under circumstances otherwise especially unfavorable.

The following Returns have been furnished by the Chief Agent for Emigration.—It should be borne in mind, in regard to any general conclusions to be deduced from these statistics, that the emigration of the memorable year of 1847 was exceptional in almost every respect.

RETURN of the Number of Emigrants arrived at Quebec from each Port of the United Kingdom, from the Lower Provinces of British North America, and from Foreign Countries, since the year 1831.

SKETCH OF THE GEOLOGY OF CANADA.*

The geological formations that have been ascertained to exist in Canada are: 1st, the Laurentian system; 2d, the Huronian; 3d, the Palæozoic rocks, from about the base of the Silurian upwards to the base of the Carboniferous; 4th, the Glacial Drift. Of each of these it is proposed to give a short description in the following sketch.

1. *The Laurentian System.*—It is estimated that at least 200,000 square miles of the northern and central portions of Canada are occupied by the Laurentian rocks. They spread over nearly all the country north of the rivers Ottawa and St. Lawrence, and also over the greater part of the region lying between the Ottawa and Lake Huron. From this last-mentioned tract they extend in a southerly direction to the St. Lawrence, between Kingston and Brockville, and are continued into the State of New York. The boundaries of the formation will be more particularly defined in the description of the Palæozoic rocks.

The Laurentian system consists of many varieties of gneissoid, quartzose, and felspathic rocks, interstratified with beds of white crystalline limestone, and dolomite, and rich deposits of the magnetic and specular oxydes of iron. These rocks are distinctly stratified, and are no doubt of aqueous origin, having been accumulated in a sea vastly more ancient than that of the Silurian period. No fossils have yet been found in them; but as they are in a highly altered condition, it is possible that they may have at some time contained an abundance of organic remains, which have been obliterated while the rocks were undergoing the process of metamorphism. The strata appear to have been subjected to many great convulsions, as they are usually tilted up at various angles, bent, broken by faults, and greatly confused. They are very evidently older than the Lower Silurian, it having been ascertained that not only does the Potsdam sandstone rest upon them unconformably, but also that the Huronian rocks in the neighborhood of Lakes Huron and Superior are interposed between this sandstone and the Laurentian.

2. *The Huronian System.*—The Huronian formation is known on the shores of Lakes Superior and Huron where it attains a thickness of about 12,000 feet, and is seen to pass beneath the Lower Silurian, while it reposes upon the Laurentian. It is therefore newer than the latter, and older than the former. This system of rocks consists of a series of schists, sandstones, limestones, and conglomerates, interstratified with beds of greenstone, and holding those deposites of copper ore which have made that part of Canada a mining region.

In addition to the copper, other metals, such as silver, nickel, cobalt, lead, and gold, have been found in small quantities. This formation has as yet yielded no fossils, although it is for the greater part a stratified, sedimentary deposit. It has been traced for a distance of 450 miles along the shores of Lakes Huron and Superior, and stretching northeast to Lake Temiscamingue.

3. *The Palæozoic Rocks.*—Reposing upon the two above-noticed formations, we have in Canada, a complete series of the Palæozoic rocks, from about the base of the Lower Silurian to the base of the Carboniferous. The dividing line between these rocks and the Laurentian series has been ascertained to be very nearly as follows. Commencing at the most eastern extremity of the Province, where the line between Labrador and Canada strikes the Gulf of St. Lawrence, and proceeding westerly, the coast consists of Laurentian rocks as far as Cape Tourment, near Quebec. The Mingan Islands and the Island of Anticosti are Silurian; the northern outcrop of this latter formation, therefore, probably lies in the bed of the St. Lawrence, not far from the north shore. From Cape Tourment westerly there is a narrow strip of the Silurian along the north side of the river, becoming gradually wider, until at Montreal it has a breadth of thirty miles. The line then approaches the Ottawa gradually; and at length, at the Chats Rapids, thirty miles above the city of Ottawa, it turns towards the south, crossing the river, and thence proceeding with a meandering course to the St. Lawrence, which it strikes in the neighborhood of Brockville. The whole of the Province south and east of the line thus laid down is Palæozoic. Above Brockville the Laurentian rocks follow the north shore of the St. Lawrence until within a short distance below Kingston, where we again encounter the outcrop of the Lower Silurian. From this point the line between the Palæozoic and Laurentian rocks runs westerly to the southeast corner of the Georgian Bay, north of Toronto, passing through the rear of the settled portions of the country lying on the north shore of Lake Ontario. The whole of Upper Canada south and west of this line, and also all except the most easterly islands of the Georgian Bay, are Palæozoic. Upper Silurian rocks have also been found at the head of Lake Temiscamingue and at Lake St. John, on the Saguenay. Those of the former lake are, in the opinion of Sir W. E. Logan, a portion of the great northern basin which lies in the region of Hudson's Bay.

The Palæozoic rocks of Western Canada have never been much disturbed, and are usually found lying nearly horizontally. They consist of the same subdivisions as those of the neighboring State of New York; namely, the Potsdam sandstone, Calciferous sandrock, Chazy, Birdseye, Black River and Trenton limestone, Utica slate, Hudson River group, Medina sandstone, Clinton and Niagara group, Onondaga salt group, Corniferous limestone, Hamilton group, and Chemung and Portage group.

In the country lying between the St. Lawrence and Ottawa the Palæozoic rocks consist of the Potsdam sandstone, Calciferous sandrock, Chazy, Birdseye, Black River and Trenton limestones, Utica slate, and Hudson River group.

In Eastern Canada all the above deposits occur, and also some Devonian rocks and a portion of the lower part of the Carboniferous system, which are not found in Upper Canada. In general, the country south of the St. Lawrence and east of the meridian of Montreal, is in a very disturbed condition, and many of the rocks have been so much altered as to resemble somewhat the metamorphic rocks of the Laurentian system.

4. *The Glacial Drift.*—This deposit consists of various beds of clay, sand, and gravel, intermixed with boulders and remains of sea-shells, and of fishes now living in the Atlantic. It is spread out over the whole

* Compiled from the Reports of Sir W. E. Logan, Director of the Geological Survey of Canada.

surface of the Province, and is generally from ten to one hundred feet in thickness. In a few localities it has been ascertained to have a depth of two or three hundred feet. It is of the same age as the Glacial drift of the neighboring United States.

These are all the geological formations yet ascertained to exist in the Province of Canada. In this work it would be out of place to enter more diffusely upon the subject; and the reader is therefore referred to teh various reports of the Geological Survey, where very full descriptions of the portions that have been examined will be found.

CATALOGUE OF THE ECONOMIC MINERALS OF CANADA.

METALS AND THEIR ORES.

Magnetic Iron Ore.—Marmora, four localities; Madoc, four localities; South Sherbrooke, Bedford; Hull, three localities; Portage du Fort.

Specular Iron Ore.—Wallace Mine (Lake Huron), MacNab, St. Armand; Sutton, three localities; Brome, three localities; Bolton.

Limonite (Bog Ore).—Middleton, Charlotteville, Walsingham, Gwillimbury West, Fitzroy, Eardley, March, Hull, Templeton, Vaudreuil, St. Maurice, Champlain, Batiscan, Ste. Anne, Portneuf, Nicolet, Stanbridge, Simpson, Ireland, Lauzon, St. Vallier.

Titaniferous Iron.—St. Urbain (Baie St. Paul), Vaudreuil (Beauce).

Sulphuret of Zinc (Blende).—Prince's Mine and Mamainse (Lake Superior).

Sulphuret of Lead (Galena).—Fitzroy, Lansdowne, Ramsay, Bedford, Bastard, La Petite Nation, Anse des Sauvages, and Anse du Petite Gaspé, Maimanse.

Copper.—St. Ignace, and Michipicoten Islands (Lake Superior), St. Henri, *native copper*. Prince's Mine (Lake Superior), *sulphuret of copper*. Mica Bay and Maimanse (Lake Superior), *sulphuret, variegated copper, and copper pyrites*. Bruce's Mine (Lake Huron), Root River, Echo Lake and Wallace Mine (Lake Huron), *copper pyrites*. Inverness and Leeds, *variegated copper*. Upton, *argentiferous copper pyrites*. Ascot, *copper pyrites containing gold and silver*.

Nickel.—Michipicoten (Lake Superior), *arsenial nickel, with a hydrated silicate of nickel*. Wallace Mine (Lake Huron), *sulpharseniuret of nickel*. Daillebout, Berthier, *nickeliferous pyrites*. Ham and Bolton, in small quantities, associated with chromic iron. The nickel in most of these different localities is accompanied with a little cobalt.

Silver.—St. Ignace, and Michipicoten Islands (Lake Superior), *native silver with native copper*. Prince's Mine (Lake Superior), *native silver with sulphuret of silver*.

Gold.—Seigniory of Vaudreuil (Beauce), on the Rivers Guillaume, Lessard, Bras, Touffe des Pins, and Du Lac, Seigniory of Aubert de Lisle, Rivers Famine and Du Loup, Aubert-Gallion, Poser's Stream, and the River Metgermet. All of these localities in the County of Beauce afford native gold in the alluvial sands. This auriferous region has an area of 10,000 square miles, and the precious metal has been found at Melbourne, Dudswell, Sherbrooke, and many other localities in the valleys of the St. Francis and the Chaudière. Native gold is also found in small quantities in Leeds in a vein with specular iron, and at Vaudreuil (Beauce) with blende and pyrites. These sulphurets are both auriferous, and the copper pyrites of Ascot also contain a small proportion of gold. The native silver of Prince's mine likewise contains traces of gold.

NON-METALLIC MINERALS.

Uranium.—The yellow oxyd of uranium is found in small quantities with the magnetic iron of Madoc.

Chromium.—Bolton and Ham are localities of large beds of chromic iron.

Cobalt.—At Prince's mine, Lake Superior, as *arseniate of cobalt*, and associated with nickel in the localities mentioned above.

Manganese.—Bolton, Stanstead, Tring, Aubert-Gallion, Ste. Marie, Beauce, Ste. Anne, *earthy peroxyd.*

Iron Pyrites.—Clarendon, Terrebonne, Lanoraie, Garthsby.

Graphite.—Grenville, Fitzroy.

Dolomite.—Lake Memphremagog, North Sherbrooke, Drummond, St. Armand, Dunham, Sutton, Brome, Ely, Durham, Melbourne, Kingsey, Shipton, Chester, Halifax, Inverness, Leeds, St. Giles, Ste. Marie, St. Joseph.

Carbonate of Magnesia.—Sutton, Bolton.

Sulphate of Baryta.—Bathurst, MacNab, Lansdowne, and many localities on Lake Superior.

Iron Ochres.—St. Nicholas, Ste. Anne de Montmorency, Champlain, Waltham, Mansfield, Durham.

Steatite.—Sutton, Bolton, Melbourne, Ireland, Potton, Vaudreuil (Beauce), Broughton, Elzevir. The steatite of the last four localities is employed as a refractory stone, and that of Stanstead and of Leeds is ground and employed as a paint.

Lithographic Stone.—Marmora, Rama, Lake Couchiching.

Agates.—Isle St. Ignace, Michipicoten and Thunder Bay (Lake Superior), Gaspé.

Jasper.—Ascot, Rivière Ouelle, Gaspé.

Labrador Felspar.—Mille Isles, Drummond, and many other localities.

Aventurine.—Burgess.

Hyacinthe.—Grenville.

Corundum.—Burgess.

Amethyst.—Spar Island, and many other localities on Lake Superior.

Jet.—Montreal.

Quartzose Sandstone, for the Manufacture of Glass.—Cayuga, Dunn, Vaudreuil, Isle Perrot, Beauharnois, and many localities on the north shore of Lake Huron.—The sandstone of St. Maurice is employed as a fire-stone for iron furnaces.

Retinite and Basalt, for the Fabrication of Black Glass.—Many localities on Lake Huron and Superior.

Gypsum.—Dumfries, Brantford, Oneida, Seneca, Cayuga, &c. : the localities are very numerous.

Shell Marl.—Calumet, Clarendon, North Gwillimsbury, Bromley, MacNab, Nepean, Gloucester, Argenteuil, Hawkesbury, Vaudreuil, St. Benoit, Ste. Thérèse, St. Armand, Stanstead, St. Hyacinthe, Montréal, New Carlisle (Gaspé).

Phosphate of Lime.—Burgess, Hull, Calumet, Ottawa.

Millstones.—Several kinds of stone, more or less adapted to the purpose, are employed in Canada for the fabrication of millstones. The best is a corneous diorite which accompanies the serpentine of the Eastern Townships, and has been wrought at Bolton.

A silicous conglomerate which serves to make millstones is found at Vaudreuil, at the Cascades, Ham, and Port Daniel. We may mention also for this purpose the granites of Stanstead, Barnston, Barford, Hereford, Ditton, Marston, Strafford, Weedon, and Vaudreuil (Beauce). The granite millstones of Vaudreuil are much esteemed. The pseudo-granites and diorites of the mountains of Ste. Thérèse, Rouville, Rougemont, Shefford, Yamaska, and Brome, are also sometimes employed to make millstones.

Grindstones.—A sandstone known as the gray-band, and found at the base of the Upper Silurian of Western Canada in many localities, is employed for the fabrication of grindstones. The Potsdam sandstone and a sandstone from Gaspé Basin are also employed for the same purpose.

Whetstones.—Madoc, Marmora, Lake Mazinaw, Fitzroy, Potton, Stanstead, Hatley, Bolton, Shipton, Marston.
Tripoli.—Laval, Lanoraie.

BUILDING MATERIALS.

Granites.—Large masses of a very beautiful intrusive granite are found in many of the townships of the East. Among other localities we may cite Stanstead, Barnston, Hereford, Marston, Megantic mountains, Weedon, Winslow, Stafford, and Lambton. The diorites of the mountains of Ste. Thérèse, Rouville, Rougemont, Yamaska, Shefford, and Brome, furnish also good building stones.

Sandstone.—A beautiful variety of yellowish-white sandstone occurs at Niagara, Queenstown, Barton, Hamilton, Flamboro' West. Nelson, Nassagaweya, Esquesing, Nottawasaga, and Cayuga. Other localities are Rigaud, Vaudreuil, Isle Perrot, St. Eustache, Terrebonne, Beauharnois, St. Maurice, Lac des Allumettes, and Fitzroy.

Calcareous Sandstone.—Brockville, Ottawa, and a great many places on the Ottawa river, St. Nicolas (Lauzon), Cap Rouge, Malbaie.

Limestones.—Malden, Manitoulin and St. Joseph Islands, Cape Hurd, Cabot's Head, Sydenham, Euphrasia, Nottawassaga, Mono, Esquesing, Nelson, Ancaster, Thorold, Marchedash Bay, Orillia, Rama, Mara, Marmora, Madoc, Belleville, Kingston, Macnab, Ottawa, Plantagenet, Hawkesbury, Cornwall, Isle Bizard, Isle de Beauharnois, Caughnawaga, Montreal, Isle Jésus, Terrebonne, Philipsburg, St. Dominique, Grondines, Deschambault, Beauport, Baie St. Paul, Malbaie, Upton, Acton, Wickham, Magoon's Point, Stanstead, Hatley, Dudswell, Temiscouata, Gaspé, Port Daniel, Richmond, Anticosti.

Hydraulic Limestones.—Point Douglas (Lake Huron), Paris, Cayuga, Thorold, Kingston, Loughboro', Hull, Quebec.

Roofing Slates.—Kingsey, Halifax, Lambton, Melbourne, Westbury, Rivière du Loup.

Flagging Stones.—Toronto, Etobicoke, River Credit, York, Temiscaming, Bagot, Horton, Clarendon, Sutton, Potton, Stanstead, Inverness, Port Daniel.

Clays.—Clays suitable for the fabrication of red bricks, tiles, and coarse pottery, are everywhere found through the valleys of the St. Lawrence, Richelieu, and Ottawa. Clays for the manufacture of white bricks are met with at London, Toronto, Cobourg, and Peterborough.

Moulding Sand.—Augusta near Prescott, Montreal, Acadie, Stanstead.

Fullers' Earth.—Nassagaweya.

Marbles.—White.—Lake Mazinaw, and Philipsburg.

Black.—Cornwall, Philipsburg.

Red.—St. Lin.

Brown.—Pakenham.

Yellow and Black.—Several varieties at Dudswell.

Grey and Variegated.—MacNab, Philipsburg, St. Dominique, Montreal.

Green.—Serpentines affording several beautiful varieties of marble occur at Grenville, and along a range of 150 miles in the Eastern Townships. Among other localities we may mention Stokely, Brompton, Oxford, and Vaudreuil (Beauce).

COMBUSTIBLES, &c.

STATE AND PROGRESS OF PUBLIC INSTRUCTION IN UPPER CANADA.

The present Educational prosperity of Upper Canada has had its rise in very feeble beginnings. Fifty years ago an unsuccessful effort was made to endow four Grammar Schools and a University; and in 1807 the first Legislative enactment was passed establishing Classical and Mathematical Schools in the eight districts into which Upper Canada was then divided, and endowing them with $400 per annum each. That established at Kingston, and afterwards at Cornwall, under the mastership of Mr. Strachan (now the Right Rev. Lord Bishop of Toronto), was most efficient.

In 1816—nine years after the establishment of the Grammar Schools—the Legislature of Upper Canada passed the first Common School Law for that Province, and appropriated $24,000 per annum for the maintenance of Common Schools. In 1820 this sum was reduced to $10,000.

In 1822, a Board of Education for Upper Canada was established for the supervision of the Grammar Schools, and the management of the University and School lands. Some regulations were adopted; and in 1824, an attempt was made to introduce Common and Sunday School libraries. Nevertheless, the zeal of the public in behalf of Education gradually languished; and it was not until 1836 that an effort was made to revive it. An elaborate report was prepared by Dr. Thomas Dunscombe, M.P.P., Chairman of the Educational Committee of the House of Assembly, on the state of Education in the various parts of the adjoining Union which he visited. He also prepared a draft of a Bill, which was printed, but never passed. The political crisis of 1837 soon followed, overwhelming in confusion all our affairs, and preventing further attention being given to the subject.

In 1841, however, a Bill was passed restoring our Common Schools, and tracing the outlines of a System of Education. In 1844, the Rev. Dr. Ryerson, the present head of the Department, was appointed. A Canadian himself, and ardently devoted to its advancement, he speedily set himself to reconstruct, upon a broader and more lasting foundation, our entire system of public instruction. As a preliminary step, he devoted a year to the examination and comparison of the system of Education in Europe and America, and embodied the results in a "Report on a system of public Elementary Instruction in Upper Canada." This valuable and comprehensive Report sketches, with a bold and masterly hand, the whole system of public instruction which is now in successful operation among us.

The chief outlines of the system are similar to those in other countries. We are indebted in a great degree to New York for the machinery of our schools, to Massachusetts for the principle upon which they are supported, to Ireland for an admirable series of Common School books, and to Germany for our system of Normal School training. All, however, are so modified and blended to suit the circumstances of the country, that they are no longer exotics, but "racy of the soil." In several important particulars, it differs from any other on this continent. The chief points of difference are as follows:—

1. It provides for specific religious instruction, and the co-operation and visitation of the local clergy of the various religious persuasions.
2. The chief Executive is a non-political and permanent officer.
3. Taxation for its support is voluntary on the part of the various municipalities.
4. It prohibits the use of foreign books in the English branches of instruction, except by special permission,—thus preventing the introduction of heterogeneous text-books, and those designedly inimical to our institutions.
5. It provides for the supply of maps, school apparatus, text-books, and library books to all the schools, direct from the Department, and grants 100 per cent on local appropriations for this purpose.
6. It provides for pensioning of worn-out teachers.
7. It provides for taking and recording meteorological observations at each of the senior County Grammar Schools.

The Normal School at Toronto was established in 1847, and annually trains about 100 teachers. A Journal of Education is published monthly by the Department, and sent to each Trustee, Corporation, Local Superintendent, County Clerk, &c., in Upper Canada.

A Model Grammar School is now in process of erection on the Normal School site. It is designed to afford instruction to 100 Pupils, (to be selected from different Counties in Upper Canada,) and to form a sort of Normal School for Grammar School Masters. Meteorological Stations are also about being established throughout Upper Canada in connection with the Senior County Grammar Schools. Instruments and instruction are provided by the Educational Department.

The following statistical extracts exhibit the progress and present state of public instruction in Upper Canada up to the close of 1856:—

The establishment of a Normal School, as necessary to the completion of a national system of education, engaged public attention in 1836; but nothing was accomplished until after the appointment, in 1844, of the Rev. Egerton Ryerson, D.D., as Chief Superintendent of Education. In February, 1846, Dr. Ryerson, after investigating the systems of education in Europe and the United States, submitted to Government his Report on a System of Elementary Education for Upper Canada, and a draft of a School Bill, which obtained the assent of Parliament, 23d May, 1846. On the 1st July following, the Board of Education (now Council of Public Instruction) was appointed, for the purpose of establishing the Normal and Model Schools, and selecting text-books for the Common Schools of the Province. By agreement with the Government, the old Government House of Upper Canada, at Toronto, was granted for the use of the Normal School, until the erection of proper buildings; and after the completion of the necessary arrangements, the institution was formally opened for the admission of students on the 1st November, 1847. The following year the Model School was opened.

On the removal of the Seat of Government from Montreal to Toronto, in 1849, measures were adopted for the immediate erection of buildings for the institution. Accordingly, the Legislature, in 1850, appropriated £15,000 for the purchase of a site and erection of buildings, and an additional £10,000 in 1852,—making in all £25,000. The corner stone of the new buildings was laid on the 2nd July, 1851, by His Excellency Lord Elgin, and the premises were formally opened on the 24th November, 1852.

The institution consists of a Normal School and two Model Schools: the former, the School of Instruction by Lecture; the latter, the School of Instruction by Practice. The students in the former are young persons whose ages vary from 16 or 18 to 30, and over, while the pupils in the latter are children between the ages of 5 and 16 years. In the Normal School, the teachers in training are instructed in the principles of education and the best methods of communicating knowledge to the youth placed under their care,—are "taught how to teach"; and in the Model Schools they are taught to give practical effect to those instructions, under the direction of teachers previously trained in the Normal School. The Model Schools are designed, by both the system of instruction pursued and the general arrangement, to be the *model* for the public schools of the Province.

The Government of Old France had given a great deal of attention to the subject of public instruction in Canada. The first school in this country was the Jesuits' College, opened at Quebec by Father Le Jeune in 1632. The Seminary of Quebec was founded by Mgr. De Laval in 1662. The College of St. Sulpice at Montreal, and the Nunnery of the Ursulines at Quebec, were also among the first schools opened in this country. The Frères Charrons, a religious order, and subsequently the Frères des Ecoles Chrétiennes, also had schools for elementary education in Canada under the French *régime*, but they were discontinued after a short time. The pious Marguerite Bourgeois, whose name is now surrounded with veneration by all Canadians, founded, in 1653, the order of La Congrégation de Notre Dame, which has now 40 schools in operation, with about 7000 pupils. The Franciscans had a good many elementary schools for boys before the Conquest, and the Jesuits supported out of their revenues several lay teachers, who were mostly old pupils of their college. The two orders having been suppressed during the first years of the new *régime*, there remained for a long time scarcely any other schools but the two Seminaries of Quebec and Montreal, the Convents of the Ursulines at Quebec and at Three Rivers, and the schools of the Congregation of Notre Dame at Montreal and at several villages throughout the country. Indeed, although the Sisters did not admit boys into their schools, a great portion of the education received by the men in the country parishes, is due to them; many a mother who was taught by them, having in her turn educated her own children of both sexes.

Lord Dorchester, Governor of the Province of Quebec, appointed, in 1787, a commission to inquire into the subject of education. That commission recommended the establishment of an elementary school in each parish, of a model school in each county, and of a non-sectarian university. The whole was to be endowed with the Jesuits' estates and by grants from the Crown lands. Bishop Hubert opposed the plan, whilst his coadjutor, Bishop Bailly, supported it; and ultimately it was dropped by the Government. In 1801, the Royal Institution for the Advancement of Learning was created; but the members of the Board being composed of men with whom the great majority of the people had no sympathies, and the teachers being mostly imported from the United Kingdom and without any knowledge of the French language, it was a decided failure. After twenty years of existence, it had 37 schools and 1048 pupils. It reached as a maximum 84 schools and 3675 pupils. In 1824, the Legislature passed an Act, entitled, "An Act for the Encouragement and Endowment of Elementary Schools in the Parishes." That Act provided for the establishment of one school in each parish, through the agency of the *fabriques*, which are corporate bodies, instituted under the old laws of France, consisting of the *curé* or rector and of the *marguilliers* or churchwardens. It provided that whenever the parish would number more than two hundred families, a second school could be opened. The *fabrique* was authorized to acquire and possess one acre of land whereon to build a schoolhouse, and to apply one fourth of its revenues to the maintenance of the schools.

In 1829 an Act was passed providing for the election of school trustees in each parish or township, for the payment of a salary of twenty pounds to each teacher whose school would number twenty pupils, with an addition of ten shillings for each pupil belonging to any poor family taught free in the school. The same statute provided also that the Government was to pay one half of the building of school-houses, under certain conditions; the whole amount not to exceed £2000 per annum. Several Acts were subsequently passed amending and extending those previous Acts. They contained provisions for aid to colleges and girls' academies, and various sums voted to Mr. Perrault and to the Quebec Education Society for the introduction of the Lancasterian system. A deaf and dumb institute at Quebec was also provided for, and, under the auspices of Mr. Ronald Macdonald, who had been instructed by Mr. Leclerc, himself a disciple of the Abbé de Lepée, it realised every expectation.

Various wise enactments for collecting statistics, for visiting schools by Members of Parliament, and for the distribution of prize-books, were made. One of the statutes provided also for the erection of a Normal School; and the Rev. John Holmes, principal of the Seminary of Quebec, was sent to Europe with a view of visiting the normal schools of the old world, and of procuring professors, books, apparatus, and collections of natural history. He returned towards the end of 1836, with Mr. Regnaud, the director of a normal school in France, and Mr. Findlater from Scotland. A Normal School was opened in Montreal; but the Troubles having broken out a short time after, and the Constitution having been suspended, the school had to be given up. Mr. Findlater went back to Scotland, and Mr. Regnaud, finding employment here as a land surveyor, remained in the country. The provisions for the maintenance of the Common Schools having been allowed to fall through by the Legislative Council, during its quarrels with the House of Assembly, the system which had been gradually maturing itself, was destroyed. This was the second great blow aimed at the educational institutions of Lower Canada. The first was the confiscation of the Jesuits' and Franciscans' estates, shortly after the Conquest. When the second calamity befel us, there was under the operation of the law 1600 schools, wherein 40,000 children were taught; most of which had to be closed. In the meantime, however, several colleges had been erected and were in a most flourishing condition. When Lord Durham came here, with all the powers and attributes of vice-royalty, he found, as he has stated, Lower Canada in the anomalous position of a country where superior education was amply provided for, while nothing almost was done for elementary education. In his Report, he paid however to our classical institutions a just tribute of praise.

After the Union of the Provinces, the Legislature passed, in 1841, a law for the establishment and maintenance of public schools. It provided for the appointment of a Superintendent of Education for the whole Province, and appropriated a sum of £50,000 for the support of common schools, to be apportioned between the several municipal districts in proportion to the number of children of school age in each of them. The Hon. Mr. Jamieson was appointed Superintendent under this law; but to meet the wants of the two sections of the Province, the Rev. Mr. Murray and Dr. Meilleur were also appointed Superintendents, the former for Upper and the latter for Lower Canada. Dr. Meilleur had been a Member of the Provincial Parliament of Lower Canada for several years, and had published various elementary works. He had also been one of the founders and directors of the College of L'Assomption. In 1845 another law was passed, applying chiefly to Lower Canada, and providing for the appointment of a Superintendent for each section, and containing a great many new regulations, that had been omitted in the first law. This was again superseded by the law of 1846, which is the foundation of the several laws now in force. One of its most important features was that it made the assessment compulsory, and did away with the voluntary contributions. That important step was however altered in 1849, when a law containing various amendments, most of which, giving to the Superintendent powers of a quasi-judicial nature in matters controverted between the parties to the school law, restored the voluntary contribution, which however at present, in most of the Municipalities, the good sense of the people has set aside for the legal assessment. It also contained new provisions concerning the monthly fees, and the powers of the Boards

of Examiners. Another law, passed in 1851, provided for the establishment of a Normal School and for the appointment of School Inspectors. In 1855, Dr. Meilleur resigned his office, and was appointed to that of postmaster at Montreal. He left a name untarnished for his assiduity, perseverance, and integrity, and, considering the great difficulties he had to contend with, by the violent opposition to school assessments made in several parts of the country by contemptible seekers of popular fame, justly branded with the French name of *éteignoirs*, he may be said to have been generally successful in his administration. He was succeeded by the Hon. Pierre J. O. Chauveau, who had been a Member of Parliament for the County of Quebec during eleven years, and had filled successively the offices of Solicitor General for Lower Canada and of Secretary of the Province.

In his first report, Mr. Chauveau recommended various reforms; and for the accomplishment of most of them, two laws were passed in the session of 1856. One of them chiefly relates to superior, and the other to elementary education. The most important features of this new legislation consisted in providing for the distribution through the Superintendent, and on his report, of the annual grants to Universities, Colleges, Academies, and Model Schools; the creation of several Normal Schools instead of one; the publication of Journals of Education; the appointment of a Council of Public Instruction; and the creation of a teachers' pension fund, on the same principle as that of Upper Canada. With the exception of the appointment of the Council of Public Instruction, these measures have all been carried into effect. There are now published two Journals of Education, one in French and the other in English. They are issued alternately every fortnight, are conducted by the Superintendent with an assistant for each of them, and, with the exception of the official notices, the articles and selections are different [illegible]. The price of subscription is one dollar for each. Teachers are allowed a copy of both, or two copies of either for the same price. It is sent free to public institutions, and to the School Commissioners for their [illegible] and [illegible] of teachers unable to subscribe. Each number contains one or more illustrations. The issue of the *Journal de l'Instruction Publique* is 4,000 copies, that of the *Journal of Education* 2,000. The former has nearly 900 paying subscribers, the latter about 300.

The Jacques Cartier and McGill Normal Schools were inaugurated in Montreal on the 2nd of March, 1857. The Laval Normal School was opened at Quebec on the 15th of May. The McGill Normal School is intended for Protestants, and the teaching is carried on chiefly in the English language; but the French language is also taught with great care. The two others are intended for Catholics; and the teaching is carried on chiefly in French. The English language is however taught to the French pupils; and arrangements have been made that instruction may be also imparted to any English pupil-teacher in his own vernacular. In their Model Schools there are French and English teachers, about an equal number of children of each origin, and the two [illegible] placed precisely on the same footing. The McGill School started with the boys' and girls' department in full operation. The girls' department of the Laval Normal School was opened on the 15th of [illegible]. The girls are boarders at the Ursuline Convent, but the instruction is chiefly imparted to them by [illegible] of the Normal School. The girls' department of the Jacques Cartier Normal School is not yet [illegible] a table of the number of students who have attended each school:—

"I am happy to state that the few bad symptoms which I have pointed out are far from being general, but, on the contrary, the facts and figures which I now hastily compile, will show a continued progress.

"One proof of that progress is the almost general abandonment of the system of voluntary contribution, and the adoption of that of assessment. It will be seen, by Appendix C., that 384 municipalities take the most simple, the most economical, all things considered, and, at all events, the most equitable and certain method, that of assessment; 45 only have had recourse to voluntary contributions, and they are principally municipalities in which they are only beginning to have schools: the practical good sense of our people is every where condemning the latter mode.

"Notwithstanding the extreme misery which has prevailed in many districts, only [illegible] municipalities have availed themselves of the clause in favor of indigent townships; there is everywhere manifested a noble repugnance to taking advantage of that provision. Ten municipalities appear on the table as giving no sign of intellectual life. With the exception of St. Michel d'Yamaska, these are very poor and isolated settlements: Mann and Newport in the District of Gaspé; Valcartier, St. Féréol, Ste. Sophie, and Cranbourne in the District of Quebec, Ely in the District of St. Francis, St. Columban in the District of Montreal, and Grenville in the District of Ottawa. Since receiving the Report of the Inspector [illegible] has ascertained that there have been steps taken by the inhabitants of Valcartier, St. Columban, and St. Féréol, which justify [illegible] in saying that the law is now carried out there; the last-mentioned parish has had a school since the month of July. There are therefore in reality only seven municipalities where the law is not in operation; and it is to be observed to the honor of the Districts of Kamouraska and Montreal that not one of these dark spots is found within their limits.

"Taking the total number of pupils attending colleges, academies, and model schools, we have 15,215 boys receiving instruction of various grades above elementary education. The total number of pupils attending convents and schools of the higher class for girls gives 12,788 girls receiving a superior education. If to this we add one fifth of the pupils of the elementary schools, we shall have 75,782 children receiving a good education.

"In this respect, the numbers for Lower Canada are more than double, as is also the annual progress; and he who would not admit that many of our educational institutions are not inferior to those of any part of this continent, must either be very much prejudiced or know very little of what is passing around him.

"I should have remarked that, besides the numerous superior and secondary educational institutions which the Catholic clergy of Lower Canada have founded, the country owes to them the two Institutions for the deaf and dumb, the only ones which we have. That for females, situated at Long Point, near Montreal, has about twenty pupils; that for boys, at St. Laurent, has lately added to the number of its professors two clerks of St. Viator; one of whom, Mr. Young, is himself deaf and dumb, and was educated at the Institute of Nancy in France.

"It should be remembered that a sum of £30,000 is at the disposal of the Government for the establishment of such schools. Having had, while occupying a different position, to examine this subject, I would be happy to give any information, or make any suggestions, which might be desired, at least as far as Lower Canada is concerned.

"There is nothing better calculated than the following table to establish the substantial character of the progress accomplished. It will be seen that the proportion of the pupils of our model and common schools studying the most important branches of practical education increase every year. The number of those studying compound-arithmetic and book-keeping has doubled in two years; that of those learning geography has increased more than half; students of history have doubled, of grammar have increased more than half, and of parsing have more than quadrupled.

"Dictation or orthographical exercises, which did not figure at all in the Report for 1853, were practised in 1854 by 20,346 pupils, whose numbers this year amount to 32,512.

"Some branches which had never been noticed in the tables for preceding years, appear there for the first time this year, and are represented by very respectable figures. Thus there are 430 pupils studying literature and epistolary composition; agriculture and horticulture 199; mathematics and geometry, 777; surveying and mensuration, 836; linear drawing, 1272; singing, 5013; and instrumental music, 1032. As was to be expected, the academies and model schools claim the greatest part of these developments.

"The progress in some inspection districts is truly astonishing, as proved by the following table, compiled and abridged from the Report of Mr. Beland, Inspector of Schools for the Counties of Lotbinière, Beauce, Dorchester, and Lévi:

UPPER CANADA.

UNIVERSITIES AND COLLEGES.

THE UNIVERSITY OF TORONTO.

The University of Toronto was established by Royal Charter, of the 15th of March, 1827, under the title of "King's College." The following year, 3rd of January, 1828, it was endowed, by Patent, with a grant of the lands which had been set apart for that purpose by the Crown, in 1798, at the request of the Parliament of Upper Canada. The arrangements having been completed for opening the University, the formal inauguration of the Institution and first admission of students, took place on the 8th of June, 1843, and its first Convocation on the 14th December, 1844.

Various acts relating to the University have been passed by the Provincial Parliaments. In 1853, Parliament passed another Act (16 Victoria, cap. 89), "separating the functions of the University from those assigned to it as a College," and abolishing the Professorships of Law and Medicine, and the rights and privileges of the Convocation, which had been guaranteed in the original charter, and continued and enlarged by the Act of 1849. Under this present Act, the University of Toronto is modelled after the University of London, England, and is governed by a Senate appointed by the Crown. Its functions consist in prescribing courses of study in the Faculties of Law, Medicine, and Arts, and such other branches of knowledge as may be determined; appointing Examiners for ascertaining the proficiency of persons desirous of literary distinction in the appointed subjects of study; and conferring the appropriate Academical Degrees and Honors upon such as attain the required proficiency, and comply with the prescribed regulations.

The officers of the Senate are, a Chancellor, appointed by the Crown, and a Vice-Chancellor, elected by the Senate from amongst its members. There are no Professorships in the University. Examiners, appointed annually by the Senate:—Two in Law, eleven in Medicine, and eighteen in Arts, who hold examinations at such times in each year as the Senate may appoint. In addition to Academical Degrees in the various Faculties, the rewards for proficiency are: Diplomas, Scholarships (conferring a yearly stipend and free tuition in University College), Prizes, and Certificates of Honor.

No fees are charged by this University for Matriculation, Examination, Degree or Diploma.

UNIVERSITY COLLEGE,

TORONTO.

On the first establishment of the Provincial University, the functions of instruction as well as of determining the standard of qualifications for University honors and degrees, were combined in the one institution, and were so continued under the University Act of 1849. With a view of adapting the constitution of the University to a system of affiliated Colleges, the Act 16 Victoria, cap. 89, separated these functions, and established University College as a distinct Collegiate institution from the University of Toronto, and under the government of a College Council, composed of a President, Vice-President, and Professors. By the same Act it is provided, that there shall be taught in the said College such sciences, arts, and branches of knowledge as the Council may, from time to time, determine, and as may be in accordance with the Statutes of the University of Toronto, respecting the prescribed subjects for examination.

Visitor.—His Excellency Sir Edmund Walker Head, Bart., M.A. Mert. Coll., Oxon., Governor General of British North America, &c., &c.

President.—Rev. John McCaul, LL.D. Trin. Coll., Dub.

Vice-President.—Vacant.

UNIVERSITY OF TRINITY COLLEGE,

TORONTO.

Trinity College owes its establishment to the preservering efforts of the present Lord Bishop of Toronto, the Right Rev. Dr. Strachan. For a long time it had been insisted that one of the chief objects in obtaining the Charter and endowment of the Provincial University, was to provide means for educating the clergy of the Episcopal Church; but Parliament, acting on behalf of the people of the Province, for whose benefit the University was intended, and in further compliance with the request of the successor of the Royal founder, amended the Charter, by abolishing the Chair of Divinity, in 1849. Previous, however, to the opening of the Provincial University, and about two years before the organization of its Faculty of Divinity, the Bishop established a Diocesan Theological College at Cobourg, for the education of candidates for Holy Orders, and appointed one of his chaplains to be Professor of Divinity for his Diocese. This arrangement continued during the existence of a similar professorship in the University; and became the means of educating about nine-tenths of the clergy who were ordained during the continuance of the two theological schools.

The Act of 1849, while it abolished the distinctive theological character of the Provincial University, continued its Professors. Measures, however, were adopted, in 1850, for the establishment of a Denominational College; and an appeal was made by the Bishop to the members of the Church of England in Canada and England. The appeal, made at a time when party spirit ran high on political and constitutional questions, was liberally responded to. In 1851, Parliament incorporated the proposed Church institution, by the Act 14 & 15 Victoria, cap. 32, under the title of "Trinity College;" and on the 15th of January, 1852, the College was formally opened for the admission of students. On the 10th of July, of the same year, after correspondence and modification of the original draft, a Royal Charter was obtained, conferring the usual University powers to grant degrees in Divinity, Law, Medicine, and Arts. The Corporation created by the Act consists of the Bishop and such persons as he may appoint to be the Trustees and Council of the College, and may hold property to the value of $20,000 per annum, subject to the provisions that "the Corporation shall at all times, when called upon so to do by the Governor of the Province, render an account in writing of their property, setting forth in particular the amount of income and from what property derived; also the number of members of the Corporation, the number of teachers and students, and the course of instruction pursued."

This University confers no degree whatever unless the candidate has previously taken the oath of allegiance and supremacy, and subscribed the following declaration: "I, ————, do willingly and heartily declare that I am truly and sincerely a member of the United Church of England and Ireland."

The institution is liberally endowed by private subscriptions of money and lands, and grants from public bodies.

UPPER CANADA COLLEGE,

TORONTO.

This College was established in the year 1829, by the then Lieutenant-Governor of Upper Canada, Sir John Colborne, (now Lord Seaton,) as an institution for general education, and which might fitly prepare the way for, and ultimately assist in filling, the Provincial University, then only projected. Having first obtained the concurrence of the College Council to the establishment of a *Royal Grammar School*, he submitted to parliament a plan for its connection with the University; and his proposal having been acceded to, the title of the Royal Grammar School was changed to that of *Upper Canada College*, and the institution opened for the purposes of tuition on the 4th January, 1830. Since then, more than two thousand pupils have been entered on its boards,—many of whom are now occupying distinguished positions in the Province and elsewhere. The institution stands in the same relation to the University, as the Preparatory and High Schools of other Universities, although supported by an endowment of its own, aided by an annual Parliamentary grant. At present it is placed under the management of the Senate of the University of Toronto; but the Principal, Masters, and Teachers are appointed by the Governor.

————————, principal; rev. Henry Scadding, D.D., St. John's Coll, Cantab., first classical master; rev. Bull, drawing master; A. Maul, music master; M. Power, drill master.

UNIVERSITY OF QUEEN'S COLLEGE,

KINGSTON.

Queen's College was established by the Synod of the Presbyterian Church of Canada, in connection with the church of Scotland, and was originally incorporated by an Act of the Parliament of Upper Canada, 3 Vict. cap. 35, as *The University at Kingston.* This Act, however, was disallowed, and a Royal Charter granted the following year, bearing date 10th October, 1841, and conferring the title of "Queen's College at Kingston," with power to confer degrees in the several Arts and Faculties. No religious test or qualification is required of persons matriculated, or admitted to a degree, "save only that all persons admitted within the said College to any degree in Divinity shall make the same declarations and subscriptions as are required of persons admitted to any degree in Divinity in the University of Edinburgh." The management of the institution is entrusted to twenty-seven Trustees—twelve clergymen and fifteen laymen—appointed by the Synod of the Church; and to a College Senate composed of the Principal and Professors for the time being. In 1846 the property originally vested in the corporation created by the disallowed Act of 1840, was transferred to the corporation of Queen's College by the Act of 9 Vic. cap. 89. The Institution is supported by income from endowment, a grant from the Legislature, suscriptions, and assistance from Church funds. By the Charter, its income may be £15,000 sterling per annum.

Trustees.—Hon. John Hamilton, M.L.C., chairman; Andrew Drummond, treasurer; John Paton, secretary.

Principal.—Vacant.

Vice Principal—Rev. James George, D.D.

PROFESSORS.

Faculty of Arts.—Rev. James George, D.D., professor of logic and mental and moral philosophy, and interim lecturer on systematic theology; ————————, professor of Hebrew, biblical criticism and church history; rev. J. Williamson, LL.D., professor of mathematics and natural philosophy; rev. George Weir, A.M., professor of classical literature.

Faculty of Medicine—James Sampson, M.D., professor of clinical medicine and surgery; John Stewart, L.R.C.S. Edin., professor of practical anatomy and physiology; John R. Dickson, M.D., professor of principles and practice of surgery; Horatio Yates, M.D., professor of principles and practice of medicine; J. P. Litchfield, M.D., professor of midwifery; Alexander Campbell, professor of forensic state medicine; Fife Fowler, M.D., L.R.C.S.I., professor of materia medica, therapeutics and pharmacy.

UNIVERSITY OF VICTORIA COLLEGE,

COBOURG.

The existence of this College is due to the efforts of the Conference of the Wesleyan Methodist Church. During the years 1828–9, plans were devised for the establishment of an Academy for the superior education of both sexes; and in 1830, the Conference appointed a committee to collect subscriptions, and select a site for the proposed institution, which they then named *Upper Canada Academy*. After offers of donations of land and money from various parts of the Province, the town of Cobourg was selected, for the liberality of its offer and central position. Upwards of $28,000 were collected, and in the autumn of 1832 the buildings were commenced. Various circumstances, however, delayed the completion of the work; and it was not until the 18th June, 1836, that the Academy was formally opened. On the 12th October of the same year, a Royal Charter of incorporation was obtained; and also, about the same time, a public grant, principally through the exertions of the chief originator of the College, the Rev. Egerton Ryerson, D.D. In 1841, application was made to Parliament for an alteration in the constitution of the Academy and its establishment as a University; and accordingly the Act 4 & 5 Victoria, cap 37, was passed, conferring the usual University powers upon its authorities, under the title of "Victoria College, at Cobourg."* Under this Act, the management of the College is entrusted to a Board, composed of nine Trustees and five Visitors, appointed by the Conference; and to a Senate, composed of the President, Professors, Members of the Board, and certain officers of Government, for the time being. The Faculty of Arts has been in operation since 1842. In 1854, an arrangement was made with the Toronto School of Medicine, by which that institution became the Faculty of Medicine of the University. The preparatory department sustains to the College the relation of a Grammar or High School, and is designed to qualify pupils for the University course, or to give them an elementary training in any or all of the following sudjects, viz:—Arithmetic, geography, history, English grammar, reading, penmanship, book-keeping, algebra, natural philosophy, French, Latin, and Greek languages. Students presenting themselves for admission into this department, are classed according to their attainments, and instructed in such branches as are deemed most suitable. No religious tests are prescribed; but all students are required to attend divine service on the Sabbath, in connection with whatever church they or their parents prefer. They are also required to attend prayers, with the reading of the Scriptures, in the College chapel, in the morning and evening of each day. The institution is supported by the sale of scholarships, fees, and an annual Parliamentary grant. Its income is limited by the Charter of incorporation to £2000 sterling per annum.

REGIOPOLIS COLLEGE,

KINGSTON.

The establishment of this college is due to the late Roman catholic Bishop McDonell, by whom it was first endowed, in 1835, with a grant of nearly four acres within the limits of the city of Kingston, and afterwards by a legacy of real and personal estate. In 1837, it was incorporated by the Act 7 William IV., cap. 56, under the title of "The College of Regiopolis," and in 1845 the Trustees under the will were authorized by the Act 8 Victoria, cap. 79, to convey the legacy to the corporation, and the latter authorized to hold real property to the value of $12,000 per annum, subject to the following provision: "It shall be incumbent on the said college to submit annually to each of the three branches of the Legislature, if so required, a detailed statement of the real property held by them under this Act, and of the annual revenue arising therefrom."

Very Rev. Angus McDonell, president. Rev. J. O'Brien, B.A.; H. Burns, Isaac Macarthy, and Michael Stafford, professors.

* In 1850, this Act was amended by 13 & 14 Victoria, cap 143, authorizing the removal of the College to Toronto. Notice of application for another removal Act has lately been given

CANADIAN CONGREGATIONAL THEOLOGICAL INSTITUTE,

TORONTO.

This Institution was first organised in 1840, for the education of candidates for the ministry of the Congregational Church. A few students had previously been receiving instruction from the Rev. Adam Lillie, while he was pastor of a church in Dundas. The number increasing, a "Congregational Academy" (as it was then called), was founded, and Mr. Lillie appointed tutor, taking charge of all the classes. In 1843, a similar movement took place in the Lower Province, resulting in the establishment of a "Congregational Theological Institute" in Montreal, of which the Rev. J. J. Carruthers, D.D., was tutor in theology; the Rev. H. Wilkes, A.M., in philosophy; and the Rev. H. Miles, (for one year) resident tutor. In 1846, the two were amalgamated, under the name of "The Canadian Congregational Theological Institute," and located in Toronto.

The course of instruction extends over four sessions of eight months each, and embraces mental and moral philosophy, logic, rhetoric, theology, biblical criticism and interpretation, Jewish antiquities, ecclesiastical history, homiletics, Hebrew, classics, and mathematics. Students are required to pass an entrance examination in arithmetic, English grammar and composition, geography and history; and also an annual examination at the close of each session.

The Congregational Institute is unendowed, but is supported in part by an annual grant from the Colonial Missionary Society in connection with the Congregational Union of England and Wales, and partly by annual subscriptions from the churches of that body in the Province. The annual cost is about $2400. The premises occupied by it are held on lease, and are situated on the corner of Adelaide and Francis Streets. The management of its affairs is in the hands of a committee chosen by an annual meeting of the subscribers, held at the same time and place as that of the Congregational Union of Canada.

Patrick Freeland, treasurer; Rev. F. H. Marling, secretary; Revs. T. S. Ellerby, A. Lillie, D.D., A. Wickson, M.A., E. Ebbs, J. T. Byrne, and J. B. Robinson; Messrs. Peter Freeland, W. F. Mendell, A. Christie, J. Nasmith, E. Childs, and J. Shaw, committee. The officers of instruction are: rev. Adam Lillie, D.D., theological tutor; rev. KNOX'S COLLEGE,

TORONTO.

Knox's college was established about 1844, by the Synod of the Free Church of Scotland, and is designed for the training of its theological students. The course of study extends over three sessions of six months each, commencing in each year on the 1st of October, and ending on the 31st March. No fees are charged for tuition, &c.

Rev. Michael Willis, D.D., professor of systematic and pastoral theology; rev. George Paxton Young, M.A., professor of exegetical theology, with logic, mental and moral philosophy; rev. Robert Burns, D.D., professor of church history, with the evidences of natural and revealed religion; James A. Smith, classical and mathematical tutor.

UNITED PRESBYTERIAN DIVINITY HALL,

TORONTO.

Was instituted in 1844, by the Synod of that church, for the theological education of those designed for its ministry. The curriculum consists of four sessions, beginning on the third Tuesday of October, and ending on the second Thursday of April. Students must undergo examination by a Presbytery, both before entering at first, and also before returning each session. There is a prescribed list of subjects for examination, in classics, mathematics, logic, mental, moral, and natural philosophy; as well as in the departments of tuition in the Hall. A fund has been raised for giving Annual Exhibitions of $36, $40, and $44 each; and for these there is an annual examination by the Theological Committee, on the subjects prescribed for examination by the Presbyteries. Rev. John Taylor, M.D., professor.

BYTOWN COLLEGE,

OTTAWA.

This college was founded by the present Roman catholic Bishop of Bytown, and was incorporated by Act of Parliament in 1849. The corporation consists of the Roman catholic Bishop of Bytown and the officers of the College, and may hold property to the value of $8000 per annum. By the 6th section of the Act 12 Victoria, cap. 107, the Corporation is required to lay before Parliament, within fifteen days after the beginning of each session, a detailed statement of its members and property, the number of scholars, and the course of instruction. The course of instruction embraces three principal divisions:—1st. An elementary course; 2nd. A special commercial course for those who do not intend to study Latin and Greek; 3rd. A classical course for those desiring a liberal education.

FEES PER ANNUM.—Full boarders, $100; half boarders, $50; day scholars, $20.

Rev. J. Tabaret, president; Revs. A. Trudeau, A. Soulerin and V. Burtin, professors; Messrs. Mangan, Collins, O'Brien, Lefebvre and Brunet, subordinate professors.

ST. MICHAEL'S COLLEGE,

TORONTO.

This college was opened in 1852, by the Fathers of the Order of St. Basil, under the auspices of the Roman catholic church, and was incorporated by an Act of Parliament in 1854. The Corporation consists of the Roman catholic Bishop of Toronto, and the superior and professors of the college, and may hold property to the value of $4000 currency per annum. The 4th section of the Act 18 Victoria, cap. 237, provides that "The said Corporation shall lay before the Governor, whenever required so to do, a detailed statement of the number of members thereof, the number of teachers employed in the various branches of instruction, the number of scholars under instruction, and the course of instruction pursued, and of the real and immoveable property, and of the revenue arising therefrom." The course of study is divided into a commercial and a classical department, the

former for those who require only a limited education, suitable to the ordinary conditions of life; and the latter for those who are preparing for the liberal professions. The scholastic year commences on the first Tuesday in September, and ends on the first Tuesday after the 15th July.

TERMS PER ANNUM.—Full boarders, $120; half boarders, $60; day pupils, $20; washing and mending $10; complete bedding, $6; stationery, $3; music, $16; plain drawing, $2.

Rev. J. M. Soulerin, superior; rev. J. Malbos, treasurer; revs. P. Molony, William Flannery, and C. Vincent, professors; rev. George Northgraves, rev. Francis Rooney, Louis Gibrat, Charles Liverman, John Shea, John P. Kennedy, and B. Maguire, regents.

BELLEVILLE SEMINARY.

This institution is under the direction of the Conference of the Methodist Episcopal Church, and is designed for the instruction of both sexes. Buildings have recently been erected in the town of Belleville, for the accommodation of about four hundred pupils, and arrangements are now in progress for the formal opening of the Seminary. Pupils are to be permitted to attend such places of worship as their parents or guardians may direct. Rev. J. H. Johnson, principal.

TORONTO SCHOOL OF MEDICINE.

This school was established in 1843, and incorporated in 1851, by the Act 14 and 15 Victoria, cap. 155. In 1853 it was affiliated to the University of Toronto, under the operations of the 18th section of the University Act of that year. In 1854, an arrangement was made with the authorities of Victoria College, by which the lecturers of the school were constituted the Faculty of Medicine in the College; but the separate or corporate existence of the school was not affected thereby. In 1856, the lecturers of the Toronto School of Medicine withdrew from their connection with Victoria College, and continued their school in the same manner as before; and it is now conducted solely as an affiliated Medical School of the University of Toronto.

The course of instruction embraces the subjects stated below. Lectures on chemistry and botany are delivered in connection with the course in arts at University College. Ten Scholarships in medicine, each of the value of $120, are annually offered for competition by the University.

Matriculated students have also access to the University library. No fees are required for matriculation or graduation.

SESSION.—The session commences on the first Monday in October, and ends on the last Saturday in March, of the following year.

OFFICERS.—M. Barrett, M.A., M.D., president; W. T. Aikins, M.D., secretary-treasurer.

LECTURERS.—W. T. Aikins, M.D., surgical anatomy and surgery; H. H. Wright, M.D., practice of medicine; M. Barrett, M.A., M.D., institutes of medicine; U. LOWER CANADA.

UNIVERSITIES AND COLLEGES.

LAVAL UNIVERSITY,

QUEBEC.

In 1663, the first Roman catholic Bishop of Canada, François de Montmorency-Laval, founded and endowed, with his own patrimony, an institution, which was called the Quebec Seminary. The primary object of this institution was the education of boys who felt an inclination for the priesthood, and such it continued until 1759. After the conquest of this country by the English, a College, which the Jesuits had held at Quebec since 1645, having been suppressed, the directors of this Seminary, in order to meet the wants and wishes of those boys who were not intended for the priesthood, admitted into their classes all those whose good conduct and talents entitled them to such favor. By this change, the Seminary became a regular College, and had, by successive additions, acquired a high degree of importance, when it was erected, by Her Majesty's Royal Charter, into a University, under the style and name of *The Laval University*.

By this charter, which bears date December 8th, 1852, no change was effected in the constitution of the Seminary itself; but a Council, composed of the directors of the institution, and the three senior professors of the several faculties, was empowered to possess and enjoy all the privileges granted to the Universities of the United Kingdom, and especially that of conferring degrees in the Faculties of Divinity, Law, Medicine, and Arts. His Grace the Roman catholic Archbishop of Quebec is, by virtue of his office, Visitor of the University. The Superior of the Seminary, for the time being, holds the office of Rector.

Since the granting of the charter unceasing efforts have been employed to secure its complete execution. In 1853, five professors of the Faculty of Medicine were appointed, and one of them was sent to England, France,

and Belgium, to purchase a medical library and museum, with a fine collection of surgical instruments. During the following year, the University acquired a great number of books for the Faculty of Law, and a collection for the study of Materia Medica. The expense incurred by these objects was about £12000. At length, in September, 1854, the Faculties of Law and Medicine opened their courses, after a solemn inauguration, in which Lord Elgin took part, on the 21st of that month. At the same time, several buildings were commenced for the use of the University, of which a part only is finished, but which, when completed, will have involved an outlay exceeding $800,000.

Of the four Faculties, two (viz, those of Law and Medicine) have been almost completely organized. Those of Divinity and Arts are now contemplated, and will soon be in operation. The course of instruction is intended to occupy four years, except in the Faculty of Arts, which is limited to three years. In the Faculty of Divinity, dogmatic and moral theology, Holy Scriptures, sacred eloquence, ecclesiastical history, and canon law are to be taught. History, literature, eloquence, moral, intellectual, and natural philosophy, mathematics, &c., will form the subjects of the lectures in the Faculty of Arts. The list of the professors of the Faculties of Law and Medicine shows what branches are already taught in these Faculties. Maritime law and notarial practice will soon be added to the course of lectures in the Faculty of Law; and comparative anatomy in the Faculty of Medicine.

The Library of the University contains 18,000 volumes, of which, 1,200 are in the Law department, and 2,000 in that of Medicine. Besides the museum and collections already mentioned, the Institution possesses philosophical apparatus which have cost $10,000, a good collection of minerals, and a well fitted chemical laboratory.

TERMS.—The academical year is divided into three terms: the first begins on the second Tuesday of September, and ends on Christmas eve; the second begins on the day after Epiphany, and ends on the Wednesday preceding Easter; the third begins on the second Monday after Easter, and ends on the second Tuesday of July. After each term the students are required to pass an examination upon all the matters taught during the term.

Visitor.—His Grace the Most Rev. Pierre Flavien Turgeon, archbishop of Quebec.

Rector.—Very Rev. Louis Jacques Casault, D.D., superior of the Quebec Seminary.

Council.—Hon. William Badgley, LL.D., professor of the Faculty of law; rev. Félix Buteau, director of the Quebec seminary; Jacques Crémazie, LL.D., professor of the Faculty of law; rev. Eng., honorary professor; J. E. Landry, director of the museum; Edouard Bilodeau, apparitor.

Faculty of Arts.—This Faculty, when completely organized, will be composed of eleven professors. Two only have as yet been appointed; rev. J. B. A. Ferland, professor of Canadian and American history; T. Sterry Hunt, Dr. in Sciences, Knt., *Légion d'Honneur*, memb. French Geo. Soc. and Am. Soc. Arts and Scien., professor of chemistry.

COLLEGIATE.

This department is the Seminary as it was till 1852, and is under the control of a board composed of a Superior and at least four directors. It is divided into two parts called the *Grand* and the *Minor Seminary*.

The Grand Seminary comprises the classes of Dogmatic and Moral Theology, Holy Scripture, Ecclesiastical History, and other branches necessary for the discharge of the clerical functions.

The course of studies embraces three years at least. No one is admitted to it unless he has followed a complete course of Philosophy and Literature. The students are all boarders and wear the clerical costume. They pay $80 for board, but the instruction is gratuitous. A library of 1,700 books is at their disposal.

The Minor Seminary comprises nine classes, of which two are in the course of Philosophy, and seven in that of Literature.

In order to be admitted as a student into the Minor Seminary, it is necessary to read the maternal tongue (French or English) very correctly, write pretty well, and have some knowledge of the grammar.

About thirty gratuities have been founded at different periods and by different persons, for the students of the Minor Seminary. About a third of these gratuities are limited to the members of certain families.

A library of about 2,500 volumes is at the disposal of all the students for $1 per annum.

Fees.—Boarders, $80 per annum; Day Pupils, $10.

The actual number of the students in the Minor Seminary is 356, of whom 182 are boarders.

Francœur, P. C. Audet, and D. Dion, masters of the boarders.

UNIVERSITY OF McGILL COLLEGE,

MONTREAL.

The existence of the University of McGill College is due to the late Mr. James McGill, a merchant of Montreal who by trade had amassed an ample fortune, and left behind him this earnest of his benevolent and generous character. He died in 1813, leaving a will by which he bequeathed in trust to the Royal Institution for the Advancement of Learning, his Estate of Burnside, consisting of some forty-six acres of land in the immediate neighbourhood of the City of Montreal, and now within its limits, and also the sum of £10,000 in money, as a foundation for a University. The bequest was accompanied with the condition that the University should be erected within ten years from his death; and with a natural desire of associating his memory with the Institution founded by his liberality, he enjoined that one of the Colleges should bear his own name of McGill. The Will, however, in so far as the legacy was concerned, was contested by his residuary Legatees, and an obstinate and protracted litigation of some sixteen years was interposed between the benevolence of the founder and the benefit which the foundation was designed to confer. At length, however, in 1829, the Estate of Burnside was recoverd from the residuary Legatees, and in 1835, judgment was rendered against them by the Privy Council for the Legacy of $40,000, with the interest, amounting to $88,000. The condition of the bequest that the University should be erected within ten years had been previously complied with, by obtaining the grant of a Royal Charter, for that purpose, in 1821. The next step towards giving to the University a practical operation, was the establishment of the Medical Faculty in 1829, which, with the interruption of only two years, has ever since continued in active operation. In 1835, the rev Dr. Bethune was appointed Principal of the University, and after some unsuccesful efforts to obtain a change of the very imperfect constitution established by the Charter, and the consumption of much time from misunderstandings between the Governors of the University under that Charter, and the Royal Institution for the Advancement of Learning which held all the funds, it was at length agreed upon, that buildings for the uses of the University should be erected; and accordingly those now standing on the west side of Sherbrooke street, were commenced in 1839. The sum expended upon them was $60,000, and although still in an unfinished state, yet they were sufficiently completed for the reception of Students in 1843. In the latter year statutes were framed for the Government of the College, and a Chair of divinity and two Professorships in the Faculty of Arts were established, and with this addition to the already established Faculty of medicine, the College was formally opened on 7th of September of that year. The Institution thus started was not successful. Its condition at length attracted attention, and in 1850, the Provincial Government was moved by a number of public spirited gentlemen to aid in an endeavor to place it on a better footing. As a strong antagonism had always existed between the Royal Institution, and the majority of the Governors of the College upon subjects essentially affecting its conduct and prosperity, it was deemed advisable as a first step, to re-construct the former Corporation. New appointments were therefore made to the Royal Institution, of persons selected on the score of their interest in the cause of Education. Of those, several entered upon the duties of their office with zeal and energy. They drew up an elaborate report on the condition of the University, and the course which they thought should be followed for its amelioration, and their recommendations were made the basis of all that has since been done. A draft of a new Charter was prepared, which was finally adopted, and executed by Her Majesty in 1852—the most prominent and important provision of which is that the members of the Royal Institution for the Advancement of Learning, are made Governors, ex-officio, of the University.

The corporation of the University now consists of the Governors, Principal and Fellows—three of the latter being elected by the convocation, and act as its representatives in managing the affairs of the University. Under its present government, McGill College has greatly improved. An appeal lately made to the public of Lower Canada for its permanent endowment, has resulted, so far, in the formation of a fund of nearly $52,000 —$20,000 of which was subscribed by the Messrs. Molson, for the endowment of "the Molson Professorship of History and English Literature."

The course of instruction in Arts is as follows:

First Year.—Classics, modern languages, English literature, mathematics, algebra, history.

Second Year.—Classics, modern languages, logic, higher mathematics, algebra, history.

Third Year.—Classics modern languages, mental and moral philosophy, calculus, natural philosophy, chemistry.—*Optional Studies*—Hebrew, commercial law, agriculture, engineering.

Fourth Year—Modern languages, rhetoric, natural philosophy and astronomy, natural history.—*Optional Studies*—Hebrew, commercial law, agriculture, engineering.

In Medicine, instruction is given in each branch specified in the requirements. The Lectures in the Faculty of Law comprise every branch of legal study, but special reference is made to Roman jurisprudence as the groundwork of many of the departments of the Law of Lower Canada. The High School Department is intended to provide a liberal education for those designed for business or professions, or who may wish to prepare for entrance into the College.

In the Medical Library there are 2,536 volumes, and in the Arts Library about 1,500. The Museum and Apparatus of both faculties are worth about $5,200.

UNIVERSITY OF BISHOP'S COLLEGE.—LENNOXVILLE.

This University had its origin in the pressing want of a Theological school for educating candidates for the Ministry of the United Church of England and Ireland, in Lower Canada. But it having appeared that to educate them thoroughly there was need of a large amount of means, it was determined to push the effort a little further, and to erect and endow a place of general education. Accordingly, in 1843, measures were adopted and an Act of incorporation obtained (7 Vict. c. 49), for carrying these objects into effect; and in September, 1845, the College was opened in temporary buildings obtained for that pupose until the completion of its own —to which it was transferred in October of the following year. In 1853 the College became a University by a Royal Charter and was empowered to confer degrees "in the several Arts, and the Faculties of Divinity, Law and Medicine;" and held its first public meeting of Convocation for that purpose on the 7th October, 1854.

By the Charter, it is provided that "the Chancellor, Vice Chancellor, Principal and Professors of the said College, and all persons admitted therein to the degree of Master of Arts, or to any degree in Divinity, Law or Medicine, who shall pay the sum of twenty shillings a year towards the support of the College, shall be members of the Convocation of the said University, and as such shall possess all the powers and privileges in regard to conferring degrees, and other matters as are provided by the regulations of said College." These powers are —to elect the Chancellor and Vice Chancellor; confer all degrees, and prescribe the subjects and standard of examination therefore; appoint, on recommendation of the College Council, examiners (who shall be M.A.'s) to act with the professors of the College, so that each subject shall come under the notice of at least two examiners; and to do such other acts as are consistent with the law, the charter, and the regulations of the College.

The religious tests and exercises prescribed by the regulations, are: that all members of the College shall attend morning and evening service each week day in the College chapel, and on Sunday in St. George's church, Lennoxville; but such students as are not members of the Church of England are not required to attend this latter service, but the service of the church to which their parents or guardians belong. There is no test specified as necessary on taking a degree.

The endowment of the University is derived from private sources, and donations from the Societies for Promoting Christian Knowledge, and for Propagating the Gospel in Foreign Parts. It has also an annual Parliamentary Grant. There are two "Jubilee scholarships" of the value of $140 per annum, tenable for three years each. The expense of residence to students for the academic year (40 weeks) is from $100 to $180.

Total number of Newspapers and Periodicals published in Canada in 1857, - - - - - - - - 243

At the request of many friends and others who take an interest in the condition and progress of our local Journalism, the Publisher of the CANADA DIRECTORY has caused the foregoing Statistical List to be prepared, which exhibits the actual state of the Newspaper and Periodical Press of the Province in the present year. The information has been drawn up with great care. Neither labor nor expense have been spared to secure the most scrupulous accuracy; and it is now submitted to the public, in the confident hope and belief that it will be found not only substantially but literally correct.

The information itself should prove alike suggestive and instructive. It encourages the belief that the moral and intellectual advancement of the Province has kept pace with its material and political progress, and it inculcates very earnestly upon all, the duty and necessity of adopting such measures as may best preserve the character and extend the usefulness of the Periodical Press of Canada.

It will be neither uninteresting nor out of place to compare the present with the past condition of our Periodical Literature. No better index can, in the opinion of the Publisher, be found by which to determine the progress of the Province in wealth and intelligence, than that which is afforded in the facts which this enquiry will supply. A period of scarcely more than forty years has elapsed since there were published within the Province only six Newspapers, five in Lower and one in Upper Canada; now, as the foregoing List will show, there are printed within the same territorial limits nearly two hundred and fifty Newspapers and Periodicals. When, too, it is borne in mind, that formerly a Newspaper was published but once a week, and had but a limited circulation, and that now these Journals are issued daily and tri-weekly, as well as semi-weekly and weekly, it is difficult to exaggerate the importance of the conclusions at which we must thence arrive, either as they bear upon the increased intelligence, or the increased wealth of our people. Indeed the opinion may be confidently advanced, that in no country can there be produced a parallel to that which Canada affords of the history and character of its Newspaper Literature. In variety of information and in moral sentiment it will compare favorably with the press of any other land; while, through the unexampled liberality and cordial co-operation of the Legislature, carried into effect by the untiring exertions of the Post Office Department, it has been enabled to find free access to the homes of our people, and has thus brought to the door of the most humble, without cost for postage, a blessing which is regarded as belonging exclusively to the luxuries of the old world.

The Publisher may be excused for expressing the hope, that time and experience will tend still more to raise the tone and increase the usefulness of our Periodical Press, and that this engine of mighty power, under the control of able and highminded men, may continue to diffuse the benefits of enlightened instruction and pure knowledge throughout the length and breadth of this noble Province of United Canada.

GRAND TRUNK RAILWAY OF CANADA.

In the fall of 1852 the Grand Trunk Railway scheme was fairly launched into existence, and embraced in its ramifications the construction of a continuous line of Railway from Trois Pistoles, about 150 miles below Quebec, on the southern side of the River St. Lawrence—the point at which a junction with the proposed Halifax Railway is looked forward to—and Port Sarnia on Lake Huron, a distance of upward of 800 miles; a branch, line of 50 miles in length, from Belleville to Peterborough; and the leasing of the Railroad then already built between Montreal and Portland, so that the products of the western points of the Province might be conveyed through Canada to the Atlantic seaboard without break of gauge or bulk. The total length of unbroken Railway communication which will thus be obtained, when the St. Lawrence River is spanned by the Victoria Bridge, a structure unequalled in the history of engineering, either in size or in massive proportions, is upwards of eleven hundred miles. The original capital of the Company was £2,500,000; but this being found insufficient, it was determined to increase this amount to £12,900,000 sterling. Of this sum the Province has an interest in the undertaking in the shape of a guarantee, to the amount of £3,111,500 sterling, the interest on which the Legislature of last session generously resolved to meet until the shareholders derived 6 per cent. upon their investment. Therefore, deducting also the sum of £2,623,550, the amount unissued and extinguished, the capital of this great enterprise subject to interest may be stated to be now only £7,165,000. Of the works proposed, however, it was found necessary, from several causes, to place in abeyance the prosecution of three different sections of the work, viz., the distance between St. Thomas to Trois Pistoles, 100 miles; from Belleville to Peterborough, 50 miles; and from St. Mary's to Sarnia, 68 miles. But the works between Stratford and Sarnia, and St. Mary's and London, on the west, and on the section east of St. Thomas as far as Rivière du Loup, have lately been proceeded with, and will be opened without further delay; the Lower Provinces will in all probability, assisted by the Imperial Government, complete their Railway communication to Trois Pistoles, in order to connect it with the Canadian. In respect to the other sections of the work, the increasing traffic of the country will no doubt very speedily demand the construction of these lines.

The Grand Trunk Railway will therefore shortly be composed of the following sections, viz.:—

Montreal to Portland	202	miles.
Richmond to Point Levi, opposite Quebec, and to St. Thomas	144	"
Montreal to Toronto	334	"
Toronto to Stratford	90	"
Stratford to Sarnia	72	"
St. Mary's to London	32	"
St. Thomas to Rivière du Loup	72	"
Making (when the Victoria Bridge is completed) an unbroken Railway communication of	1026	"

It is understood that the Victoria Bridge will be completed in the fall of 1859, or early in 1860. The cost of this structure was originally estimated at £1,450,000; but this sum has since been reduced, and the present calculation of its probable cost is about £1,250,000. The iron superstructure will be supported on 24 piers and two abutments; the centre span being 330 feet, and the 12 spans on each side of the centre 242 feet each, which is also the length of each abutment. The extreme length including abutments will be 7060 feet; the height above summer water level in the centre opening will be 60 feet, descending to either end at the rate of 1 in 130. The contents of the masonry will be three millions of cubic feet, the weight of iron in the tubes 8000 tons. The following are the dimensions of the tube through which the trains will pass in the middle span, viz., 22 feet high, 16 feet wide; at the extreme ends 19 feet high, 16 feet wide. The total length from river bank to river bank will be 10,284 feet, or about 50 yards less than two English miles. This gigantic structure when in successful operation will prove a world's wonder, as well as a vast and fruitful effort of Canadian enterprise.

The works throughout the whole of this great length of line have been pronounced by competent authorities, both English and American, to be altogether unequalled by any Railway on this continent, and reflect much credit, not only on the engineer of the Company, but also on the several Agents of the Contractors, Messrs. Peto, Brassey, Betts & Co., who have conducted them to so successful a completion. On an average there is a station to every six miles, 2 men to every 3 miles, and a locomotive to every 4 miles.

The average running time between Montreal and Toronto is about eleven hours, from Montreal to Portland about ten hours, and from Montreal to Quebec five hours; so that the journey between Montreal and Chicago can be easily accomplished in about 36 hours.

Apart from the through travel between the East and the West, which late returns show to be constantly increasing, the several junctions between other Railways and the Grand Trunk Railway are very important, and must ultimately provide a heavy traffic. They are as follows:—

At *Prescott*, 112 miles from Montreal, it connects with the Ottawa and Prescott Railway, 54 miles in length to Ottawa City, affording by the junction there, the benefit of a continuous Railway connection from east and west thereto.

At *Belleville*, with the Grand Trunk Branch, 50 miles in length to Peterborough. The works on this line are however delayed for the present.

At *Cobourg*, with the Cobourg and Peterborough Railway, 28 miles in length to the Town of Peterborough.

At *Port Hope*, with the Port Hope and Lindsay Railway, 41 miles in length.

At *Toronto*, with the Ontario, Simcoe and Huron Railroad, to Barrie and Collingwood, 93 miles; and arrangements are now making for a regular line of propellers between the latter port and Chicago, calling at intermediate ports on Lake Michigan. It connects also at Toronto with the Toronto and Hamilton branch of the Great Western Railway to Hamilton.

At *Guelph*, with the Galt and Guelph branch of the Great Western Railway.

At *Stratford*, with the Buffalo, Brantford and Goderich Railway, from which line the Grand Trunk will collect at this point all the traffic, intended for Canada and Portland, from Lakes Huron and Superior. This road it is expected will be in full operation early next year.

Besides these, other connections are projected, viz., at *Montreal, Vaudreuil, Brockville* and *St. Mary's*; the two latter will probably be in operation in about two years from the present time.

The Grand Trunk Railway Company have completed arrangements whereby passengers and goods can be booked through from all points in Europe to any place along the lines of the Grand Trunk and Great Western Railways, and the Railways connecting with them to the Valley of the Mississippi, and in fact to all the chief places on this Continent. By making one payment in Britain, tickets will be issued for any of these places. No further charges will be incurred for passing goods at Portland or Quebec, but a fee of 2s. 6d. per package. Especial arrangements have been made for emigrants, so that tickets for extra baggage and all other charges can be had from the place of departure to the place of destination; and it is worthy of remark that the large number of emigrants who last season availed themselves of this means of inland conveyance very generally expressed their gratification at the efficiency of the management.

These important changes tend no doubt to attract the westward travel from Europe to the Canadian route, by which an emigrant can be conveyed without change of carriage from Quebec to the ferry at Detroit, if his destination be further west than that point. At present, and until the Victoria bridge be completed, the cars are conveyed across the St. Lawrence between Longueuil and Montreal.

From this brief sketch of the Grand Provincial Railway of Canada and its extended connections, it will be seen that this Province can compare very favorably, the difference of population being considered, with any of the most flourishing States of the adjoining Republic.

COBOURG AND PETERBOROUGH RAILWAY COMPANY

The Cobourg and Peterborough Railway was constructed chiefly to facilitate the transport of lumber, flour, &c., from the back country of the County Peterborough to the shore of Lake Ontario and to the Grand Trunk Railway, with which it connects at Cobourg; and its proprietors have the power of extending it to Marmora Iron Works, which promise a capability of manufacturing ere long a large amount of that metal, for the transport of which to the Lake Shore, for shipment, other lines of railway have been projected and strenuously advocated by their respective partizans. The present railway, 28 miles in length, cost in construction to 31st December, 1856 ..... $980,172.87
And there was disbursed for right of way 51,507.10

$1,031,679.97

There was received for freight, passengers and mail service from 1st March to 31st December, 1856 ..... $67,133.53
And disbursed for operating the road during the same period 37,817.42

Affording a balance, in ten months, for general purposes, of $29,316.11

The business of the road was:—

Number of passengers	15,364	
Freight, lumber	15,634,247	feet.
" wheat	58,762	bushels.
" flour	31,586	barrels.

CUSTOMS REGULATIONS FOR RAILROADS.

All railroad companies having a line, or lines of railway, crossing the Provincial boundary, or which have a terminus at or near such boundary, or that have a terminus upon the border of any of the navigable waters of the Province, shall be allowed to transport goods along their respective lines without such goods being detained at frontier ports for the purpose of being examined and entered at the Custom house, or without their being detained until frontier bonds are executed, upon such railroad companies complying with and conforming to the Rules and Regulations following:—

1. All such railroad companies shall provide proper wharfs, secure and commodious warehouses and other premises, at every "port of entry" or "way-port" in connection with such railroads, for the landing, storing and forwarding of all foreign goods in transit, whether dutiable or free, with other suitable office accommodation for the officer of Customs in charge. These wharfs, warehouses and premises to be made secure to the satisfaction of the Customs department, and in the manner set forth by Regulation No. 12 for Queen's Warehouses, 30th March, 1850; and until such wharfs, warehouses and premises, be provided for Customs purposes, and shall be approved and accepted (of which due notice will be given by the Department), the goods intended to be forwarded to any such ports shall be subject to be detained until all the formalities of law prescribed in relation to importations, generally, shall have been fulfilled.

2. All goods arriving from the United States of America by water, for transit by railroad through any part of Canada to a Canadian port, thence to be transhipped to the United States shall be reported inwards on arrival by triplicate reports, as per form of document marked R. R. M. No. 1, denominating "goods" the contents of which are not known, as merchandise, in number of packages, as hogsheads, casks, barrels, cases, boxes, bales, trusses, &c., &c., but giving the denomination of goods when known, as sugar, tea, tobacco, &c., &c., but the names of the consignees and especial marks and numbers may be dispensed with.

One of such reports inwards duly certified shall be placed under cover and forwarded along with the goods to the officer of customs in charge at the port of transhipment, who will see that all such goods are immediately put on board the vessel or vessels intended to convey them to a foreign port, or placed in the Queen's warehouse, as provided for in section No. 1 of these Regulations.

3. Such railroad companies shall provide and appropriate a certain number of freight cars, specially designated "through cars," for goods in transit from one frontier port to another, and the name of such ports shall be legibly and conspicuously exhibited upon the said freight cars.

4. Such freight cars shall be provided with the means of securing all goods in transit by spring padlocks or other locks of the best description, subject to the approval of the Department, and the keys of such locks shall be in the keeping of the different Customs Officers only, and such cars must go through from the port of arrival in Canada to the port of exit designated by one continuous route; and no transfer of goods shall be permitted at any intermediate port, except in case of any accident occurring in the course of transit that would render such transfer unavoidable.

5. All locks and fastenings required for such freight cars shall be provided by and at the expense of the different railroad companies, under the approval of the Department.

6. Goods arriving at any lake or river port, in the manner and form hereinbefore mentioned, for transhipment to different ports in the United States, shall be reported outwards in duplicate, as per form document marked R. R. M. No. 2, separately describing the goods destined for each port; one of which reports outwards shall be given to the master of the vessel when he takes his clearance, for the purpose of obtaining the signature of the United States customs officer, certifying, that such goods were landed in the United States, and such verified report outwards shall forthwith be returned to the Officer of Customs in charge at the port of transhipment in Canada, and there be placed on file.

7. All imports coming into the hands of the railroad companies giving bonds, and addressed to any out-port or railroad way-port where a customs officer is appointed, may be forwarded through from the port of arrival direct, in suitable freight cars, secured by lock and under a Way manifest, as per form of document marked R. R. M. No. 3, in duplicate, to the port of destination.

The manifest of each "way-port" to be signed by the Collector, Surveyor, or other proper officer appointed at the port of arrival, and forwarded under cover, along with the goods, to each respective way-port officer, whose duty it shall be to receive such goods, and certify the correctness of their delivery by returning one of the duplicate manifests duly certified, and which manifest shall be filed in the Custom house, at the port of arrival, as a voucher. It shall be the duty of the railroad companies to cause the immediate delivery of all such "way manifests" to the Officers of Customs on arrival.

8. Goods forwarded under bond, as provided by 10 and 11 Vict. cap. 31, sect. 24, shall moreover be manifested as above, and shall be legibly marked at the port of arrival with red coloring matter, as provided in Section 7 of Regulations for the Inland Navigation.

Goods entered for duty at the port of arrival, and forthwith forwarded to any port of destination by railroad, shall be marked agreeably with the instructions given to such ports, to prevent detention on the way.

The landing of goods after the regular Customs hours can only be permitted upon application being made to the Collector or other proper officer for that purpose, whose duty it will be to make such arrangements as will meet the emergency; and the railroad officials will be required promptly to discharge all goods under lock in preference to the other goods, and to store the same to the satisfaction of the officer in charge.

9. In order to avoid detention at frontier ports from which goods conveyed by railroad are directly exported to the United States, as also to afford correct returns of Exports at such frontier ports repectively, station masters or freight agents at way stations, or others at which goods may be laden for exportation by railroads, shall be instructed to forward to the chief freight agent at each frontier station or terminus from whence the exportation is to be directly made, a manifest outwards in the form marked R. R. M. No. 4; and the chief freight agent at such frontier railroad terminus shall certify or declare to the correctness of the different way-reports or manifests outwards, before the Collector or other proper officer, as by law required for the entry of goods outwards. Such way-reports to apply to Canadian exports only, and not to goods merely passing through Canada in transit.

10. The liability of each of the railroad companies shall be secured by a bond in the nature of a general frontier bond, to be duly executed for the amount of twenty thousand pounds, for the due and faithful production, at the respective ports of destination in Canada, of all packages passing over such roads in transit and under manifest, and for the general performance and compliance with the foregoing Regulations.

N. B.—The forms hereinbefore referred to will be found in the possession of the Collector of Customs.

CANALS OF CANADA.

As the transport of the commodities required by the imports and exports of a country, and its internal trade, must ever be an important consideration connected with the development of its commerce, the Legislature of Canada has for many years evinced a very lively interest in the perfection of her system of Canals; the more especially as our main staples of exports—lumber, flour, and ashes—are such as to require more than other descriptions of goods the cheapness of water carriage; and that we have a powerful neighbor at present out-rivalling us in a fair contest for the carrying trade from the West—a portion of America that promises to furnish ere long more exports than any other part of the continent. Hence the construction, on our side, of the Welland and St. Lawrence River canals, and the recently projected canal routes to attract by shorter distance the carrying trade of Chicago and other important ports of the West. That projected from Georgian Bay, through Lake Simcoe, to Lake Ontario, has been examined, and it is found that, although a shorter distance than that through Lake Erie and the Welland canal, it presents a serious objection in the great amount (475 feet) of lockage that would be required between the lakes. Reports have also been made upon a route from the head of Lake Huron, through French River, Lake Nipissingue, and the River Ottawa. The completion of this route would probably cost as much as $20,000,000; but several arguments may be adduced in its favor, not the least of which is that vessels could obtain full freights both ways, and thus carry cheaper,—(the want of this desideratum on our present canals greatly tends to reduce their trade below that of the Erie and Oswego canals); while another advantage of the Ottawa route would be that it would save a distance of 439 miles between Chicago and New York, and 481 miles between Chicago and Quebec. With a view to a considerable further development of our system of canals, the Commissioner of Public Works has approved of the construction of a ship canal from Lake St. Louis to the Richelieu River, at an estimated cost of $3,000,000. But there are several very serious considerations essentially belonging to the whole subject, that demand the greatest care and discrimination on the part of our statesmen: thus, for instance, not only should sure provision be made that vessels of a certain size and tonnage be able to pass through the *whole* of our Canadian route, but care be taken, *before incurring any expenditure*, that they

have access to the seaboard at such charges upon the whole as would give them a fair chance of competition with those employed on rival routes; otherwise, our canals would become comparatively useless, and their construction a serious waste of the public revenue.

Although, at present, our canals do not pay the interest of the capital expended in their construction, yet indirectly they confer so great a benefit on the trade of the country as must restrain any regret that this expenditure has been incurred.

To show, at a glance, the importance of future legislation on this subject, we subjoin the following statistics of the carrying trade on the St. Lawrence during 1854 and 1855, the differences observable being chiefly owing to the operation of the United States Bonding Act, which came into effect in 1850, and the Reciprocity Treaty in 1855:—

In 1854 the value of imports by the St. Lawrence was	$21,171,756
Exports	12,501,372
Total value of Trade	$33,673,128
In 1855 the value of imports by the St. Lawrence was	$11,494,028
Exports	6,975,500
Total value of Trade	$18,469,528

During the same years the reciprocal trade with the United States was as follows:—

In 1854 the value of imports from the United States was	$13,553,096
Exports to the United States	18,418,000
Total value of Trade	$24,971,096
In 1855 the value of imports from the United States was	$20,825,432
Exports to the United States	20,002,288
Total value of Trade	$40,827,720

The following Tables are given with a view to afford some general information as to the extent of inland navigation that Canada possesses, and the amount of her carrying trade by this means:

NOTE.—The Lockage from Lake Erie to Montreal is all descending, and amounts as above to 534½ feet. The fall on portions of the St. Lawrence between Lake Ontario and Montreal, not requiring Locks, is 17 feet. The fall from Montreal to tide water at Three Rivers, is 12¾ feet. Making a total fall from Lake Erie to tide water of 564¼ feet.

THE RIDEAU CANAL, from Ottawa to Kingston, was constructed entirely at the expense of the Imperial Government. It was commenced in September, 1826, and the first steamboat passed through it in May, 1832. Length of the canal from Ottawa to Kingston 126¼ miles. Actual excavation 16¼ miles. Number of locks ascending from Ottawa to the Isthmus, 87¼ miles, and overcoming a rise of 292 feet—34 locks. Number of locks descending from the Isthmus to Kingston, 38¾ miles, descent 165 feet—13 locks. Length of locks, 134 feet. Breadth of locks, 33 feet. Depth of water in canal, 5 feet. Breadth of the surface of canal, 75 feet. Total cost of construction, $3,860,000.

STANDING RULES ON THE SUBJECT OF PRIVATE AND LOCAL BILLS.

Adopted by the Legislative Council and Legislative Assembly, 3rd Session 5th Parliament, 20th Victoria, 1857.

1. That all applications for private and local bills for granting to any individual or individuals any exclusive or peculiar rights or privileges whatsoever, or for doing any matter or thing which in its operation would affect the rights or property of other parties, or for making any amendment of a like nature to any former Act, shall require the following notice to be published, viz.:

In Upper Canada.—A notice inserted in the Official Gazette, and in one newspaper published in the county or union of counties affected; or if there be no paper published therein, then in a newspaper in the next nearest county in which a newspaper is published.

In Lower Canada.—A notice inserted in the Official Gazette, in the English and French languages, and in one newspaper in the English and one newspaper in the French language, in the district affected, or in both languages if there be but one paper; or if there be no paper published therein, then (in both languages) in the Official Gazette, and in a paper published in an adjoining district.

Such notices shall be continued in each case for a period of at least two months during the interval of time between the close of the next preceding session and the presentation of the petition.

2. That before any petition praying for leave to bring in a private bill for the erection of a toll-bridge is presented to this House, the person or persons purposing to petition for such bill, shall, upon giving the notice prescribed by the preceding rule, also, at the same time and in the same manner, give a notice in writing, stating the rates which they intend to ask, the extent of the privilege, the height of the arches, the interval between the abutments or piers for the passage of rafts and vessels, and mentioning also whether they purpose to erect a draw bridge or not, and the dimensions of such drawbridge.

3. That the fee payable on the second reading of any private or local bill shall be paid only in the House in which such bill originates, but the disbursements for printing such bill shall be paid in each House.

4. That it shall be the duty of parties seeking the interference of the Legislature in any private or local matter, to file with the Clerk of each House the evidence of their having complied with the Rules and Standing Orders thereof; and that in default of such proof being so furnished as aforesaid, it shall be competent to the Clerk to report in regard to such matter "that the Rules and Standing Orders have not been complied with."

That the foregoing Rules be published in both languages in the Official Gazette, over the signature of the Clerk of each House, weekly, during each recess of Parliament.

J. F. TAYLOR, *Clk. Leg. Council.*
WM. B. LINDSAY, *Clk. Assembly.*

Parties seeking the interference of the Legislature, should simultaneously petition each Branch thereof. One Petition must be addressed to HIS EXCELLENCY THE GOVERNOR GENERAL, one to the HONORABLE THE LEGISLATIVE COUNCIL, and one to the HONORABLE THE LEGISLATIVE ASSEMBLY.

Petitions for Private Bills must be presented to the LEGISLATIVE ASSEMBLY within *fifteen*, and to the LEGISLATIVE COUNCIL within *thirty* days after the commencement of each Session of Parliament.

Petitions proceeding from any number of persons exceeding *three*, must contain at least *three* genuine signatures on the sheet upon which the Petition is written or printed

Petitions from any Corporation must be authenticated by the Seal of such Corporation.

(*a*) This table, the preparation of which cost six weeks' labour, is given by Mr. Burritt in his "Year Book of the Nations for 1856," published in the United States. The figures are here converted into sterling, at the rate of 4s. 2d. for one dollar. The second and third Tables are by the same author, and appeared in the British edition of his Year Book for 1855. The admirable arrangement of these statistics will give an idea of the 50 pages which compose that lucid and comprehensive little work.—"*Business Man's Note Book and Desk Directory,*" *for* 1857. *Published by James Hogg, Edinburgh, Scotland.*

KERBY HOUSE,

BRANTFORD, C. W.

JAMES KERBY, Proprietor, | M. H. WOOSTER, Superintendent.

THE people of Canada are respectfully informed that the above Hotel is open for the reception of Visitors. The house is large and commodious, being capable of accommodating five hundred guests. It is built on the most approved principle, every attention having been paid to its proper ventilation, heating, &c. The Bedrooms are large and airy, and the Parlors, Halls and Passages constructed with a view to the comfort and convenience of travellers. The House is furnished throughout in the best modern style, the upholstery and furniture being of the most splendid and *recherché* description. While the Kerby House possesses all the attributes of a first class Hotel, it will be found also to combine the more genial comforts of a home. Within the Hotel is a splendid Billiard Room, containing two Billiard Tables of the best description.

There is also in connection with the House a magnificent

CONCERT HALL AND BALL-ROOM,

100 by 40 feet, to which the attention of Proprietors and Managers of Exhibitions is respectfully directed. The Hall is well lighted with gas, and can be converted into a Theatre at the shortest notice.

The LARDER and WINE CELLAR of the Kerby House are not inferior to those of any Hotel on the Continent, while the terms are as reasonable.

It is needless to state that BRANTFORD is a large and growing town, containing at present a population approximating to Eight Thousand. It is the County Town of the County of Brant, without exception the finest agricultural county of Upper Canada. The Grand River flows through the town, affording to the Sportsman and Tourist ample means of gratifying their respective tastes, for the scenery on this noble stream is grand and beautiful, while fish of all kinds are found in its waters, and its banks abound with game.

The Buffalo and Lake Huron Railway, which has its principal Depot in Brantford, connects the Town with Buffalo during the season while Water Navigation to Lake Erie is direct, thus affording superior facilities of access from all parts of the United States and Canada at all seasons of the year.

The Proprietor would also state that the Annual Exhibition of the Provincial Agricultural Association for Upper Canada is to be held in Brantford during the autumn of 1857, when he will be prepared to accommodate upwards of **TWO THOUSAND VISITORS,** arrangements being now in progress for that purpose.

FRONTENAC ACADEMY, KINGSTON, C. W.

MR. H. J. BORTHWICK, PRINCIPAL.

MR. H. J. BORTHWICK respectfully announces that the various Classes of this Academy are now open. Having had upwards of fifteen years experience in his profession, he hopes, with the aid of thoroughly qualified Masters, to merit a continuance of public patronage.

Pupils are prepared for Matriculation in the Universities, for examination before the Law Society and other Boards, and for entering with advantage, the Counting House, or other departments of business.

FEES.

50 cts. per qr. extra, for Firewood, Pens, Pencils and Ink.

All Fees must be invariably paid in advance, and each Pupil, before being admitted to any Class, must be provided with a *Ticket of Admission*, issued the day before the beginning of each term. No allowance is made for absence, except in cases of sickness.

TERM DAYS FOR 1857-58.

Summer Term	August 3rd.	Winter Term	January 4th.
Autumn Term	October 19th.	Spring Term	March 22nd.

The Classes in the Commercial Department, Book-Keeping, Arithmetic, &c., are taught exclusively, according to the Decimal System of Currency, thus giving Pupils an opportunity of being thoroughly initiated in that mode of reckoning, previous to its universal adoption in the Province. With the same view, Mr. Moffat, Teacher of the Commercial Branches in the Academy, and a Practical Book Keeper, has opened an Evening Class for the benefit of young men engaged during the day.

Parents wishing private tuition in the evening, or young men desirous of improving themselves in the various branches of knowledge, can be accommodated by applying to the Principal, or Masters. On the opening of the Medical Classes of Queen's College, MR. MAY will be prepared to give instruction in the Classical knowledge necessary for that Department.

For the accomodation of Pupils from a distance, the Principal, first English and French Masters will receive a few Boarders, to whose improvement, in all respects, the utmost attention will be paid. Circular Patent Double Blast. **Longshape.** **Portable Forge.**

CHARLES LINDLEY,

FIRST-PRIZE CIRCULAR PATENT, LONGSHAPE, AND PORTABLE FORGE BELLOWS MANUFACTURER,

ESTABLISHED IN 1844,

From the celebrated firm of Thomas Lindley & Sons, Sheffield, England.

BEGS leave to offer his most sincere thanks to his numerous friends and customers in general for the liberal encouragement that they have given him ever since he commenced business in this City; and he hopes by his strict attention and punctuality to business, to receive a share of public patronage.

Circular Patent Bellows possess the following highly important advantages:—They stand in half the room that Long Bellows do. They effect a positive saving of full twenty per cent. in fuel. Every stroke of the lever produces a double quantity and force of blast. They support a discharging pipe of double capacity. Iron or Steel is brought into a state of fusion in two thirds of the usual time. They are fitted up complete, ready for work, with flexible pipe and portable lever, as per drawing.

Portable Forges, under especial patronage, for Engineers, Boiler Makers, Machinists, Railway Companies, Dock-Yards, Steamships, &c., possess the following highly important advantages:—They stand in half the room that Portable Forges usually do, and are not more than half their weight. They surpass all others in compactness and portability, and ease with which they are worked. They combine simplicity in construction, and therefor enot liable to be out of repair. They are made solely of wrought-iron, which prevents their being damaged either by carriage or use.

The above, with a regular supply of the Longshape Bellows, superior to any imported, are kept constantly on hand, or made to order, at the manufactory, No. 14, BUSBY LANE, at the Entrance of St. Antoine Street. Warranted superior quality.

IS prepared to furnish the most perfect **PLANING, GROOVING, AND TONGUEING MACHINE** that has ever been constructed. The improvements introduced are such as to leave nothing wanting to make

PLANING, GROOVING AND TONGUEING

All to which its known merits so justly entitle it. Having been FOURTEEN YEARS a manufacturer of them, paying the strictest regard to the quality of Gun Metal, Steel and Iron employed on every part of the Machine, and personally working and superintending every piece of work that comes from his Foundry, he confidently asserts that at no Establishment in the United States or the Canadas can so complete and perfect an article be obtained. His Machine obtained the Medal at the Universal Exhibition of 1855.

He is also prepared to furnish IRON and BRASS CASTINGS of every description.

In testimony of the superiority over those of any other manufacturer he would refer to the following gentlemen, who have them in active use; several of whom have made trials of other kinds:—

GREENE & SONS,

PRINCIPAL FUR CAP AND HAT MANUFACTURERS,

WOULD respectfully inform their numerous wholesale customers and others, throughout the Canadas and elsewhere, that they will have manufactured for the Fall Trade, the most varied and extensive assortment of Fur Goods and Hats ever before offered to the public. G. & S. are constantly dressing, coloring, and manufacturing throughout the year, under their own immediate inspection, Mink, Otter, Martin, Fisher, Beaver, Muskrat, &c.—and have constantly on hand a general assortment of Fur Caps, Gloves, Gauntlets, Muffs, Boas, Victorines, Jenny Linds, &c., &c., &c., in the Fur line; and in Hats of the latests fashions and qualities, ranging from 45s. and upwards per dozen.

G. & S. have within the past year added another branch of manufactures to their already extensive Fur and Hat Manufacturing Department, viz: the Buck Skin Mitt and Glove Goods, also, Buck Skin Moccasins; which is the only extensive manufacturing establishment of the kind in Canada.

Owing to the increased demand Messrs. G. & S. have made improvements in all their manufacturing departments, so that they are enabled to supply their numerous customers at lower rates than heretofore, and on terms most liberal. Intending purchasers are requested to call and examine the superior style and finish of our goods, before purchasing elsewhere, which we feel confident will give entire satisfaction.

N.B.—Cash and the highest prices paid for Shipping Furs.

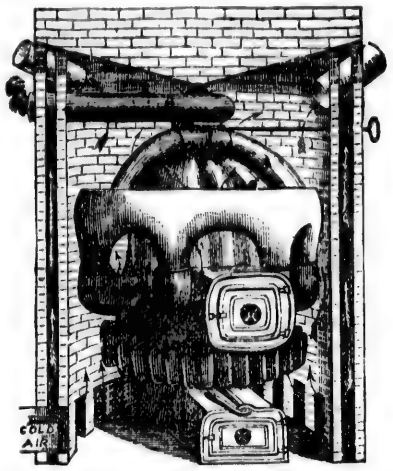
HEAT AND VENTILATION.

Upon Judicious Means of Warming and Ventilating very Important Consequences Depend, not only including the Ordinary Comfort, but Safety, Economy and Health of Human Beings.

WHITE'S **FURNACES**



FOR WOOD OR COAL.

GEO. W. WHITE, successful and practical FURNACE BUILDER, begs to inform ARCHITECTS, BUILDERS, Public Institutions, and the Public generally of this City and vicinity, that he is now prepared to CONTRACT for and GUARANTEE the perfect Warming and Ventilating of Public Institutions, Private Dwellings, &c. &c., by the above Celebrated Furnace. This Furnace is different in many essential particulars from anything ever before offered to the Public; it presents a larger amount of effective Radiating Surface, all of which is in more direct contact with the Fire than any other Heater now in the Market. It is simply and scientifically adapted to Bituminous or Anthracite Coal or Wood; the construction of its Self-Clearing Radiator is an important consideration, as it effectually obviates the necessity of Cleaning. The entire structure, when set, is much less in height than any other of equal capacity in present use, a very desirable item in Low Cellars and for a desired elevation for the Hot Air Pipes.

With these advantages, and long practical experience, he can guarantee to Parties, about to WARM their HOUSES with HOT AIR, to give perfect and entire satisfaction. Mr. WHITE'S system in the erection of Furnaces is substantially safe, and the liability of Fire avoided, and will give a larger amount of Heat with a given quantity of Fuel, circulating the same more rapidly and equally throughout a Building than any other practised in this country; and it only requires to be known to be universally adopted.

He therefore feels confident in having the best improvement in the erection of Hot Air Furnaces ever invented, and believes no one will put up a Furnace on any other plan after an examination of his improvement. Parties who are about erecting or remodelling their Buildings should carefully examine WHITE'S new invention, a Combination of Hot Water and Hot Air, which entirely changes the character of Hot Air Furnaces, developing another and a new principle, and obviating all former objections to their use; this plan is simple in itself, embracing strength, durability and perfect safety to health where Ventilation is practicable. By this plan he will engage to Warm Buildings so as to be as healthy and genial as a summer day.

Mr. WHITE is now prepared to engage to superintend Ventilation on moderate terms. Ventilation will add much to health, economy and safety of Families, and every room can be Ventilated at a trifling cost during their erection.

All CONTRACTS will be strictly attended to and executed with the best possible workmanship.

From Mr. WHITE'S long practical experience and unrivalled success, he can guarantee to give better satisfaction than any other man on this Continent.

WHITE'S and EMERSON'S VENTILATORS for Smoky Chimneys, &c.

PORTABLE FURNACES, HOT AIR STOVES, KITCHEN RANGES, &c., furnished and set.

REGISTERS and VENTILATORS of the best designs and quality at moderate prices.

ORDERS given to, or addressed, GEO. W. WHITE, Montreal, will meet with prompt attention.

ADVANTAGES OF THIS INSTITUTION.

HALF-CREDIT RATES OF PREMIUMS.

Persons assured according to these rates are allowed credit for half the amount of the **first seven annual premiums,** paying interest thereon at the rate of only five per cent. per annum, with the option of paying off the arrears of premiums, at any time, or having the amount deducted from the sum assured when the Policy becomes a claim.

FOR SECURING LOANS AND DEBTS.

A table adopted especially for the securing of Loans and Debts by which the fullest security is obtained on very low, but gradually increasing terms.

Tables 4 and 11, are particularly recommended to the attention of the public. No. 4 is a table of decreasing rates of Premium, on a novel and remarkable plan; the policy holder having the privilege of discontinuing the payment of all further premiums after twenty, fifteen, ten and even five years; and the policy still remaining in force,—in the 1st case, for the full amount originally assured, and in either of the three other cases, for a portion of the same according to a fixed and equitable scale endorsed upon the policy; as mentioned in the Prospectus.

No. II. Circumstances will frequently arise whereby a person having assured his own life for the benefit of a surviving family, or the protection of a creditor, may attain his object by other means, and consequently be desirous of securing for himself the benefit of assurance. To meet such cases this table has been computed, showing the rates required to secure a sum payable at the death of the assured, if he dies before attaining 60 years of age, but also payable to the assured himself if he survives that age; by this means a provision for old age is combined with an assurance upon life.

EXTRACTS FROM THE HALF-CREDIT RATES OF PREMIUM.

Annual Premium required for an Assurance of £100 for the whole Term of Life.

Age.	Half Premium for First Seven Years.	Whole Premium after Seven Years.

Policies revived, without the exaction of a fine, at any time within twelve months, if health remains unimpaired.

Age of the assured in every case admitted in the Policy.

Medical Attendants remunerated in all cases for their Report.

☞Parties insured in this office are permitted to go to Europe in First-class Steamers or Sailing Vessels, without **EXTRA CHARGE.**

SUM ASSURED, IN FORCE AT 25TH MAY, 1856, ONE MILLION SIX HUNDRED AND EIGHTY-EIGHT THOUSAND POUNDS, STERLING.

DIVISION OF PROFITS.

The first Division of the Company's Profits took place as at 25th May, 1854, when a Bonus at the rate of £2 per cent. per annum on all Policies effected in the Participation Scheme of the Company was declared, as shown in the following Table, the examples being Policies of £1000, Sterling:—

" 1853	1000	40	1040
" 1854	1000	20	1020

The additions to Policies of larger or smaller amount are in the same proportion.

Those who do not wish to add the amount of the Bonus to the sum assured, are permitted to take the value of the addition in a present sum.

THE NEXT INVESTIGATION AND DIVISION OF PROFITS WILL BE MADE IN 1859, AND QUINQUENNIALLY THEREAFTER.

From the wide basis on which the Company has been established, from the extensive field of business which it is cultivating, and from the success which has attended its operations, the Directors look forward to large future Profits available to their Policy-holders; and they do not think they over-estimate the advantages of the Company, in stating that no Office has extended its business to the Colonies of Great Britain, affording so many facilities, and at the same time holding out the prospect of so much advantage to Assurers.

This Company does not seek to call attention by the EXTREME lowness of its Premiums, a course much followed by many offices at the present day—though they are as low as is consistent with safety, but would desire to commend itself to those wishing to secure an undoubted family provision by its known respectability and security, a matter frequently lost sight of. They would also point to the large **BONUS,** or addition to the original sum assured, which accrues to Policy-holders—this, at last investigation, amounted to £2 per cent. per annum—thus a Policy taken out in 1847 for £1000, had, in 1854, increased in value to £1160, since which large profits have accumulated.

Amount of Assurances effected since the Establishment of the Company in 1846,.....£2,300,000, Stg.

The Company also grants Assurances on the following plan:—Half of the Annual Premium will be received for the first seven years, the remaining Half, with interest, being chargeable as a debt on the Policy, (without security), to be paid off when convenient, or at the option of the assured, to be deducted at settlement of claim.

Assured are at liberty to pass from any part of North America to Europe, **WITHOUT EXTRA CHARGE.** And the Regulations, as to passing from one part of the World to another, generally, will be found particularly advantageous to persons whom business or pleasure leads to travel, as the premiums are at once decreased on a party leaving a less for that of a more healthy class.

Prospectuses, and full information regarding the Company, may be had on application to Head Office or any of the Agencies.

THE LOCAL DIRECTORS MEET WEEKLY.

☞Agents have been appointed throughout Canada.☜

Montreal, October, 1857.

GREAT BRITAIN

Mutual Life Assurance SOCIETY.

14 Waterloo Place, Pall Mall, London.

The Chisholm, Chairman.

A. R. IRVINE, ESQ., MANAGING DIRECTOR.

THIS Society is established on the tried and approved principle of **MUTUAL ASSURANCE.** The Funds are accumulated for the exclusive benefit of the Policy holders, under their own immediate superintendance and control. The profits are divided annually, and applied in the reduction of the current premiums. Policyholders participate in the profits, after payment of five annual premiums.

The Annual Meeting was held on 28th May last, when an elaborate report of the affairs was presented to the meeting. After a rigid investigation, it satisfactorily ascertained that the state of the Funds was such, that the Policyholders' Allowances might be safely increased during the present year from 31½ to 32½ per cent. While it was clearly shown that, from the extreme care and caution observed in avoiding any undue appropriation of the surplus, such allowance would hereafter, from time to time, be considerably increased.

THE FOLLOWING TABLE EXEMPLIFIES THE EFFECT OF THE PRESENT REDUCTION.

Age when Assured.	Amount Assured.	Annual Premium originally paid.	Allowance of 32½ per cent.	Annual Premium now payable.

D. D. MACKENZIE, ACCOUNTANT AND CASHIER.

THE Montreal Directors sign Policies under special power of Attorney from the Court of Directors in London.

Applicants are not charged for Medical Examination. The Medical Officers attend at the Office daily at 3 o'clock, P. M.

Risks are accepted and Losses paid by the Montreal Local Board without first referring to the London Office.

Special attention is requested to new Tables for the Assurance of Life without Profits, the rates of which are much lower than those formerly in use; and to a Table for the Endowment of Children on highly advantageous terms. Also to a New Table called "Endowment Assurances," by which the assured on attaining the age of 50, 55, 60 *or* 65, *will receive the amount insured himself, or in case of death it will be immediately paid to his representatives.*

The Agency of this Institution differs widely from an *Agency* as commonly conferred by parent Institutions abroad. The General Agent, together with the Local Board, by Power of Attorney executed by the London Court, are fully authorized to act on behalf of the Society, so that for all *practical* purposes this Agency is essentially a *Colonial* Company, strengthened by a large *bona-fide* capital safely invested in London.

Prospectuses and Blanks may be had at the Office in Montreal, or at the Agencies throughout the Province.

MONTREAL BOARD OF DIRECTORS:

J. G. McKENZIE, Esq. | GEORGE MOFFATT, Esq.
DAVID TORRANCE, Esq. | ALEXANDER MORRIS, Esq.

Solicitors, Messrs. TORRANCE & MORRIS.

THIS Association, founded in 1838, has twice received the approval and sanction of the Government—when Incorporated by Royal Charter and afterwards when further empowered by a special Act of Parliament. For some years the average number of new entrants has exceeded **ONE THOUSAND** per annum, being a rate of increase which has been rarely attained by any Life Office. During last year, ending April, 1857, **1158** persons joined the institution, assuring their lives for **£582,000**, Sterling.

The Policyholders are entirely free from the risks of partnership, and the Sums Assured are guaranteed. In addition to the large accumulated and constantly increasing Funds, and the Annual Income of **£125,000**, Sterling, there is a Guarantee Fund or Capital of **£400,000**, Sterling, the Subscribers to which bear the whole responsibility.

The **ASSOCIATION** was constituted with the view of reducing the expense of Life Assurance to the lowest scale consistent with security, and has been eminently successful in attaining that object—principally by the simple, safe and equitable system of dividing the surplus or profits. A share of the profit is annually allocated to each Policyholder of five years' standing, and is handed to him **in money** on the payment of his next Annual Premium. A large reduction of the Premium is thereby effected. Accordingly, Policyholders of the first series, in consequence of their participating in profits, are at present required to pay only **13s. per £1** of their premiums. The Association have allocated profits in every year since 1845.

FIRE DEPARTMENT.

The growing importance of the Fire business cannot fail to prove gratifying to the Proprietors as well as to Friends of the Company. Last year, the premiums reached £186,271 16s. 11d., indicating, pretty clearly, the estimation in which the Company is held; but this year they have attained the much greater sum of £222,279 10s. 6d. Any augmentation of liability, however, the Proprietors will be glad to know, does not arise from an indiscriminate increase in the amount taken on individual buildings, but is caused by a multiplication in the number of such insurances, which adds materially and obviously to the security of the result. The losses amount to £108,306 15s. 10d.; and, in illustration of the last remark, but without wishing it to be understood that a more serious casualty cannot occur, it may be mentioned, that £6,000 will cover the largest loss by one fire.

LIFE DEPARTMENT.

The new business of the past year has again surpassed that of its predecessor. The number of Policies issued is 534, insuring £418,866, on which the premium is £12,770 14s. 11d. The total Income from Premiums is £72,781 15s. 10d.; and, in addition to that sum, £17,338 10s. 10d. have been sunk with the Company in the purchase of Annuities. The claims under Life Policies, have amounted to £28,855 4s.; and the annuities paid to £11,993 2s. 2d. Of the recipients, nine have died, to whom £209 12s. 9d. were annually payable. The balance at the credit of the account is £339,450 5s. 10d.

It may be convenient to the Proprietors to have presented to them in one view the additions which have been made to the various funds, and thus see the extent of advance actually made in the year:—

	1856.		1857.	
The Capital	£170,858 0 0	increased by	£ 4,150 0 0	is now £175,008 0 0
The Reserved Fund	169,150 0 0	" "	11,112 10 0	" 180,262 10 0
The Life Fund	293,557 4 5	" "	45,893 1 5	" 339,450 5 10
The Fire Re-Insurance Fund	82,526 17 5	" "	43,126 9 0	" 125,653 6 5
	£716,092 1 10		104,282 0 5	820,374 1 3

The Board in Montreal being invested with full powers to accept all proposals, renders any delay, in communicating with the Head Office, unnecessary. This arrangement gives to the Canada Branch, all the facilities of a local company, at the same time embracing the advantage of a large guaranteed Home Capital.

Insurances accepted at the lowest remunerative Rates.

THE proprietor of this establishment avails himself of this opportunity to thank the PRINTERS OF CANADA for the liberal support which they have accorded him, and begs most respectfully to solicit a continuance of their patronage.

The Prices of **TYPES AND PRINTERS' MATERIALS** are the same as charged by the TYPE FOUNDERS of the United States, and being in connection with the principal MANUFACTURERS there, he can afford the CANADIAN PRINTER very great facility in the selection and receipt of such articles as are not manufactured here, including the

NEWEST STYLES OF FANCY LETTERS

AND THE LATEST IMPROVED

FAST PRINTING PRESSES.

The PROPRIETOR thanks the PRINTERS of Canada for the praise they have, on so many occasions, bestowed on his Manufactures, and congratulates himself on the success of his efforts in the high reputation of his TYPE for DURABILITY and JUSTIFICATION.

The PRIZE MEDAL of the Exhibition of all Nations awarded to C. T. Palsgrave, and the CANADA DIRECTORY, printed from Type Manufactured at the MONTREAL TYPE FOUNDRY, are sufficient recommendations to the Printers of Canada.

2nd Door from the Ottawa Hotel,

TAKES this opportunity of returning thanks to his Customers and the public generally for their liberal patronage during the last six years, and would solicit their continued support. Now being able to compete with any other establishment in the City as regards PRICE, QUALITY OF GOODS, FITTING, WORKMANSHIP, &c., &c., having just opened a superior assortment of GOODS suitable for the present and coming seasons; selected in the LONDON and PARIS MARKETS. Comprising the following:—

Best West of England Black and Coloured Broad Cloths; Fancy Mixed Angolas, suitable for business and sporting coats; Superfine Black and Coloured Beavers; Black and Coloured Whitneys; Blue and Black Pilots; Best Reversable and Milton Beavers; Black Cassimere and Doeskins; Fancy Tweeds and Doeskins, all shrunk expressly for Pantaloons. A superior assortment of Silk and Woollen Vestings. A quantity of Ready-made Clothing and Waterproof Coats, constantly on hand. Also, Gentlemen's Haberdashery, consisting of Dress and Coloured Shirts, Under Shirts, Gloves, Hose, Ties, Suspenders, and many other articles too numerous to mention.

J. C. guarantees to give a good article, a neat fitting and fashionable garment. In all cases the Establishment is conducted by himself, with the assistance of Mr. GEO. HOGGARD, an able and efficient foreman, of which there is none superior, who attends to the business in his absence.

P.S.—J. C. would remind his customers and others residing in the Upper Province, that all orders sent by letter, stating the Style of Garment, Material, Colour and Price, will be promptly attended to as usual. It would be necessary for parties who have not heretofore had their orders executed in this Establishment, when on their tour through Montreal, to call and have their measure taken, after which there will be no difficulty whatever in making as neat a fit as if they were residents of the city.

OF ANY DIMENSIONS.

Having introduced many improvements highly approved of by the profession, he feels confident that his Instruments will bear a favorable comparison with those of any other maker. Amongst his improvements is the

PATENT OCTAVE COUPLE,

Which doubles all the notes throughout the instrument; and the TUBA, now for the

FIRST TIME INTRODUCED INTO CHURCH ORGANS,

Is a powerful Sub-Bass Stop, introducing great volume of tone to the instrument.

ALSO,

CHURCH HARMONIUMS, WITH 9 AND 11 REGISTERS,

PARLOR ORGANS and MELODEONS constantly on hand.
SECOND-HAND ORGANS for Sale low for Cash.

Photographic Portraits, Ambrotypes, Calotypes,

MINIATURES ON IVORY, &c., &c.

C. DION & Co.,

PHOTOGRAPHIC ARTISTS.

THE Subscribers have entered into Co-partnership under the above title, for the purpose of producing PHOTOGRAPHIC PORTRAITS, Coloured and Plain, on Paper, Glass, Iron, Silk, &c.

They have just received from the hands of "ROSS," of London, a CAMERA capable of taking Portraits of the largest size. This magnificent instrument was made expressly for C. D. & Co., and is the finest on this Continent. With its aid they are enabled to produce Portraits of the highest style of beauty, and which for Clearness, Precision, Distinctness and Beauty of Perspective, can nowhere be surpassed.

The Department of COLOURED PHOTOGRAPHS includes every degree of colouring, from merely tinted pictures, up to the highest degree of finish of Ivory Miniatures. This Department also includes

The Hallotype Process.

The Secret of which, (known only to a few,) C. D. & Co., have secured. This wonderful discovery, the greatest since Daguerre, leaves nothing to be desired in colouring. Not only does it copy the hues of nature, but it preserves the exact texture of the flesh, and the most delicate shadows, and half-tints and contour of the features, which by ordinary Colorists are seriously injured, are hereby retained with the most exquisite fidelity.

☞**Copies made from Daguerreotypes, and highly finished.**

Mr. Parker will still continue to Paint Miniatures on Ivory for those who may desire them.

The Public are respectfully invited to call and examine.

THE Proprietors of this Establishment being PRACTICAL SAW MAKERS, each process in the manufacture is under their personal inspection. Our MILL GANG and CIRCULAR SAWS have been used for the past two years in nearly all parts of the UPPER and LOWER PROVINCES, and are universally acknowledged to be superior to any others before introduced into CANADA.

OUR MACHINE GROUND CIRCULAR SAWS! Warranted to run easier, saw smoother, require less set, and less liable to heat. In fact will saw more lumber with less trouble than any other saws made.

OUR IMPROVED MULAY SINGLE GATE and GANG SAWS! Particularly adapted to the Swedged or Upset Tooth. We have in our possession written statements from some of the largest consumers in Canada, substantiating beyond doubt their good quality. Annexed we name a few for reference, among whom are—

CONSULTING ENGINEER, WALTER SHANLEY, ESQ.

THIS Company is established for the purpose of affording those facilities to the Shipping and general Commerce at the Port of QUEBEC, which the completion of the Grand Trunk Railway, the establishment of Ocean Steamers, and the important and increasing Lake and River Steam traffic must inevitably locate at Quebec, as the great Anglo-Canadian Sea Port.

The Company will provide deep water Wharves for Ocean Ships and Lake and River Craft, with suitable Storeage for Flour, Grain, Ashes, Timber, Iron, Coals, Salt, &c. &c., &c., in immediate communication with the Grand Trunk Railway, on the valuable property already secured by them, situated between the Passengers and Goods Depôts of that Railway, and which will be so laid out as to afford all the security of enclosed Docks and Warehouses.

The acquisition of this property enables the Company to erect at once deep water Wharves, having upwards of *one thousand feet River frontage*, where Vessels of any class can moor in safety out of the influence of the strong tides, and sheltered from the effects of those periodical gales, which so frequently cause damage to shipping on the North side of the St. Lawrence.

Railway turntables and siding to be placed on the Company's property, will enable Goods and Produce to be transferred direct from the Railway Cars and Shipping and *vice versâ*. Steam Elevators, Cranes, &c., &c., will also be provided for the safe, expeditious, and economical loading and unloading of the same.

The site is so advantageous, as to leave no reasonable doubt that the Undertaking will yield a high remunerative return.

Application for Shares will be received at the Offices of the Company, where a plan of the property, with the projected Works and estimates, may be obtained.

DENTISTRY.

MORTIMER D. FRENCH, M.D., D.D.S.,

DENTIST,

DR. FRENCH has the honor of publishing the following recommendations, and also of referring to the following gentlemen:

To the Citizens of Toronto:—I take great pleasure in introducing to the public my friend, M. D. French, M. D., and graduate of the Baltimore College of Dental Surgery. I have been acquainted with Dr. French about five years, a considerable portion of which time he has assisted me in practice. He is a gentleman of irreproachable moral character, a thoroughly educated Dentist, and practically skilled in every department of his profession. I therefore recommend him with entire confidence, to all who may require the services of a Dentist.

CHAPIN A. HARRIS, A.M., M.D., D.D.S.,
Prof. of the Baltimore College of Dental Surgery.

TORONTO, 18th October, 1856.

The best recommendation that I can give of Dr. M. D. French, Surgeon Dentist, is, that he has been employed in this family, and given much satisfaction.

JOHN TORONTO.

GOVERNMENT HOUSE, Toronto, 15th January, 1857.

Dr. M. D. French, Surgeon Dentist, has both extracted and stopped teeth for me, with perfect success, and with less pain to myself than I thought possible.

MESSRS. S. & N., having established an Agency for the sale of LAW BOOKS in Canada, respectfully request a continuance of the patronage of the Legal profession, and beg to draw their attention to the following important LEGAL WORKS, copies of which may be obtained at J. C. GEIKIE'S, at the prices annexed:

Daniell's Chancery Practice—New Edition. By Headlam,

The Practice of the Court of Chancery. Third Edition with considerable alterations, incorporating the Statutes, Cases and Orders to the present time. By T. E. HEADLAM, Esq., M.P., one of Her Majesty's Counsel. In 2 vols. 8vo. 1857. 62s. 6d.

*** **A Volume of Forms to the above, by RICHARD S. TRIPP, Esq., is in the Press.**

"....the work before us is undoubtedly recognised as a standard authority in regard to Chancery Practice."—LAW MAGAZINE AND LAW REVIEW, May, 1857.

"The practice of the Court of Chancery being thus revolutionised, of course all the old books on the subject have been rendered worthless. Hence the necessity of a Third Edition of Daniell's Practice, which has been one of the great authorities. The task has been performed by Mr. Headlam, but, as might be supposed, he has been obliged to do more than the duties of an editor. He has re-written the greater portion of it. In fact, he is its author.

"This Practice must be so well known to the Profession that it is unnecessary to detail the arrangement of its contents. This one has already passed through the ordeal of examination by those most competent to form an opinion—the practitioners who have used it for the purposes of practice. They have so approved it that they have exhausted two editions; and of this third one we can only say that we endorse their approval. It is creditable alike to the knowledge and to the industry of the author-editor."—*Law Times*, March 7, 1857.

Coleman's Chancery Costs—Second Edition, 10s.

Bills of Costs in Chancery of Plaintiff and Defendant, under the Old and New Systems of Taxation: also, Costs on Administration Summons at Chambers, Special Case, Claim, Petitions, (as well ordinary and special as under the Lands Clauses Consolidation Act,) Receivers' Accounts, Conveyancing, and other Proceedings, with an Appendix containing the Order of 30th January, 1857. By E. COLEMAN. Second Edition, in royal 12mo, 1857.

SMITH'S COMPENDIUM OF THE LAW OF REAL AND PERSONAL PROPERTY. 1856.

Connected with Conveyancing, for the use of Students and Practitioners. By JOSIAH WILLIAM SMITH, B.C.L., of Lincoln's Inn, Esq., Barrister-at-Law. 41s. 3d.

PALEY ON THE LAW AND PRACTICE OF SUMMARY CONVICTIONS BY JUSTICES OF THE PEACE. 1856.

Including

Proceedings preliminary and subsequent to Convictions, and under the 18 and 19 Vict. c. 126, relating to Larceny, &c. With Practical Forms and Precedents of Convictions. Fourth Edition. By H. T. J. MACNAMARA, Esq., of Lincoln's Inn, Barrister-at-Law. 32s. 6d.

GREENWOOD'S MANUAL OF CONVEYANCING. 1856.

To which are added,

A Manual of the Practice of Conveyancing, showing the present Practice relating to the Daily Routine of Conveyancing in Solicitors' Offices. Concise Common Forms in Conveyancing Conditions of Sales; Conveyances, and all other Assurances in constant use. 13s. 9d.

SMITH'S MANUAL OF EQUITY JURISPRUDENCE. 1856.

A Manual of Equity Jurisprudence, founded on "Story's Commentaries" and "Spence's Equitable Jurisdiction." Fifth Edition. "A Manual especially adapted to the exigencies of a solicitor's practice."—*Jurist*, No. 465. 16s. 3d.

BURTON ON REAL PROPERTY. 1856.

An Elementary Compendium of the Law of Real Property. By W. H. BURTON, Esq. With Notes showing the Alterations in the Law to the present time; to which is now prefixed an INTRODUCTORY CHAPTER giving a concise historical outline of such parts of the Law as have been the subject of statutory alteration. By EDWARD PRIESTLY COOPER, Esq., of the Middle Temple, Barrister-at-law. 2[illegible]s. 3d.

ARCHBOLD'S (J. F.) PRACTICE OF THE COURT OF QUEEN'S BENCH IN PERSONAL ACTIONS AND EJECTMENT. 1856.

Including

The Practice of the Courts of Common Pleas and Exchequer. By THOMAS CHITTY, Esq. The Ninth Edition. By SAMUEL PRENTICE, Esq., Barrister-at-law. £3 15s.

FORMS OF PRACTICAL PROCEEDINGS IN THE COURTS OF QUEEN'S BENCH, COMMON PLEAS, AND EXCHEQUER OF PLEAS. 1856.

With Notes and Observations thereon. By THOMAS CHITTY, Esq., of the Inner Temple. The Seventh Edition. £2.

STARKIE'S LAW OF EVIDENCE.—NEW EDITION.

A Practical Treatise of the Law of Evidence. By THOMAS STARKIE, Esq. Fourth Edition, with very considerable Alterations and Additions; incorporating the Statutes and Reported Cases to the time of Publication. By G. M. DOWDESWELL and J. G. Malcolm, Esqs., Barristers-at-law. In 1 vol. royal 8vo. 1853. 50s.

SPENCE ON THE EQUITABLE JURISDICTION OF THE COURT OF CHANCERY.

2 vols. royal 8vo. 1846–49. £5 7s. 3d.

FINLASON'S COMMON LAW ACTS.

The Common Law Procedure Acts of 1852 and 1854, with Notes, containing all the cases either already expressly decided on or tending to elucidate them. 12mo. 1855. 22s. 6d.

PETGRAVE'S PRINCIPAL AND AGENT. 1857.

A Manual of the Law of Principal and Agent. By E. C. PETGRAVE. In 12mo. "The author has evidently passed the limit of legal juvenility. He writes, as the preface informs us, for the benefit of persons engaged in actual practice, and aspires to hit the happy medium between the diffuseness of Story and the brevity of Addison or Smith. Mr. PETGRAVE has been tolerably successful in his task; and has grouped his cases round his principles with considerable digestive skill and ingenuity of illustration."—*Jurist*, 9th May, 1857.

"Mr. PETGRAVE has accomplished his design with much ability, placing in the hands of students and practitioners, in a small volume, the essence of the principles of this important branch of the law, very clearly stated so as to be readily understood and remembered."—*Law Times*, 23rd May, 1857.

PRIDEAUX'S PRECEDENTS IN CONVEYANCING;

With dissertations on its Law and Practice. The THIRD EDITION, considerably enlarged and improved.

FIRST PRIZE. **BEVERLY'S** FIRST PRIZE.

ROTARY SHINGLE CUTTER.

Patented 6th May, 1857.

THIS SHINGLE CUTTER having taken the FIRST PRIZE at the Provincial Exhibition, held at Brantford in 1857, surpasses all Machines in use for cutting a Smooth, Uniform and Sound Shingle; and it is admitted by all who inspect the Shingles that they are equal to Shingles made by hand, while its speed of operation challenges competition, cutting from seven to ten thousand Shingles per hour.

Its mechanical construction is remarkable for simplicity, and its durability is far beyond any thing hitherto discovered.

The Inventor solicits a careful inspection of its merits, believing it will meet with universal favor.

GREAT BRITAIN AND IRELAND.

ABERDEEN.—A Royal Burgh and Seaport, County of Aberdeen, Scotland, situated at the mouth of the River Don. It has extensive manufactories of flax, cotton, wool and paper, a very large establishment for preparing granite stone for all sorts of useful and ornamental work, and several manufactories of locomotive engines, as well as a considerable amount of shipbuilding. There is a regular communication by steam between Aberdeen and London, Leith, Inverness, &c. The vessels employed on these stations are all of the finest description, and are the property of joint-stock companies in the City. Aberdeen, besides its Colleges, has numerous benevolent and charitable institutions, including Gordon's hospital for the education of the sons of decayed burgesses, and the Royal infirmary. BELFAST.—A Seaport Town in the County of Antrim. It is the chief seat of the linen trade, which has enabled it to make more rapid progress in wealth and population than any other town in Ireland. Besides the large quantities of flax cultivated in the surrounding country, the large demand for the finer qualities of linen here manufactured necessitates a considerable annual importation of the former article from foreign countries. Steamers ply regularly between Belfast, London, Liverpool, Glasgow, Dublin, and other principal ports. Distant from Dublin 88 miles. Population about 120,000.

BIRMINGHAM.—One of the greatest manufacturing Towns in England, situated in the County of Warwick. It is chiefly celebrated for its manufactures of hardware and steel pens, for immense quantities of imitation jewellery and similar goods, composed of what is called "Birmingham gold," and for polished steel, of excellent workmanship, and completed at prices so low as never fails to excite the astonishment of strangers. Besides the home market that exists for this description of goods, they are largely exported to all parts of the world. Birmingham stands nearly in the centre of England, and has therefore numerous Railway connections, for which there has lately been erected one of the most magnificent stations in the kingdom. Distant from London 112 miles, and from Liverpool 90 miles. Population about 225,000.

DUBLIN.—The Capital of Ireland, in the County of Dublin, and situated on the River Liffey, close to its entrance into Dublin Bay. It is the centre of all the political, ecclesiastical, legal, educational, fiscal, commercial, and military institutions of Ireland. The Liffey divides the town into two nearly equal parts, intersecting it from west to east, and is embanked with granite, lined on both sides with spacious quays, and spanned by nine bridges, seven of stone and two of iron. The City is surrounded by a highway, called the Circular Road, 9 miles in extent, which may be considered its entire circumference. In the centre of the south half of the city is the Castle—an edifice, of different ages, built on an elevated site, and containing an arsenal, armory, the Government offices, and the State apartments of the Lord Lieutenant of Ireland. The modern part of the city is well built, but the other part, lying south of the river, is composed of narrow streets, lined by mean houses. Dublin is decorated with several historical statues. Its University, chartered in 1591, is situated in Trinity College, and possesses a library of 150,000 volumes. The principal exports are linen, cattle, corn, meal, flour, provisions, sheep, hogs, woollen and cotton manufactures, hides, and eggs; imports, colonial produce, tea, timber and wine. The Bay of Dublin is noble and picturesque, and is esteemed one of the finest in the United Kingdom. It is about 7 miles in breadth at its entrance between Howth Head on the north and Kingston on the south, with a lighthouse. The harbor, formerly a very indifferent one, has been lately so much improved that vessels of large burden may now unload at the quays. The Docks connected with the Custom House, on the north side, cover an area of 8 acres, have 16 feet depth of water, and 1,200 yards of quay, with ample stores, and are capable of accommodating 40,000 tons of shipping. The docks on the south side afford commodious wharfage for upwards of 100 sail. Steam packets ply regularly to Holyhead and Liverpool, London, Bristol, Cork, Glasgow, &c.; and by the Grand and Royal Canals, connecting the Liffey with the Shannon, supplies are carried to the interior, and grain, potatoes, &c., brought to the

capital. It is about 135 miles west of Liverpool, and distant from Quebec about 2,435 miles, from Montreal about 2,605 miles and from Toronto about 2,938 miles. The population of Dublin, in 1851, was 254,850.

DUNDEE.—A Royal Burgh in the County of Forfar, Scotland, situated on the Estuary of the Tay. It is the chief seat of the Scotch linen manufacture. The amount of tonnage belonging to the port is over 60,000, the vessels being principally employed in the importation of flax and hemp from the Baltic, Archangel, &c.; besides which a large quantity of jute is brought from London and Liverpool, either coastwise or by railway. The importation of textile materials amounts on an average to considerably over 22,000 tons. These, being first converted into yarns, are manufactured, either by hand or power-loom, into the various fabrics for which this enterprising port is famous. The average annual exportation of canvas, sheetings bagging, &c., amounts to 362,000 pieces, besides that required for home consumption. The principal markets for these goods are North and South America, East and West Indies, Australia, &c. Canada receives a large share, though the importation is only partially direct, a great portion being bought in New York and thence transmitted to Western Canada. Besides the manufactures above alluded to, Dundee contains large and important works in almost every branch of industry: foundries, engine and machine shops, and other similar establishments abound, while it has been long celebrated for the manufacture of gloves, &c. The extensive and elegant docks are the admiration of strangers, and the crowded and busy streets evidently show that a large amount of trade is being carried on; and the tourist will find much to occupy his attention in localities connected with Scottish history. Distant from Edinburgh 49 miles, and from Glasgow 62 miles. Population about 90,000.

EDINBURGH.—The Metropolis of Scotland, situated contiguously to the ancient Town of Leith and the Frith of Forth. Glass painting and staining is executed with much success, and, although the manufactures are not generally extensive, yet Edinburgh is the head quarters of the book trade in Scotland; and as a literary mart it is the second town in the United Kingdom, being in this respect excelled only by London. It is remarkable for the number and magnificence of its hospitals, charitable institutions, and public monuments. These, combined with the general excellence and elegance of the buildings, the striking and romantic appearance of the City itself and the picturesque scenery around it, makes it a place of generally acknowledged beauty; whilst its past history is one of important interest. Distant from Glasgow 42 miles, and from London 333 miles. Population about 158,000.

The "CHRISTIAN TREASURY" is Published in Weekly Numbers, Price 1d., and in Monthly Parts, Price 5d., Stamped for Post, Price 6d.

THE CHRISTIAN TREASURY,

(EDITED BY THE REV. ANDREW CAMERON, EDINBURGH,)

Is well known to many as a Family Periodical for Sabbath reading. Connected with no single denomination it is devoted to the common interests of the various branches of the Church of Christ. It contains in every Part, Practical and Devotional Papers, Biographical and Historical Notices, Narratives and Sketches illustrative of Christian principle and duty, Papers for Parents (especially *Mothers*), for Masters and Servants, for Young Men, and abundant Fragments for the Children. The great object being to combine pleasant variety with solidity, the articles are all short, and the majority of them are in the *narrative* form. Its circulation already numbers

UPWARDS OF 22,000 COPIES MONTHLY,

and is steadily increasing—its subscribers being drawn from all ranks and classes of society. Your attention is respectfully requested to its claims on your support, and to the following warm recommendations of it, given by men whose praise is in all the Churches:—

Recommendations.

From Rev. Thomas Hartwell Horne, B. D., Prebendary of St. Paul's, London.

I congratulate you on the gradually increasing circulation of *The Christian Treasury*. It is, indeed, a "treasury of Christian instruction" expressed in clear, earnest, and affectionate language intelligible by all, and eminently adapted, with the Divine blessing, to interest and edify all classes of its readers. I shall be happy to recommend it wherever I can.

From Canon Stowell.

I can safely and would strongly recommend it for circulation.

From Rev. W. B. Mackenzie, Holloway, London.

I have been for several years a subscriber, a diligent reader, and cordial approver of your vigorous, interesting and spiritually instructive *Christian Treasury*, and often strongly recommend it to others. No periodical is more welcome, perhaps I might add, more profitably read by all the members of my own family than this.

From Rev. J. C. Ryle, Helmingham Rectory, Suffolk.

I have the highest opinion of your valuable periodical, the *Christian Treasury*, and should rejoice to see its circulation largely increased.

The Editor has been most successful in proving that there is common ground on which evangelical Christians can meet, and that of no limited extent; and that there are many subjects in which they can feel a common interest, and these, too, of the highest importance.

Indeed, I look on the *Christian Treasury* as one of the best practical answers to the old Romish assertion, that we Protestants are hopelessly divided. It demonstrates that, although on non-essential points each denomination holds its own, there is still a centre of unity for all true believers, and that they can agree in loving their common Head, and the great truths and doctrines which are necessary to salvation.

From Rev. Dr. Duff, Calcutta.

Catholic without latudinarianism, doctrinal without antinomianism, practical without legalism, devout without mysticism, weighty and solid without dulness, intensely earnest without fanaticism, soundly scholarlike without pedantry, endlessly varied without degenerating into frivolities—the *Christian Treasury*, which I regularly received in Calcutta, was always regarded by me as the perfect model of a religious weekly periodical for the Christian family. What a blessing were it to find admission into every Anglican family throughout the world!

From Rev. Horatius Bonar, D. D., Kelso.

The *Christian Treasury* has secured for itself a good name, not only in Scotland but in other lands. This it owes to the excellent way in which it has been conducted from the beginning. In respect both of matter and tone, it is entitled to rank high among our religious periodicals. Indeed I know not any one so thoroughly pervaded with spirituality, yet at the same time so striking and attractive. It is just the work for *district circulation*. Ministers or visitors of the poor could not light upon a more suitable or useful messenger. It claims a wide circulation; and in thus sowing seed for eternity, it may surely reckon upon the prayers of the Churches, that the reaping may be as wide as the sowing.

From Rev. Dr. Guthrie, Edinburgh.

I have regularly received the *Christian Treasury* since its commencement. I consider it out of sight the best publication of the kind, and I set so high a value upon it, as a most profitable periodical for a family, that I would consider its abandonment a domestic loss. It is conducted with perfect skill and perfect catholicism, presenting every week an endless variety of things new and old, of the most devout, practical and interesting description. I have no hesitation in applying to this periodical an expression which I have sometimes seen very loosely used, and saying, that no family should be without it. My only objection to it is in fact its highest recommendation—it is so entertaining as well as edifying, that there is likely to be strife bred sometimes about who shall have the first reading.

From Rev. Robert S. Candlish, D. D., Edinburgh.

Having referred to the *Christian Treasury*, I may say that, in my opinion, it stands alone among publications of its class. Large as its circulation is, it ought to be increased tenfold. I read it myself every Sabbath morning; and as a periodical for Sabbath reading I deem it above all price.—*Extract from Speech, January* 21, 1857.

Extract Letter from Mr. Duncan Matheson, Soldiers' Missionary.

When in the Crimea, I found the *Christian Treasury* the most acceptable of all periodicals, and the one most sought after.

Upwards of a thousand Clergymen of various evangelical denominations have given their concurrence with the following

General recommendation.

"We have much pleasure in expressing our acquiescence in the opinion already given by many respected brethren with regard to the character and merits of the *Christian Treasury*. We deem it a publication admirably suited for personal and family perusal, and cordially recommend it to the attention of the Members of our Congregations, as a medium of interesting and instructive reading."

GLASGOW.—The principal commercial City in Scotland, situated on a gentle declivity sloping towards the banks of the Clyde, in the County of Lanark. Three large stone and two handsome suspension bridges connect the city proper with the ancient suburb of Gorbals on the left bank. Glasgow has many public buildings of great architectural merit; many of the streets are handsome and spacious; and the new crescents and squares present as beautiful specimens of modern domestic architecture as can be seen. The University is in the Elizabethan style, and dates about the middle of the 17th century. The Cathedral of St. Mungo, a fine old Gothic building, founded in 1136, has a crypt unequalled by any in the kingdom. The Hunterian Museum, the new County buildings, and the Tontine Exchange, are worthy of much attention; but the most magnificent of the public buildings is the Royal Exchange, in the Corinthian style, surmounted by a handsome circular observatory tower having a lofty octostyle portico, three columns in depth, and adorned on the sides by engaged columns, giving the whole building a singularly noble appearance. The Glasgow Gallery of Art and Corporation Hall, purchased from the executors of the late Archibald McLellan, Esq., at an expense of £40,000, constitutes one of the finest suite of rooms and picture galleries in the Kingdom. Glasgow has 96 miles of well-paved streets, lighted by 8,000 gas lamps. The total annual quantity of gas used in the city is nearly 450,000,000 cubic feet, and of water 12,000,000 gallons per diem. Within the last three years, Glasgow has acquired the noble parks and pleasure grounds of Woodside, on the banks of the River Kelvin, which have now become the most fashionable resort of the city. The grounds have been beautifully laid out and decorated from designs by Sir Joseph Paxton, while the summit is surrounded by a quadrangle of beautiful terraces, affording a splendid panoramic view of the far-famed Kelvin Grove and the Vale of Clyde. The Green of Glasgow is a large and beautiful park, comprising 140 acres of smooth, verdant lawn, adorned with rows of noble trees; and the Necropolis, with its terraces of monuments rising one above the other, has a striking appearance, and will compare favorably with the celebrated Père la Chaise. The staple manufactures of Glasgow are cotton, woollen, and silk goods, and iron, with their endless varieties of name, form and purpose; also glass and stoneware. In 1849, 475,000 tons of pig iron were produced and manufactured into land and marine engines, railway wheels, axles, rails, presses, mills, anchors, and innumerable other articles. Glasgow has large potteries, tobacco-pipe manufactories and distilleries. In 1852, over a million of pipes were being manufactured weekly. In the art of embroidering muslins, Glasgow now stands pre-eminent, and in this class of labor her enterprising citizens employ a vast portion of the population, not only of their own country, but also that of Ireland. The annual consumption of coal in this city is calculated at two million tons, which, besides a large quantity exported, is principally derived from her coal pits in the neighbourhood. The harbor below Glasgow bridge is usually crowded with vessels from all parts of the world. The quays lining each side of the river are 10,873 feet in extent, furnished with long ranges of sheds, and capable of accommodating vessels of 1,000 tons burthen. The aggregate tonnage of vessels entering and sailing from this port is over 1,000,000 tons per annum. Besides being the seat of a great amount of trade arising from its native manufactures, Glasgow is a general mart for all the manufactures of Scotland, and most of those of the North of Ireland. It has an extensive foreign and coasting trade, for the accommodation of which, there are numerous and spacious bonded warehouses and granaries, the former in the vicinity of the quays. Distant from Edinburgh 43 miles, from Quebec about 2,770 miles, from Montreal about 2,940 miles, and from Toronto 3,273 miles. Population in 1851, 329,097.

COLLINS'S EDITIONS

OF

FAMILY, PEW, AND POCKET BIBLES.

THE Publisher, in calling attention to his FAMILY, PEW, and POCKET BIBLES, begs respectfully to state that while his object has been to produce First Class Editions, in which distinctness of Type, combined with excellence in the material and workmanship, shall be attained in the highest possible degree, the great advantage which he possesses in having them Printed and Bound on his own premises, and the large and constantly increasing demand for his Editions, enable him to offer them to the Public at Lower Prices than similar works have ever been furnished.

I.

LARGE TYPE FAMILY BIBLE with the Marginal Readings and Parallel Passages printed in full medium, 4to.

II.

LARGE TYPE REFERENCE BIBLE, Royal 8vo, suited for the aged.

III.

LARGE TYPE PEW BIBLE, Demy 8vo. This edition is printed from a very large and beautiful type cut expressly for the purpose.

IV.

THE SELF-EXPLANATORY REFERENCE BIBLE, Medium 8vo. Particular attention is called to this Edition of the Scriptures, in which, for the first time, the Marginal and Parallel Passages are printed at length, thus rendering it a valuable, if not an indispensable, Edition for the diligent Student of Scripture. The size of the volume renders it suitable for the Closet, the Family, or the Pew, while it forms not only a valuable, but most elegant volume for Presentation.

V.

THE MINION REFERENCE BIBLE, Post 8vo. This edition is printed on a large distinct type, and is very suitable for the Family or Church.

VI.

THE RUBY REFERENCE BIBLE, Foolscap 8vo. This Edition is printed on a very distinct type, of a very convenient size for the Pocket, and less than one inch in thickness.

VII.

THE PEARL REFERENCE BIBLE, Royal 24mo. This Edition, although printed with a clear type, is only three quarters of an inch in thickness.

VIII.

THE PEARL REFERENCE BIBLE, with Notes by the Rev. THOMAS SCOTT, Royal 24mo. The Notes will be found useful for Sabbath Scholars. The Marginal References are numerous, and, altogether, this Edition will be found very suitable for Presentation to young persons.

IX.

THE PORTABLE PEW BIBLE, Demy 12mo. This Edition supplies a want which has been long felt, namely, an Edition larger in type than the ordinary School Bible, and yet not so large either in size or price as the usual Pew Bibles.

X.

THE MINION POCKET BIBLE, Royal 24mo. This Edition is printed on a larger sized type than any Pocket Edition hitherto published.

XI.

THE RUBY POCKET BIBLE, Royal 24mo. The size of this Edition very little exceeds that of the ordinary Pocket Bible, while the Type is very large and distinct.

XII.

THE PEARL THREE-COLUMN BIBLE, Foolscap 8vo. This is the thinnest Edition of the Scriptures ever published.

XIII.

THE PEARL POCKET BIBLE, 18mo. Printed on a clear, legible type, and not exceeding three-fourths of an inch in thickness.

XIV.

THE PEARL POCKET BIBLE, 24mo, Cheap Edition.

XV.

THE DIAMOND POCKET BIBLE, Royal 32mo. The type on which this Edition is printed is larger than is generally found in this size of volume, which is the smallest published.

COMMENTARIES.

JUST PUBLISHED, THE PRACTICAL AND DEVOTIONAL FAMILY BIBLE.

THE HOLY BIBLE, according to the Authorized Version with the Marginal Readings and Parallel Passages printed in full and the Commentaries of Henry and Scott, condensed by Rev. John McFarland, LL.D. In one volume Super Royal 4to.

ALSO NEARLY READY,

AN ILLUSTRATED EDITION of the above work with tinted Illustrations of the Lands of the Bible, by David Roberts, R. A., one volume Imperial 4to.

IN THE PRESS.

COLLINS'S CRITICAL AND EXPLANATORY POCKET BIBLE, specially intended for Sabbath School Teachers, Bible Classes and private Christians.
OLD TESTAMENT, Rev. R. Jameson, D.D. NEW TESTAMENT, Rev. Professor Brown.

Now Complete in 50 volumes, Demy 12mo. Price 2s. each, Collins's Series of valuable and Popular Works. This Series will be found very suitable for Congregational, Sunday School, and Lending Libraries.

COLLINS'S ENGRAVED HEADLINE COPY BOOKS.

COLLINS'S THREE-HALF-PENNY HEADLINE COPY BOOK, Foolscap 4to.
COLLINS'S TWO-PENNY HEADLINE COPY BOOK, Foolscap 4to.
COLLINS'S THREE-PENNY HEADLINE COPY BOOK, Foolscap 4to.

In the sale of PRODUCE, we will make it our particular business to seek the best market, and make immediate returns.

Having an extensive knowledge of the London, Manchester, Glasgow, and other British markets, we flatter ourselves that COMMISSIONS TO PURCHASE will be executed to great advantage.

All Goods consigned to our care, for shipment, will be packed and shipped under our immediate inspection. The interest of our constituents will *only* be consulted. No Goods will be *held* over for particular ships, *unless advised to the contrary.* Knowing the advantage of an early market, prompt shipments will in every instance be our aim.

Possessing many channels for bringing before the notice of EMIGRANTS and others, the PUBLIC and PRIVATE WILD and FARM LANDS of CANADA, we will in addition keep an open Register at our Office of all such Lands as are offered for Sale, to which public attention will be constantly directed.

Diligence and promptitude, with moderate charges, will characterise every department of our business.

All kinds of PLUMBERS' TOOLS, and complete assortment of every requisite for the Trade.

SHIPPING TO CANADA

Can for most Goods, such as Earthenware, Wrought Iron and other Tubes, Rolled Metals, &c., in large quantities, be most advantageously arranged from Liverpool. General Parcels of Miscellaneous Goods, also all sorts of Cast Iron Goods are better to be shipped from Glasgow. Sheet Zinc and Spelter can sometimes be cheaply shipped from Stettin and Hamburgh, and thus save the freight to this country—but stock is always kept here of the Sheet Zinc of the "Ohlan" Company in Silesia, for which Wm. Johnston is Sole Agent.

Parties desirous of opening accounts in connection with the Glasgow Tube and Metal Warehouse, will please, with their enquiries about goods, to give a Banker's or other reference, but a reference to parties in this country is most desirable.

NO EXTRA CREDIT WILL BE GIVEN.

No Order for less than 42 dozens—504 lbs—will be executed, but as many different sorts of Twine, if required, may be had to make up an order of 42 dozens.

The most economical way of packing Twine for export is, first to put it up in trusses of seven dozens—84 lbs—wrapped up in single canvas; packing six of such trusses into one bale of 42 dozens, wrapping the bale in double canvas. Our charge for canvas, for a bale of 42 dozens, is 12s.

LIVERPOOL.—A very important Commercial Town, in the County of Lancaster, situated on the right or eastern bank of the River Mersey, about 4 miles from its confluence with the Irish Sea. It is, next to London, the principal seaport of England. It stands partly on flat ground along the margin of the river, and partly on a gentle acclivity. Its length from north to south is 4¾ miles, its greatest breadth a little more than 2½ miles, and its area 5,092¼ acres. In the older parts of the town the streets are narrow and ill-built, but in the more modern portions they are spacious and well-paved, with handsome squares and crescents. The most important public buildings are the Town Hall, an elegant Grecian structure, founded in 1749; the Exchange Buildings, having three interior façades, and an arcaded basement, and surmounted by a range of Corinthian pilasters supporting a handsome cornice and balustrade; the Revenue Buildings, covering an area of 6,709 square yards; St. George's Hall, a magnificent building in the Corinthian style; and the Philharmonic Hall, a noble and spacious building erected by a company of gentlemen for the performance of high class concerts and oratorios. The town has excellent markets. The most remarkable feature of this great seaport is the number and magnificence of its Docks, corresponding with the extent of its vast commerce. They lie along the margin of the river, or between it and the town, most of them being parallel with the Mersey, but some at right angles to it. There are in all 30 docks, and the length of the river wall which fronts them is 5 miles, the total area being 200 acres (179 acres of wet docks and 21 acres of dry basins). The total quay space is 14 miles, and the principal docks are the Huskisson, Prince's, Queen's, and Brunswick. In the value of its foreign exports and the extent of its foreign commerce, Liverpool is the first port in the world. In 1850 the foreign exports amounted to nearly £35,000,000. Cotton forms an important branch of the commerce of Liverpool, 1,748,946 bales being imported in 1851. The town has, since the recent gold discoveries, a great trade in the precious metals. The Irish and coasting trade is also very large. 6,000,000 tons of goods and merchandise pass through this port annually, the shipping employed in transmitting it amounting in 1850 to 6,011,870 tons, Liverpool is the great point of departure for emigrants from Great Britain and Ireland. It is connected by railway with all the principal towns and ports in the kingdom, and its trade is further facilitated by an extensive net work of canals connecting it with the great seats of manufacturing and mining industry. It has regular communication by steam vessels with Glasgow Belfast, Londonderry, Dublin, Cork, Holyhead, and numerous places on the coast of England and Wales; also with Havre, the Mediterranean, New York, Boston, Halifax, Quebec, Montreal, &c. Distant from London 210 miles, from New York 2,980 miles, from Quebec 2,570 miles, from Montreal 2,740 miles, and from Toronto 3,073 miles. Population, in 1851, 375,955.

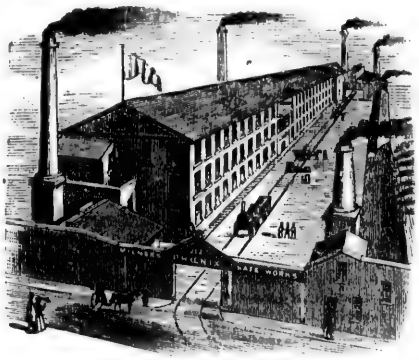
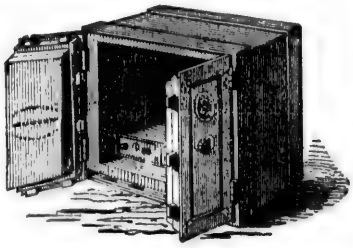
MILNER'S

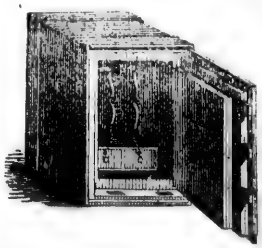
QUADRUPLE PATENT HOLDFAST AND FIRE-RESISTING



SAFES,



The Strongest, Best and Cheapest Safe-Guards in the World against ROBBERY and FIRE.



THESE well-known and well proved articles of universal public approval and adoption,—50,000 of them keep the books and cash of Liverpool, Manchester, Glasgow, Bristol, Belfast, &c.—with all the *real improvements* of the inventors resulting from their large experience and practical acquaintance with their business—who have manufactured more SAFES for the last fourteen years than all the other Safe Makers together—have been publicly tested by scientific and practical men in all the large towns in the United Kingdom. Amongst others by

The Liverpool Polytechnic Society.
The Royal Dublin Society.
The Ashmolean Society, Oxford.
The London & North-Western Railway Company.
Messrs. Ransome & Sims, Ipswich.
" Stratton & Sons, Bristol.
Mr. Rose, and Manchester Fire Brigade.
Mr. Kaye, and Huddersfield Fire Brigade, &c. &c.

MILNER'S SAFES have protected their contents also against FIRE and ROBBERY under the most severe trial in many hundreds of cases similar to those certified below :—

Great Fire in Liverpool, J. B. Blackallar, sail maker and ship chandler.
Fire at Birkenhead, J. & W. Walker's Iron Safe burnt out by the side of Milner's Safe.
Great Fire at the Gutta Percha Company's Works.
Burglary defeated, Bridgewater Trust.
Burglary defeated, Theatre Royal, Manchester.
Fire in Liverpool, Garniss & Co.
Great Fire in Belfast, J. & S. Hunter.
Great Fire in Manchester, Thomas Haigh.
The Great Newcastle Fire, A. Leideman & Co.
Burglary defeated, James Richardson & Co., Glasgow.
Extensive Fire in Manchester, F. H. Thode & Co.
Destructive Fire in Glasgow, Charles Boyd & Co.
Burglary defeated, Amory & Co., Bristol.
Burglary defeated, Butterworth & Brooks.
Burglary defeated, Thomas James, Liverpool.
Great Fire, Minories, London, Coubro & Potter.
Burglary defeated, William Parlane, Liverpool.
Fire at Cape Hayti, W. D. Roberts & Co.
Great Fire in Sheffield, Ward & Payne.
Coventry Station burnt down, J. Norris,
Burglary defeated, S. Gardiner & Son, Liverpool.
Burglary defeated, Saiford, Bremner Brothers and others.

MILNER'S GUNPOWDER-PROOF SOLID LOCKS and DOORS, applied to all Milner's Safes, afford the only security against a Safe being blown open by filling the lock through the key-hole with gunpowder, the method now so generally adopted by burglars in violating Safes. All Milner's Safes of former make, as well as all other Safes, *without their Powder-proof Lock*, are liable to be opened by the plan now used by thieves. The Public are cautioned before buying Safes *called Fire-proof, with Powder-Proof Locks*, to see them well tried by strong fire, and by filling the locks with gunpowder.

MILNERS' PHŒNIX SAFE WORKS, Liverpool, the most extensive and complete in the world, are now undergoing considerable enlargement, so as to enable "THE PHŒNIX" to take ONE THOUSAND WORKMEN under her wings, and doubling the present make. *Open Daily for Public Inspection.*

ROYAL INSURANCE Co.

Royal Insurance Buildings, North John Street, and Dale Street, Liverpool, and 29 Lombard Street, London.

Capital, £2,000,000 in 100,000 Shares of £20 each.

Trustees:

JOHN SHAW LEIGH, Esq. | JOHN NAYLOR, Esq.

Directors, &c., in Liverpool.

CHARLES TURNER, Esq., Chairman, J. BRAMLEY MOORE, Esq., M.P., and RALPH BROCKLEBANK, Esq., Deputy Chairmen.

THE City Article of the *London Times*, of the 24th July last states that the transactions of the Royal Insurance Company "appear to have been of a perfectly satisfactory character." It includes the following statements confirmatory of that opinion:

PREMIUMS.—The Premiums of Nine Offices enumerated are stated to be..... £824,024
Of which the Royal alone amounts to..... 371,057
Being 82 per cent. of the accumulated premiums of the remaining Eight Companies.

EXPENDITURE.—The expenditure of Insurance Co. panies is, at present, attracting the anxious attention of the Public. The statement of "The Times" has elicited the following remarks from a contemporary:—"Here, again, the Royal Insurance Company occupies a position of honorable pre-eminence; for while its expenses of management, spread over a period of three years, *have been less than 20 per cent.*, those of five other offices have varied from 22 to 74 per cent.

RESOURCES.—In like manner the entire Funds in hands of thirteen offices is quoted in "The Times," at £1,238,688, including the "Royal," which alone is £372,304, and which is, therefore, equal to 43 per cent *of the accumulated funds of the remaining twelve offices*; or, to make the VAST RESOURCES of the Company still more manifest, it may be stated that, putting aside the three largest offices named, (the funds of the greatest of which barely exceeds *one-half* of those of the "Royal,") *the united funds of the remaining ten offices do not equal the funds of this Company.*

The following is the result taken from the accounts of the Company for the year 1856:—

Fire Premiums and other receipts	£174,026 13 1
Funds in hand, without including ample Reserve for Life Liabilities, upwards of	£400,000 0 0

LIFE.

LARGE BONUS DECLARED in 1855, amounting to £2 per cent. per annum on the Sum Assured. Being, on ages from Twenty to Forty, 80 per cent. on the Premium. Periods of Division, every Five Years.

The accumulated Expenditure of 54 *Life Offices*, enumerated by *The Times* of 12th August last, compared with their amount of Premium and Interest, is stated to be..... 61 per Cent.
The Expenditure of the Royal Insurance Company is only..... 13 per Cent.

Life Assurances effected before the end of the year will be entitled to an additional year's Bonus.

LONDON.—The Capital of the United Kingdom of Great Britain and Ireland, the first city, and, as it has been well styled, the Metropolis of the World, is situated in the south-east of England, on the River Thames, about 40 miles from its mouth. On the north bank, where the principal part of London stands, the site rises gradually at the rate of 36 feet per mile; while on the opposite bank, the houses cover an extensive flat, lying in some places several feet below the highest tides. The City, strictly so called, is but a small portion of the metropolis; the limits of which, as defined by law, enclose an area of 116 square miles, having in 1851, the period of the last census, a population of 2,361,640. The metropolis includes the cities of London and Westminster, and the Parliamentary boroughs of Tower Hamlets, Southwark, Lambeth, Finsbury, and Marylebone; formerly distinct, but now, with their extensive suburbs, combined into one vast mass of houses. London stands on alluvial deposits, consisting of beds of clay and gravel, below which is the hard clay stratum known to geologists by the name of "London clay." It is considered healthy, as indicated by the low rate of mortality; and will be probably rendered more so by the means which the Legislature has lately taken to cleanse it of its enormous sewerage, amounting to over 10,000,000 cubic feet per diem. A corporate body, created by Parliament for the purpose, is about to carry into effect a plan for regularly draining the sewerage, either to the German Ocean, or to a point in the Thames whence it cannot reflow with the tide; it being at present discharged at all points directly into the river, thereby vitiating the water and the atmosphere, upon the purity of which must depend, in a chief measure, the health of the inhabitants. The metropolis is intersected by long and spacious lines of streets in every direction, the principal leading from East to West, and affording an unbroken line of communication for many miles. Within a short walk of the heart of London are situated Hyde Park, containing about 400 acres, having on the south side a large artificial lake called the Serpentine, which is spanned by a handsome bridge of five arches, and leading to Kensington Gardens, a beautiful park, well wooded and finely laid out; St. James Park, 83 acres in extent, bounded in part by Buckingham Palace, and containing a lake ornamented and studded with islets; the Green Park, 71 acres in extent; Regent's Park, on the North, with an area of 403 acres; Victoria Park in the East; and Battersea Park in the South. These Parks are surrounded for the most part by streets and squares of handsome construction, the town residences of the nobility and merchant princes of England. The Palace of Westminster, a magnificent edifice, in the Tudor Gothic style, containing the Houses of Parliament, covers an area of eight acres, and the façade overlooks the river and is 900 feet in length. It is panelled with rich tracery and profusely decorated with statues and shields of arms of the Kings and Queens of England from the Conquest to the present time. It has three lofty towers, the highest being 75 feet square and rising 340 feet, being supported upon four pointed arches 60 feet in height. The Tower of London, of much historic interest, lies also on the banks of the Thames,—a part of it, the White Tower, having been erected so far back as the year 1078. It contains the regalia of Great Britain, the Wellington Barracks, Queen Elizabeth's Armory, and the church of St. Peter and Vincula, where lie the remains of Edward V., Anne Boleyn, Thomas Cromwell, the Dukes of Somerset and Monmouth, and the decapitated bodies of kings, queens, statesmen and warriors. Westminster Abbey, the Temple Church, the Bank of England, the Royal Exchange, the British Museum, and the Guildhall, are all noteworthy edifices, claiming attention for magnitude, architectural beauty, and in some instances for antiquity. The metropolitan prisons are deserving of remark. Some of them can accommodate 2,000 prisoners, and the discipline is perfect. They differ in their character, some being for debtors, others for criminal offenders sentenced to various terms of imprisonment and to transportation, penal servitude, &c. The Metropolitan termini of the various Railways are colossal buildings, of considerable architectural beauty, and adapted to accommodate a large goods and passenger

LONDON.—(*Continued.*)

traffic. Hence radiate lines of railway to every town in England; and it may shortly be expected that all these termini, now necessarily separated, will be united by a grand metropolitan line. The Thames is crossed in several places by handsome stone and iron bridges, one of which is now in course of reconstruction; and two miles below London bridge is a brick tunnel, an engineering wonder, nearly 1,000 feet in length, constructed entirely under the Thames; and while persons are passing through this tunnel, steamers and other vessels are actually sailing over their heads. It took 18 years to build this magnificent tunnel, which has now been open for some time for foot passengers, who enter it by a cylindrical shaft at either end with 100 steps. London has very extensive docks, with wharves, vaults, and storehouses of gigantic capacity. The trade and manufactures of the metropolis are of such an extensive and varied nature as to preclude the possibility of specific detail here. Here are the largest breweries, distilleries, and manufactories of every description, in the world. Five million tons of shipping annually enter the port of London, whence steamers and other vessels of all kinds leave daily for all parts of the commercial world. London is supplied by 20 companies with 15,000,000 cubic feet of gas per diem, and by 7 water companies with 44,573,979 gallons of water daily. 7,000 public vehicles ply daily in the streets of the metropolis. The city returns four members to Parliament. This necessarily very brief notice of London would be incomplete without a glance at its civil government. The system of police devised some years ago by the late Sir Robert Peel is the most perfect ever yet established. It suffices to protect the capital of the kingdom and to aid in suppressing any provincial disturbance, thus rendering resort to military authority of very rare occurrence. At the same time, especially in its detective branch, it is admirably adapted to repress crime, and to discover its authors when committed. This system was very recently been adopted in Paris as the basis of a new French police. From the heights of some of the lofty buildings in the metropolis may be obtained a panoramic view unequalled of a vast multitude of human beings, portraying to the mind some small idea of the crowded and active population, the unceasing and enormous traffic, the wealth, and the commerce of the "Great World of London." It is distant from Liverpool 210 miles, from Quebec 2,780 miles, from New York 3,190 miles, from Montreal 2,960 miles, and from Toronto 3,293 miles.

Butler's Tasteless Seidlitz Powders,

IN ONE BOTTLE.

THIS USEFUL APERIENT PREPARATION, besides forming an equally efficient and far more agreeable draught than that produced with the common Seidlitz Powders, is made in much less time, and with infinitely less time. To allay Fever or Thirst, a teaspoonful in water forms a most refreshing saline draught. Being inclosed in a bottle, it will remain uninjured by humidity during the longest sea voyage or land journey.

Sold at 2s. 6d. the bottle (which is enclosed in a case, and accompanied by a measure and spoon) by the preparers, BUTLER & HARDING, Chemists, 4, Cheapside, corner of St. Paul's, London.

*** Be careful to ask for "BUTLER'S TASTLESS SEIDLITZ POWDER," and to observe the address.

SARSAPARILLA.

It is asserted by many eminent Medical Men, that there is no Medicine in the Materia Medica comparable to Sarsaparilla for recruiting the debilitated constitution, restoring the tone of the stomach, improving the general state of the system, and by its continued use removing various morbid symptoms ascribed to a deranged condition of the fluids; such as Eruptions on the Skin, Ulcerations, Scorbutic and Cutaneous Diseases, and Rheumatic Pains, operating as a general and complete purifier of the blood. BUTLER'S "COMPOUND CONCENTRATED DECOCTION OR FLUID EXTRACT OF SARSAPARILLA" is the original of the now numerous preparations of the kind, and extensively prescribed by Medical Practitioners; it is most carefully prepared (from the finest Jamaica Sarsaparilla imported) at a low temperature, so as to preserve entirely the virtues of the root in their most efficient and concentrated form. A pint bottle is equal to four quarts of the ordinary preparation.

Prepared and sold in pint bottles, 20s.; half pints, 10s.; and quarter pints, 5s. 6d., by BUTLER & HARDING, Chemists, 4, Cheapside, corner of St. Paul's, London.

WATER POISONED BY LEADEN PIPES.

The above Engraving represents accurately a section of a leaden pipe which was employed for a short time in conveying water from a well on the grounds of Mr. DICK, of Bonchurch, Isle of Wight. The water has cut these deep pits almost through the pipe, and not only upon the portion which we have illustrated, but has formed similar chasms throughout the entire length.—*Expositor.*

POISONED WATER PREVENTABLE BY THE USE OF

GUTTA PERCHA TUBING.

The Gutta Percha Company have been favored with the following Letter from DR. MURRAY, *Hull* :—

"It is impossible to conceive of any thing more injurious or destructive to the health of the community than the use of *leaden pipes* for the conveyance of water. The poisonous salts of lead thereby communicated are most insidious and subtle. I hail with gratitude the substitution of Gutta Percha Tubing. I have had the leaden pipe of my own house removed, and its place supplied with one of Gutta Percha. Nothing can be better. I have also recommended it to others, who have adopted the expedient."

RESISTANCE OF FROST.

The Gutta Percha Company have been favoured with the following Letter in reference to the non-conducting property of Gutta Percha Tubing, in the resistance of frost :—

FROM HENRY BROWN & SONS, WESTERN WORKS, 109, ROCKINGHAM ST., SHEFFIELD.

"We have now a positive proof of the frost-resisting properties of Gutta Percha Piping. On our premises we have a leaden pipe and a Gutta Percha one lying side by side. The leaden one has been completely frozen up at least ten days, and the Gutta Percha one is still unaffected."

Every variety of Gutta Percha Articles, such as Round and Flat Driving Bands, Tubing, Sheet, Soles, Goloshes, Photographic Baths, &c., Curtain and Corvice Rings, Toilette Trays, Talbotype Trays, Galvanic Batteries, Fire Buckets, Pump Buckets, Union Joints, Bosses, Flasks, Bottles, Bowls, &c., &c., &c., Manufactured by the Gutta Percha Company, and sold by their Wholesale Dealers in Town and Country.

MANCHESTER.—The most important manufacturing City in England, and is indeed unequalled by any in the world. It is situated on the Irwell, at the confluence of the Medlock and Irk, in Lancashire. Its great staple article of manufacture and trade is cotton, in the various tissues of which it has taken a decided lead throughout the civilised world, so that the name of the city and its goods have become household words in every country. Manchester is admirably situated both for its manufactures and its commerce: it stands close to one of the most valuable coal-fields in England, at such a convenient distance both from the west and east coasts as to form a natural emporium for the traffic of the Atlantic and German oceans while, in other directions, its railway connections are numerous. Its several literary and scientific institutions are well supported; and among its public schools, Cheetham's is deserving of mention as being one of the most liberally endowed in the kingdom, the benefits of which is exclusively restricted to boys who have lost their fathers, and who are received at a very early age boarded, clothed, educated, and at a proper age apprenticed to a trade. Manchester, a few years since, was constituted a Bishopric, and was very recently deemed of such importance as to be selected for the Art Union Exhibition, which was opened by Prince Albert, in May, 1857. This exhibition, second only to that of the Crystal Palace, contains objects in the several departments of the Fine Arts valued at nearly $40,000,000, and to which Her Majesty has been a liberal contributor. Distance from London 162 miles, and from Liverpool 32 miles. Population (including Salford) about 500,000.

JOHN GIBSON'S

STEAM PLANING, SAWING & WOOD MOULDING MILL,

AND MANUFACTORY OF

WOODWORTH'S PATENT PLANING MACHINES,

AND

CROSBY'S PATENT RE-SAWING MACHINES,

Coner of Water and Spencer Streets, and on the Dock,

ALBANY, N. Y.

PLANING of every description and Re-Sawing with Circular and Vertical Saws done in the best manner, and all Orders attended to with promptness and despatch. A general assortment of all kinds of **DRESSED LUMBER, WOOD-MOULDINGS AND PICKETS** constantly on hand.

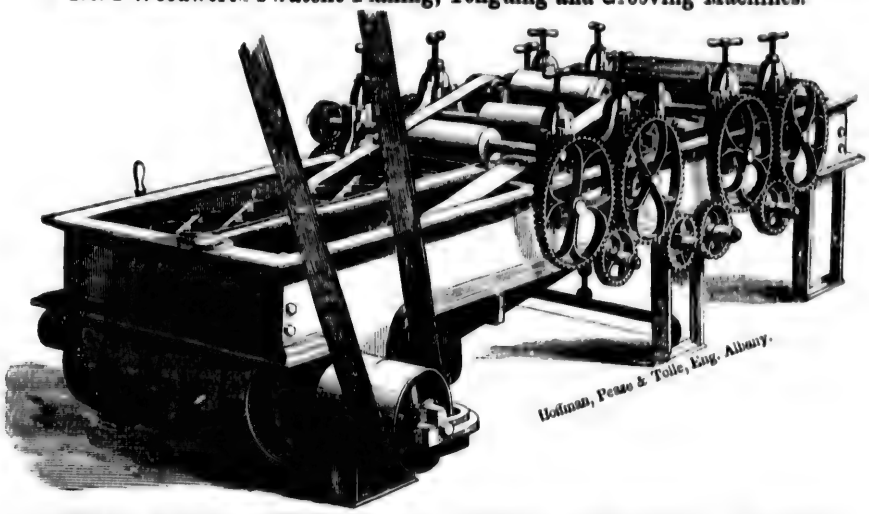
I also manufacture, and have constantly on hand for Sale, **PLANING, TONGUING and GROOVING MACHINES, and SURFACE PLANING MACHINES** of the justly celebrated **WOODWORTH PATENT,** from $150 to $1,500, and **CROSBY'S PATENT, VERTICAL and CIRCULAR RE-SAWING MACHINES,** from $300 to $550.

Having had twenty-five years' experience in the Use and Manufacture of the **Woodworth Planing Machines,** will furnish them of a quality unequalled by any other manufacturer.

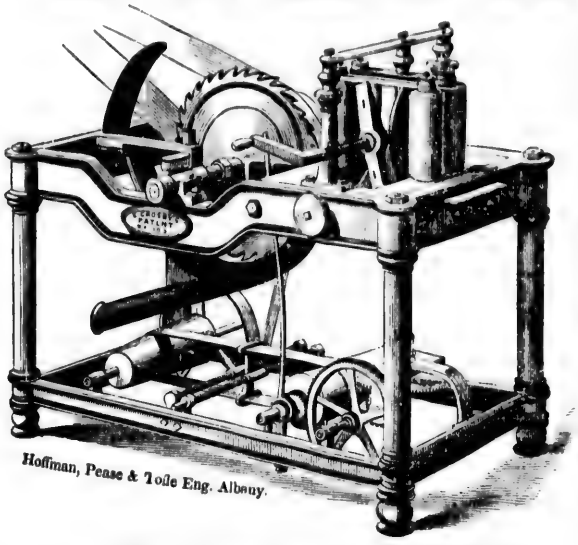
Some of my Machines may be seen in constant operation in the *Planing Mills at Ogdensburgh, Syracuse, Oswego, Niagara Falls, Dunkirk, Montreal, Kingston,* and in almost every City and Town in the United States.

The separate parts of the Planing Machine, namely:—PLANING KNIVES, SIDE-TOOLS, GUNMETAL SIDE CUTTER HEADS, CYLINDERS, &c., on hand and furnished at short notice.

No. 1 Woodworth's Patent Planing, Tonguing and Grooving Machines.



CROSBY'S PATENT CIRCULAR AND VERTICAL RE-SAWING MACHINES.



(Under the Two Letters Patent, of the United States, one granted 8th April, 1851, and which will expire 8th April, 1865, relating to Circular Saws only; and one re-issued 28th April, 1857, and which will expire 3rd November, 1862, relating to both Circular and Up-right Re-Sawing Machines.)

The Subscriber is prepared to **SELL RIGHTS** to use these Unrivalled Machines in all the unoccupied Territory in New York State, and Northern Pennsylvania, and to furnish the Public with these Machines.

Having had ten years' experience in the Use and Manufacture of these Machines, I feel confident that the public appreciate them as the only Machines worthy of the name of a **RE-SAWING MACHINE.**

They are simple in construction, very efficient in operation, and not liable to get out of repair.

One of the **Small Circular Re-Sawing Machines,** embracing the improvements secured by both Patents, (like the above Engraving) now in operation in my Mill at Albany, has

SAWED 3400 CLAPBOARDS, 13 FEET LONG, IN TEN HOURS.

Larger Machines will do more in proportion.

I have also a **Vertical Re-sawing Machine,** embracing the improvements secured by the said Re-issued Letters Patent, in use in my Mill at Albany, which will **saw 30 inches wide, and as thin as one-eighth of an inch, and saw 7000 feet in ten hours.**

CIRCULARS OF PRICES FURNISHED ON APPLICATION.

JOHN GIBSON,
Planing Mills, Albany, N. Y.

Albany, N. Y., October, 1857.

BOSTON, U. S.—The Capital of Massachusetts, and the second commercial City in the United States, is situated principally on a peninsula at the head or western extremity of Massachusetts Bay. It consists of three parts,—Old Boston, on the peninsula; South Boston, on the south side of the harbor; and East Boston, built within the last fifteen years, situated on an island, and communicating with Old Boston by a steam ferry. Boston is attached to the mainland by a wide, handsome natural avenue or isthmus, called the Neck, and by six bridges. The harbor, though having a narrow, difficult entrance, is one of the best in the United States: it has an area of seventy-five square miles, and can give safe accommodation to five hundred large vessels. The tonnage in the year 1840 amounted to 220,243 tons, and has since increased very considerably. The long-voyage trade is largely in the hands of the Boston merchants: out of 175 ships arrived in the United States in 1854 from beyond the Cape of Good Hope, 105 came to this port; of 54 arrived in New York, 14 from China were owned in Boston; while of 76 vessels which arrived in the States from Calcutta, 66 came to Boston. The City is well situated for trade, and is a place of great commerce and opulence. It is one of the principal seats of the American fisheries, and has an immense trade with the West and South. Its imports principally consist of woollen, cotton, linen, and silk manufactures, sugar, coffee, indigo, hemp, and iron; and its exports of fish, fish oils, salted meat, flour, soap, candles, and ice,—the latter having recently become an important branch of trade, amounting to about 200,000 tons annually; while such is its trade in boots and shoes for the United States, that it is estimated more are sold here than in any other city in the world; and the commerce in dry goods is twenty-fold greater than it was ten years ago. The newer parts of Boston are handsomely constructed. There are several fine public buildings, and the wharves are of great extent and very commodious. The Common and Western Avenue deserve attention. The former has an area of about fifty acres; the latter is seven thousand feet long, and is a solid granite structure, leading from the old peninsula, through the Back Bay, to Brookline, Roxbury, and Brighton. The City possesses extensive public libraries, including that of Harvard University. Boston has fortnightly communication with Liverpool in England by superior steam vessels, and has also steam communication with the principal Atlantic ports of the United States. Sailing vessels are constantly leaving for nearly all the ports of the world. Distant from Quebec 425 miles, from Montreal 334 miles, and from Toronto 540 miles. Population in 1854, 178,000.

☞ G. & L. would call attention to their extensive list of publications, embracing valuable works in THEOLOGY, SCIENCE LITTERATURE AND ART, TEXT BOOKS FOR SCHOOLS AND COLLEGES, and MISCELLANEOUS, etc., in large variety, the production, of some of the ablest writers and most scientific men of the age, among which will be found those of Chambers, Hugh Miller, Agassiz, Gould, Guyot, Marcou, Dr. Harris, Dr. Wayland, Dr. Williams, Dr. Ripley, Dr. Kitto, Dr. Krummacher, Bayne, Dr. Tweedie, Dr. Choules, Dr. Sprague, Newcomb, Banvard, "Walter Aimwell," Bungener, Miall, Archdeacon Hare, and others of like standing and popularity, and to this list they are constantly adding. Among their late publications, are the following, viz:—

Knowledge is Power. A View of the Productive Forces of Modern Society, and the Results of Labor, Capital and Skill. By KNIGHT. Numerous Illustrations. American Edition. Revised, with Additions. 12mo, cloth, $1.25.

☞ This is emphatically a book for the people. It contains an immense amount of important information, which everybody ought to possess.

Chambers' Cyclopædia of English Literature. The choicest productions of English Authors, from the earliest to the present time. Connected by a Critical and Biographical History. Two octavo vols. of 700 pages each, with upwards of 300 elegant Illustrations. Embossed cloth, $5.

Let the reader open where he will, he cannot fail to find matter for profit and delight. The selections are gems,—infinite riches in a little room; in the language of another, "*A whole English Library fused into one Cheap Book!*"

Chambers' Home Book; or, Pocket Miscellany. Containing a Choice Selection of Interesting and Instructive reading, for the Old and Young. Six volumes, 16mo, cloth, $3.

This is considered fully equal, and in some respects superior, to either of the Chambers' other works.

Cyclopædia of Anecdotes of Literature and the Fine Arts. A Choice Selection of Anecdotes of the various forms of Literature, of the Arts, of Architecture, Engravings, Music, Poetry, Painting and Sculpture, and of the most celebrated Literary Characters and Artists of different Countries and Ages, etc. By KAZLITT ARVINE, A.M. With numerous Illustrations. 725 pages, octavo, cloth, $3.

The choicest collection of anecdotes ever published. It contains 3040 anecdotes, 350 fine illustrations, and such is the wonderful variety, that it will be found an almost inexhaustible fund of interest for every class of readers.

Kitto's Popula Cyclopædia of Biblical Literature. Condensed from the larger work. By the Author, JOHN KITTO, D.D. With over 500 Illustrations. One volume octavo, 812 pages. Cloth, $3.

Intended for ministers and theological students, for parents, Sabbath-school teachers, and the great body of the religious public.

Thesaurus of English Words and Phrases. So classified and arranged as to facilitate the expression of ideas, and assist in literary composition. New and improved edition. By PETER MARK ROGET. Revised and Edited, with a list of Foreign Words defined in English, and other additions, by BARNAS SEARS, D.D., President of Brown University. 12mo, cloth, $1.50.

WAIT AND GET THE BEST!

WORCESTER'S ROYAL QUARTO DICTIONARY.

We have the pleasure to inform the public that we have commenced electrotyping **A ROYAL QUARTO DICTIONARY,** by J. E. WORCESTER, LL.D., and hope to complete the work during the present year. The book will contain about sixteen hundred pages, and will be beautifully illustrated.

WORCESTER'S SERIES OF DICTIONARIES, CONSISTING OF,—

I. Worcester's Universal and Critical Dictionary.
II. Worcester's Academic Dictionary.
III. Worcester's Comprehensive Dictionary.
IV. Worcester's Elementary Dictionary.
V. Worcester's Primary Dictionary.

To show in what estimation these books are held, it will be proper to state that they have recently been introduced into the Public Schools of Boston, Cambridge, New York, Baltimore, Washington, D. C., New Orleans, St. Louis, Chicago, Buffalo, Rochester, and many other places in which the Schools are in the highest state of excellence. In addition to this testimony, recent letters of commendation have been received from Messrs. Everett, Prescott, Irving, Bancroft, and other eminent writers whose practice is known to be in conformity with their expressed opinions. Horace Mann expressly says:—"In all my writing, speaking, and teaching, I have endeavored to conform to the rules of orthography and pronunciation as contained in Worcester's Dictionary." Hon. Charles Sumner says:—"The Universal Dictionary I have used *almost constantly, and almost daily,* since its publication. I have no hesitation in calling it *the best* practical Dictionary of the English language." Other gentlemen use words to the same effect; and in point of fact it may be seen by their writings that they design to conform to the *most approved usage,* which Dr. Worcester recognizes as the standard authority, and of which his Dictionary *purports to be the exponent.* The innovations, however plausible, invented by one man, however learned and ingenious, ought not, and cannot, prevail against the common usage of the English language; nor can there be any true American standard of authority other than the usage of the best American writers.

WORCESTER'S QUARTO DICTIONARY will contain, in its various vocabularies, upwards of ten thousand words more than can be found in any other Dictionary of the English language published in America. It is very important, therefore, to **WAIT AND GET THE BEST!**

THE BEST READING-BOOKS IN THE ENGLISH LANGUAGE!

Teachers and School Committees are respectfully requested to examine HILLARD'S SERIES OF READERS, consisting of,—

I. THE FIRST-CLASS READER.
II. THE SECOND-CLASS READER.
III. THE THIRD-CLASS READER.
IV. THE FOURTH-CLASS READER.

1. THE FIRST-CLASS READER.—This Book is designed, as its title indicates, for the use of the Highest Classes in Public and Private Schools. Each selection is preceded by a biographical and critical notice of the author, and every page of the book bears the impress of the fine literary taste of the compiler. Its success has been altogether unparalleled. It has been introduced into the Public Schools of Boston, New York, Cambridge, Roxbury, Worcester, Manchester, Portland, Brunswick, Cleveland, Chicago, St. Louis, and many other places.

2. THE SECOND-CLASS READER.—This Book contains an Introductory Treatise upon Elocution, prepared by Mr. JAMES JENNISON, of Harvard University. In the variety and interest of the selections, their excellence as reading lessons, their high moral tone and unexceptionable good taste, this Reader is unequalled.

3. THE THIRD-CLASS READER.—This Reading-Book is designed for the use of the Third Class in Grammar-Schools. The selections, like those of the First and Second Class Readers, bear the impress of the excellent judgment of the compiler, most of the articles in press having been re-written expressly for the work.

4. THE FOURTH-CLASS READER.—This work is in preparation, and will be ready for publication in a few weeks. School Committees and Teachers are invited to examine the Books already published. They will be furnished gratuitously for examination, or, if the amount of postage is forwarded to us, they will be sent by mail. The postage rates are on the Third-Class Reader 15 cents, on the Second-Class Reader 21 cents, and on the First-Class Reader 24 cents.

LE GRAND PERE, ET SES QUATRE PETITS-FILS. Livre de Lecture, à l'Usage des Ecoles. Approuvé par le Conseil Royal de l'Instruction Publique. First American Edition, carefully prepared for American Schools, and furnished with copious Notes, by Francis S. Williams, late Sub-Master in the High School, Boston. 12mo., 420 pages. Price $1.00. This is, in every respect, one of the best French Reading Books for Children that has ever been published. The matter is instructive, the style is easy and colloquial, and, while it familiarizes the young student with the peculiarities of the language, conveys, at the same time, a fund of very valuable and interesting information.

FIRST BOOK IN FRENCH CONVERSATION.—The Subscribers invite the attention of Teachers, School Committees, and of all interested in instruction in the higher branches of education, to a new work just published, designed as a First Book in French Conversation. It is intended to be used as a companion volume for LE GRAND PERE, one of the best French Reading Books for beginners ever published, and is entitled,—"Conversations sur le Grand Père," designed for a First Book in French Conversation, by FRANCIS S. WILLIAMS, principal of a School for young Ladies. Copies will be sent to Teachers for examination, upon receipt of fifty cents for LE GRAND PERE, and fifty cents for the CONVERSATIONS.

A NEW WORK ON NATURAL AND EXPERIMENTAL PHILOSOPHY, by Thomas Tate, F.R.A.S. First American Edition, Revised and Improved by C. S. Cartee, A.M., Author of Elements of Physical Geography.

Notwithstanding the number and variety of text-books on Natural Philosophy now before the Public, the peculiar excellence of Professor TATE'S treatise, together with the express desire of some of our most eminent teachers that it might be made available to them in their instructions, seemed to call for its republication in this country. It was originally prepared as one of a series of text-books for the use of the masters and students of the Battersea College, near London; and how well it has fulfilled its purpose is evident from the high commendations bestowed upon it by Her Majesty's Inspectors of Schools, and the Committee of Council on Education. As a text-book for schools, it appears to embrace all the essential requisites. The principles of the science are clearly and concisely stated, with their practical application to the arts of life and the phenomena of nature. The experiments are instructive and interesting, requiring for the performance of most of them but a trifling expenditure for apparatus. Examples and problems to exercise the student, with upwards of six hundred diagrams for illustration, pervade the work. The book contains 528 pages, 12mo., and is beautifully bound in cloth. Copies will be furnished to teachers for examination, on the receipt of fifty cents in postage stamps.

FIRST LESSONS IN PHILOSOPHY.—We also publish "FIRST LESSONS IN PHILOSOPHY, DESIGNED FOR THE USE OF COMMON SCHOOLS," by the same authors. This book contains 252 pages, 12mo., and will be sent to teachers for examination, on the receipt of 30 cents in postage stamps.

WORCESTER'S NEW SPELLING-BOOK.—We have the pleasure to announce that we have in preparation and shall soon publish, a PRONOUNCING SPELLING-BOOK OF THE ENGLISH LANGUAGE, by J. E. WORCESTER, L.L.D. The orthography and pronunciation of Dr. Worcester's Dictionaries are very generally regarded as representing the best usage of the English language. The Spelling-Book now in preparation will represent the same system, and Teachers throughout the country will welcome its appearance. It will doubtless be the most accurate, comprehensive, and complete Spelling-Book of the English language ever published.

SPLENDID PICTORIAL WORK!

HUNTER'S PANORAMIC GUIDE

FROM NIAGARA FALLS TO QUEBEC,

BEING a perfect picture of those portions of the CANADAS through which the River St. Lawrence flows. Mr. Hunter, the author, is an English artist of rare acquirements. He started from Niagara Falls and rowed his own skiff all the way to Quebec, stopping long enough at all points of interest to transfer with his pencil a perfect view of the same to paper. He now gives us the result of his labors in this SPLENDID PANORAMA, TWELVE FEET IN LENGTH, comprising most beautiful and highly finished views of the FALLS OF NIAGARA, THE THOUSAND ISLANDS, THE RAPIDS, VICTORIA BRIDGE, the Cities of MONTREAL, KINGSTON, QUEBEC, &c., and numerous smaller places—in fact forming a complete daguerreotype of a beautiful and interesting section of the North American continent. This Panorama, although twelve feet long, is neatly folded into a convenient size for travellers, and is accompanied by seventy pages of ILLUSTRATED LETTER PRESS DESCRIPTIONS of the entire route, forming a most readable volume, being a COMPLETE GUIDE to the Canadas. In order to put this beautiful volume within the reach of all, we have concluded to sell it for $1 at retail, hoping the sooner to sell the 100,000 copies which we intend to.

We have already districted out the Canadas into agencies, and are now prepared to contract with 1000 TRAVELLING AGENTS to canvass in the United States. For although it is a book well nigh indispensible to the Northern Traveller, it is still as important to those not so highly favored, who are compelled to stay at home.

Published by JOHN P. JEWETT & Co., Boston; H. P. B. JEWETT, Cleveland, Ohio. To whom all orders for books, and all applications for agencies, must be addressed.

THE GREEN MOUNTAINS ONCE MORE!

JUDGE THOMPSON, the popular author of "The Green Mountain Boys," "Locke Amsden," &c., has just completed for the public eye the great work of his life, entitled

GAUT GURLEY, OR THE TRAPPERS OF LAKE UMBAGOG.

This exciting tale is founded on a murder of unusual atrocity that occurred about 40 years ago, among the Trappers and Hunters of Umbagog, and the other wild Lakes lying on the Northerly borders of Maine and New Hampshire. Gaut Gurley was supposed to be an actor in this and other flagitious crimes, and made his escape to the West Indies. Judge Thompson has built a story upon these historic facts which will probably be more read by New England people than any book which he has ever written It is a work of thrilling interest and rare power. In one vol. 12mo. Price $1.—Published by JOHN P. JEWETT & Co., Boston.

DR. ALLEN'S AMERICAN BIOGRAPHICAL DICTIONARY.

This splendid and very complete work contains the Biographies of *Six Thousand Seven Hundred and Fifty* Eminent deceased AMERICANS, STATESMEN, WARRIORS, PATRIOTS, POETS, CLERGYMEN, LAWYERS, PHYSICIANS, MERCHANTS, MECHANICS, and others distinguished in the various walks of life, making a superb royal octavo volume of 900 pages, double columns. Dr. Allen, the learned compiler of this valuable work, published the first edition forty-eight years ago, which contained seven hundred articles. He revised it and published a second edition in 1832, while President of Bowdoin College. This edition contained eighteen hundred and fifty Biographical articles. Now, after a lapse of twenty-five years, he offers this new and much improved edition, containing *Six Thousand Seven Hundred and Fifty* Biographical articles. making by far the most thorough and reliable DICTIONARY OF AMERICAN BIOGRAPHY ever published.

No LIBRARY, PUBLIC OR PRIVATE, is complete without this work. We have printed it on superior paper, and it is bound in full sheep, marble edges, price $5, and half Turkey Morocco for $6.

THE Congregational Hymn Book is now ready. It is a collection of Sacred Lyrics unequalled in the English Language. Published with various qualities of paper and styles of binding, by JOHN P. JEWETT & COMPANY, 117 WASHINGTON ST. BOSTON.

The attention of Clergymen and Churches is particularly called to an examination of the plan and execution of this admirable book.

BEST EDITION.

HUDSON'S SHAKESPEARE.

JAMES MUNROE & CO.,

BOSTON AND CAMBRIDGE, HAVE JUST PUBLISHED THE

WORKS OF SHAKESPEARE,

The Text carefully restored according to the first editions, with Introductions, Notes, original and selected, and a Life of the Poet.

BY REV. HENRY N. HUDSON, A.M.

Eleven volumes, 16mo., $1 each. The following are among the notices received:

"No edition of Shakespeare has yet appeared in this country at all equal to this for purposes of real utility. The volumes are exactly of the right size to handle with convenience; the print is emphatic, if we may be allowed the expression,—that is, not only legible and clear, but of that kind that tells to the eye; the paper is excellent; and the introductions and notes by Mr. Hudson are very significant, just, apposite, and desirable. We earnestly advise our readers to supply their centre-tables, travelling trunks, and library shelves, with a copy of Hudson's Shakespeare."—*The Home Journal, New York.*

"On reading Mr. Hudson's admirable preface, I was much struck with the high tone and spirit in which he has entered upon his task. The style in which the edition is brought out pleases me extremely; it is a remarkable, comfortable, cozy, readable form of volume—just such a one as we take up with delight and lay down with regret—one that can be held for hours without inconvenience, lounging in doors over the fire, or carried without incumbrance out into the fields; and this is a strong recommendation. A book, the contents of which make it our favorite and constant companion."—*Extract from a Letter by Mrs. Mary Cowden Clarke, author of the "Concordance to Shakespeare," &c.*

Mr. Prescott's Works are also bound in a great variety of elegant styles, half calf, full calf, and antique.

"The more closely we examine Mr. Prescott's Work the more do we find cause to commend his diligent research. His vivacity of manner and discursive observations, scattered through notes as well as text, furnish countless proofs of his matchless industry. In point of style, too, he ranks with the ablest English historians; and paragraphs may be found in his volumes in which the grace and eloquence of Addison are combined with Robertson's majestic cadence and Gibbon's brilliancy."—*Athenæum.*

EMERSON.

ESSAYS; First and Second Series. By RALPH WALDO EMERSON. 2 vols. 12mo. cloth. Price, $1 per vol.

MISCELLANIES; including "Nature," etc. By R. W. EMERSON. 1 vol. 12mo. cloth. Price, $1.

WILLMOTT'S PATENT BOOT-CRIMPING MACHINE.

THIS MACHINE

Has recently been much improved and is now confidently offered to the public as the best Boot-Crimper in the world.

It is well known that in the

Ordinary Machines,

THE BOOT

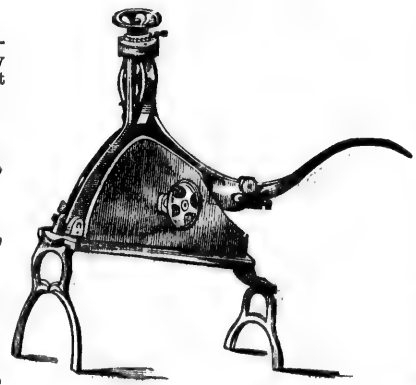
Is roughly broken into shape,

WHILE THE

CRIMPING AND STRETCHING

ARE AFTERWARDS

DONE BY HAND.



THIS MACHINE,

on the contrary, rubs out the wrinkles, pulls out the corners and thoroughly crimps

THE BOOT,

and much better than it can be done

BY HAND,

And with such ease and rapidity that upwards of twenty pairs have repeatedly been crimped by one man in an hour. This MACHINE has but lately been introduced with the new improvements. The following certificate from a few New England Manufacturers who have it in daily use, will show how it is appreciated.

TO THE BOOT MANUFACTURERS IN THE NEW ENGLAND STATES.

This is certify that we the undersigned have purchased **WILLMOTT'S BOOT-CRIMPING MACHINE**, known as the LITTLE GIANT, and do not hesitate to pronounce it the very best and most practical labor-saving machine ever offered to the public.

We can cheerfully recommend it to manufacturers and the trade generally as being all it is recommended, and would not return to the former method of crimping for five times its original cost.

J. D. STRATTEN, SYLVAN SHURTLEFF, | D. J. EVANS, J. M. & C. S. PRESCOTT, | LEVI BROWN, ALFRED CAVERLY, | ALVAH CHAMPION, J. B. LITTLEFIELD, | WILLIAM HILL, CHARLES H. HILLIARD.

The Machine is sold at about the same price as the common "Break Downs," and at less than one fifth the price of the French Machines. *For further particulars, see Circulars which will be forwarded to any address on application.*

Is the GREAT AMERICAN HAIR TONIC. It permeates to the cellular tissue of the cuticle, and forces the Hair and Moustaches to grow. It cures Scurf and all Diseases of the Skin, and is the most beautiful embellisher of the Hair to be found. Where every thing else has failed in restoring hair, this has reinstated it in beauty and luxuriance. Price 25c., 50c., 75c., $1, and $1.50 per bottle.

BOGLE'S HEBEAIONA, OR BALM OF CYTHERIA, is unrivalled for beautifying the Complexion, and eradicating Tan and Pimples. *Price 50 cents per bottle.*

Best Hair-Dye in the World.

This is strong language, yet BOGLE'S ELECTRIC HAIR DYE (recently improved) was *proven* to be so by the judges at the late Mechanic's Fair, held in Boston, (among whon was Dr. Hayes, the eminent chemist and State Assayer,) who awarded it the PRIZE MEDAL AND DIPLOMA, over the choicest Hair Dyes on exhibition from all parts of the Union. Its unparallelled superiority consists in—1st, The ingredients are nourishing to the hair, not destructive, as others are. 2d, Does not stain nor hurt the skin. 3d, Is easily applied, and dyes the hair any color required, from a delicate brown to a deep black, so natural as to appear marvellous.

W. BOGLE has always on hand a Large and Varied Assortment of Ladies' and Gentlemen's **WIGS and HAIR WORK** of the very best description. He particularly calls attention to his newly-invented Transparent Parting for Gentlemen, and the Ladies' Self-Adjusting Wig, so natural as to defy detection even from members of the same family. W. B. visits Europe every season, in search of every thing new and unique in his department.

BOSTON LUNG INSTITUTE,

ESTALISHED A.D. 1855,

FOR THE TREATMENT AND SPEEDY CURE

OF

CONSUMPTION, CATARRH, BRONCHITIS, ASTHMA, AND ALL CHRONIC DISEASES OF THE THROAT AND LUNGS

BY MEDICATED INHALATION.

S. H. MELCHER, M.D., M.A.M.S.
C. MORSE, M.D., M.A.M.S. } Medical Examiners.

69½ SUMMER STREET, BOSTON, MASS.

"This is the *only* Institution of the kind in New England and is the *head quarters* of the system of Inhalation for the Eastern States, Canada and the Provinces.

Medicines are sent from the Institute only on personal application and examination, or a very minutely written description of the patient's condition. The "Vapors," are prepared for *each particular case* and being composed of healing gums and balsams, the weak lungs are stimulated and strengthened, the ulcerated matter is thrown off, the ulcers heal and the patient rapidly regains his former vigor.

Consumptives who apply personally, may confidently rely, that their disease will be detected with unerring certainty and TREATED WITH A SUCCESS HITHERTO UNKNOWN.

BOSTON LUNG INSTITUTE—CONSUMPTION CURED.—The great success attending the treatment by *Medicated Inhalation* at the *only* Institution of the kind in New England has already established it permanently. An experiment first, is *now a reality*, and it ranks among the institutions for which Boston is so widely known. The Massachusetts General Hospital, the Eye and Ear Infirmary, and other similar institutions, are well known as among the best managed of the kind in the country. Second to none is the Boston Lung Institute; its prosperity is wholly owing to the almost wonderful effect of the treatment adopted—being entirely different from any other—*curing* where other practice *merely relieves*. Such is the demand for the remedies, that two physicians are constantly required in attendance, in addition to the occasional assistance of several of our medical gentlemen, who volunteer their services to aid and encourage this great improvement in medicine. It has the approbation, well wishes and patronage of a host of our business men, and our citizens generally are availing themselves of the benefits derived there. The Institute is very pleasantly situated on Summer street.—*Traveller.*

☞ The Boston Long Institute is doing a great work in the way of *curing* Lung diseases, and from the testimony of our citizens who have already visited it. *Medicated Inhalation* is the only *reliable* treatment for Consumption, Bronchitis, Catarrh or Asthma.—*Olive Branch.*

BOSTON LUNG INSTITUTE.—Among the many improvements of the day that have attracted our attention, is the beautiful little globe, with the flexible tube and crystal mouth piece, through which the mysterious medicated and healing vapors are breathed, that are administered at the *Boston Lung Institute*—and we consider it *the very best medium* by which this wondrously subtle compound of flowers and herbs, and healing balsams can be conveyed to the vital part diseased, and one of the most powerful auxiliaries in the hands of those who use it, for the *curing* of pulmonary complaints.—*Daily Journal.*

The number of letters received by the Institute, from all parties, old and young, male and female, describing the remarkable cures by Inhalation, is truly surprising, and any one calling on Drs. Melcher and Morse, 69½ Summer street, may also be referred to many of our merchants whose wives and daughters have been cured by this unequalled treatment.—*Merchants & Manufacturers Magazine.*

CAUTION.—Attemps have been made to take advantage of the popularity of this system, by putting up "*Packages of Inhaling Remedies.*"—Hoping to gain sale for them on the strength of the well earned reputation of Medicated Inhalation as practiced at the Boston Lung Institute.

☞ THEY ARE LIKE ALL OTHER QUACK MEDICINES,

MADE TO SELL.

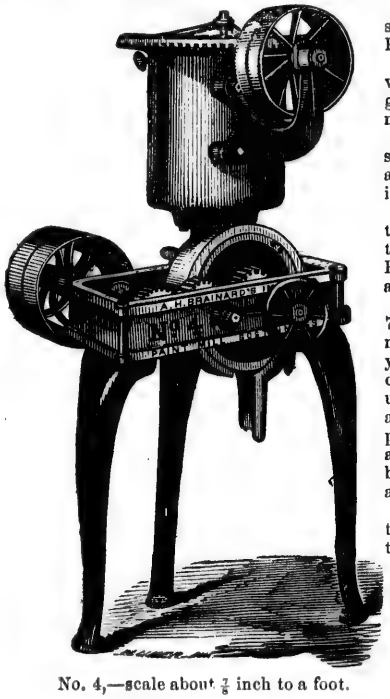
No. 2.

THE attention of all who have occasion to grind paints by hand or power, is invited to the above mentioned Mills—the invention of a practical painter of long experience, which combines many excellencies not found in any other mill now before the public. A few of these advantages may be named. 1st—No Color, however coarse, needs grinding through them more than once to render it fine enough for any purpose whatever. 2nd—They will grind from two to four times the amount of paint which can be ground in any other mills in the same time, thereby paying for themselves in a very short time. 3d—They do not "throw," when run rapidly, as in the case of all horizontal mills. 4th—The coarse and heavy colors *do not settle* in them, as they do in all other upright mills. 5th—The grinding surfaces wear perfectly even, and the mills therefore work well until entirely worn out. 6th—There is *no slop work* about them—the principal bearings are of hardened steel, and every part is finished with a care and accuracy which cannot be surpassed. 7th—Every mill passes through the hands of the inventor, who, from his experience as a painter, is enabled to detect any fault which may have escaped the notice of the machinist.

Four sizes are now made, each differing from the others in the details, and adapted for different kinds of work; the general principles, however, are the same in all.



No. 4,—scale about $\frac{3}{8}$ inch to a foot.

No. 1 is a hand mill of medium size, and is particularly designed for grinding thin colors, such as are used by Carriage Painters.

No. 2 is also a hand mill, about double the size of No. 1, and, while answering well for Carriage Painters, is better adapted for grinding thick colors than No. 1; it also makes a good "power" mill.

Nos. 3 and 4 are both "power" mills, and are nearly alike in size, but the latter has the peculiarity of combining within itself a MIXER, so that the dry paint and oil, (or water,) being thrown into the tunnel, are mixed and ground at one operation.

For a fuller description of all the sizes, and engravings of the two not shown in this advertisement, as also recommendations from a large number of Carriage Makers, Painters and Paint Dealers, see circulars, which will be sent to any address on application.

In the "New England Business Directory" for 1856, page 708, appears the following testimonial to the value of these mills:—"The grinding of paints by hand is a laborious process, yet but little, if any, improvement has been made upon the machines in common use for this purpose, for the past twenty years, until quite recently, when Mr. A. H. Brainard, of Boston, invented and perfected a mill, or rather a series of mills, which have proved to be so much superior to anything now in use, that they are rapidly superseding those of all other makers, wherever they become known. The invention is certainly an ingenious one, and well deserves the encouragement it has received."

As an instance of this "encouragement" it may be mentioned that one firm alone of Paint Dealers in Boston have sold 350 of those mills in two years.

WISTAR'S
BALSAM OF WILD CHERRY.

THIS REMEDY so long before the Public, and yearly increasing in popularity, by force of its singular merits is an especial favourite in CANADA AND BRITISH PROVINCES.

The reputation that it sustains from all, who, in a greater or less degree suffer from diseases like

INFLUENZA,
COUGHS & COLDS,
ASTHMA,
BRONCHITIS,
INFLAMMATION OF THE LUNGS,
HOARSENESS,
SORE THROAT,

and finally that

"BANE OF OUR RACE & SCOURGE OF OUR CLIME,"
CONSUMPTION!

Is the only proof necessary of its remarkable remedial qualities, and is adapted only to the wants and woes of suffering humanity.

The BALSAM contains no mineral, no drug, no deliterious ingredient; is agreeable to the taste, soothing and pleasant in its effect.

ADVICE TO PURCHASERS!—Remember! None is Genuine, unless it has the WRITTEN Signature of **"I. BUTTS"** on the Wrapper: all else is spurious, worthless and deliterious.

For Sale generally throughout the Canadas & British Provinces.

OXYGENATED BITTERS!

If we except Consumption there is no Disease which affects our race to the extent as does

DYSPEPSIA OR INDIGESTION.

The Skill of the Physician has been taxed in vain to discover a remedy for this distressing disease; once fastened in the system, medical science exhausted itself in fruitless attempts to cure, or even to relieve it.

Until the discovery of the OXYGENATED BITTERS, by Dr. GREENE, and its introduction to the public, the afflicted in vain hoped for relief from any known remedy.

The reputation that this Medicine has acquired for the rapid cure of CHRONIC DYSPEPSIA, under whatever type developed, renders it a work of supererogation to say more than that for the complaints below named, it is without a rival, viz :

DYSPEPSIA,
PAIN IN THE STOMACH,

The present senior partner, being the *oldest Pianoforte Manufacturer in Boston.* This firm has, within the last year, introduced some very important and material

Improvements.

An entire set of new scales have been made, including a new scale for a Grand Pianoforte. The first Piano made from it, received the award of a Silver Medal at the last exhibition of the Massachusetts Charitable Mechanic Association. By the peculiar construction of said new scales, they have greatly improved their Square Pianofortes, by increasing the vibration, clearness, and purity of tone. They have also adopted a

New Improved Action,

Which is simple in its construction, very sensitive to the most delicate touch, operates without a spring, (an advantage possessed by no other action,) and therefore requires little if any regulating, by the changes of weather or climate; Combines all the most desirable qualities sought for, during the last twenty years. For which a medal was awarded at the last Fair of the Massachussetts Charitable Mechanic Association. These instruments are all prepared *for* Coleman's patent

Æolian Attachment.

In which there is combined with the Pianoforte, a Wind Instrument, the same key-board controlling both in such a manner, that either can be used separate, or both together, thus furnishing an instrument for Organ, or Piano music, or that may be combined at the pleasure of the performer, in orchestral effects.

Iron Frames.

From a knowledge of the fact, that Pianofortes made without metallic frames, (as was the case in some of the first to which the Æolian was applied,) were constantly subject to variations in pitch by changes of temperature, many persons have honestly supposed it impracticable, and inexpedient, to combine a Wind, with a Stringed Instrument. But having the strings connected with the entire iron frame at both ends, (as all are now made by this firm,) entirely obviates this difficulty. The strings and frame expanding and contracting together, which preserves a uniform pitch in the Piano, so that no additional tuning is required over the ordinary Pianofortes, to keep the Piano in tune with the Reeds.

Medals and Diplomas

Have repeatedly been awarded to these manufactures, in Boston, New York, Philadelphia, and other places, but have never previous to 1856, in any advertisement, handbill or circular, been alluded to in a single instance, by them, having always relied upon the character of their instruments, which have now been before the public about thirty years.

The Fact

May be stated that at the last exhibition of the Massachusetts Charitable Mechanic Association, they were awarded **SILVER** and **BRONZE MEDALS** for **Grand** and **Square Pianofortes.**

FOR HORSES AND CATTLE.

The Russia Salve has been tried in thousands of cases, and never known to fail.

PRICE 25 CENTS.

October, 1857.

Brief History of the Russian Salve.—About the year 1818, a Russian, who had served as a soldier in the Imperial army, during the disastrous campaign of Napoleon, arrived in Boston from Cronstadt, and shortly after got work at his trade, (a currier,) in Charleston, near Boston. He was soon after taken sick; and during his illness he was attended by a kind-hearted clergyman of that town, who did all in his power for the relief of the poor Russian. But though he grew worse every day, the benevolent clergyman did not abate his kindness, but was more and more attentive; and at last, when the Russian felt that he was soon to die, he motioned his friend to his bedside, thanked him for his kindness, and as the only return he could make, presented him with the recipe of a remarkable Ointment, which had been used with great success, by the surgeons of the Russian army. The clergyman prepared a small quantity, and was convinced of its great value, but dying soon after, his family disposed of the recipe to Mr. Redding, who gave it the name of "REDDING'S RUSSIA SALVE."

CAUTION.—The accompanying engraving is printed on the outside wrapper and stamped on the Metal cover of every box of the RUSSIA SALVE, without which none are genuine. Be sure to call for "REDDING'S RUSSIA SALVE," the original and old established remedy, introduced in the year 1822.

From our long experience in the manufacture of Weighing Apparatus, (our establishment being the oldest of the kind in the United States,) we can warrant our articles to excel all others for accuracy, durability, and nicety of operation, and we solicit the attention of purchasers.

Our Railroad, Hay and Coal Scales are made on a different principle from any other kind, and wherever they have been tested with other Scales, have been pronounced the best as regards accuracy and durability.

The following article, with regard to one of our Hay Scales, exhibited at the last Mechanics Fair in Boston, is from the Boston Journal:

"One of the most finished and beautiful articles in the whole Exhibition is a large platform scale from the manufactory of L. Stephenson & Co., 72 Water Street. It is not more noticeable for the great beauty of its workmanship than for its strength and nicety of adjustment, one half ounce being amply sufficient to turn the beam with a weight of three thousand pounds on the platform. The peculiarity and superiority of this scale consists in the *suspension* of the platform on the bearing points in such a manner as to prevent their wear or displacement, with any usage. But an accurate idea of its advantages can be obtained only by a personal examination of the scale itself.

VARNISH. VARNISH.

We invite the attention of Dealers and Consumers to our superior facilities for the manufacture of a

UNIFORM AND RELIABLE QUALITY OF

VARNISH,

SUITABLE for any and all purposes for which the article is used, from a fine COACH or RAILROAD CAR, down to the most common article of FURNITURE.

The manufacturing is under the superintendence of MR. JOHN BABCOCK, formerly of Newark, N. J., and whose reputation for Skill in this department is second to none.

N. B.—At the recent Triennial Exhibition of the Massachusetts Charitable Mechanic Association, held in Boston, we were, by the Committee (of which Professor A. A. HAYES, State Assayer, was Chairman), awarded a Silver Medal, being the highest award ever made by this Society, on Varnishes. Also, a Diploma from the Maine State Fair, held at Portland in 1856.

Soliciting your orders, we remain, yours truly,

I WOULD respectfully request the attention of the TRADE to the large and complete Stock of VARNISHES AND JAPAN of my own and improved manufacture. After long experience in the sale and having superior facilities for manufacturing, also keeping constantly in store from 8,000 to 10,000 gallons. I am confident of my ability to supply a Varnish of uniform quality which can be relied upon, and the united Testimony of all who have used it fully justifies me in warranting it superior to most and equal to any either IMPORTED or AMERICAN. For the Superior quality of my VARNISHES, I would refer to the report of the Committee appointed by the Massachusetts Mechanic Association,(of which Dr. A.A. Hayes, State Assayer, was Chairman.)

"A. L. CUTLER, Boston, case of Varnishes with neatly Varnished specimens of wood showing the different kinds. They were of good quality, clear and well preserved, and are deserving of a Bronze Medal."

Also the Metropolitan Mechanics' Institute of Washington, state in their report: "Varnishes made by A. L. CUTLER, Boston, all of them are of high quality and some of them possess a clearness and brilliancy seldom equalled. The excellency of the articles and the neatness with which they are displayed are deserving of the HIGHEST recommendation, award a Silver Medal." Being the highest premium ever given for Varnishes.

PURE OLD BOURBON WHISKEY,

EXPRESSLY FOR MEDICINAL PURPOSES.

HAVING completed our arrangements for supplying Druggists, Physicians and the Trade generally, with an article of Whiskey, for Medicinal Purposes, we respectfully call your attention to the following brief statement respecting it:

The beneficial results which have attended the use of pure Whiskey, where it has been recommended as a remedial agent, has caused an unprecedented demand for it, so much so that it is not at all probable that there is one-half the quantity *manufactured* of the *Genuine Old Bourbon Whiskey* to supply the demand; hence a large proportion sold for that article must necessarily be either an adulterated, or very inferior Whiskey, not only devoid of any medicinal properties, but, on the contrary, injurious to health.

Some time before the article of Whiskey was generally known and prescribed by the Medical Faculty, for the purposes for which it is now offered by us, we were apprised, through other sources, of the great benefits derived from its use, and since that time have given the subject especial attention, in order to procure a perfectly pure article.

Our object having been attained, as the contract we have made insures us a regular supply direct from the manufacturer, in Bourbon County, Ky., we unhesitatingly offer it to the public. It can confidently be relied upon as Genuine Old Bourbon Whiskey, in its purest form.

Owing to the numerous reports that have been circulated respecting the poisonous or injurious matters detected in Whiskey, (and we fear in many cases, well founded,) we have take the precaution of having a chamical test made of samples of the article put up by us, and we herewith annex the result of the analysis made by Dr. Charles T. Jackson, which is of itself sufficient to establish its reputation for purity.

STATE ASSAYER'S OFFICE, 32 Somerset Street, Boston, May 20, 1857.

☞Messrs. WILSON, FAIRBANK & Co.

GENTLEMEN,—I have made chemical analysis of the samples of Bourbon Whiskey you sent to me, searching them for *drugs* or *adulterating* matters, and have to inform you that the samples of whiskey are *free* from any *adulterations*, and do not contain any *poisonous* or *injurious* matters, and hence are suitable for *medicinal use*.

Respectfully, your obedient servant, CHARLES T. JACKSON, *State Assayer*.

To parties unacquainted with our house, we would refer them to the following communication from Dr. Charles T. Jackson, State Assayer, and Dr. J. V. C. Smith, editor of the Medical Journal:—

We take pleasure in recommending to the confidence of the public, the house of Messrs. WILSON, FAIRBANK & Co., of this city, Importers, Wholesale Druggists and Chemists, and Dealers in *Pure* Liquors, for Medicinal purposes. Being personally acquainted with the members of the firm, we have the utmost confidence in their integrity, to conform strictly to all orders intrusted to their charge.

J. V. C. SMITH, M. D.

BUFFALO, N. Y.—A City and Port of Entry situated at the entrance of Buffalo Creek into Lake Erie, and near the commencement of its outlet, Niagara River. Being at the western terminus of the Erie Canal, possessing many railway connections and important maritime advantages, Buffalo commands a high commercial position. Indeed, its commerce is immense, employing a vast number of steamers, brigs and sloops, which convey from the several Lake ports a large amount of produce, that is transported hence to Eastern markets by canal and railroad. The harbor of Buffalo is sufficiently capacious for the accommodation of several hundred vessels, and is well protected from winds. The rapid growth and commercial importance characterising this port commenced at the completion of the Erie Canal in 1825, which has already become so utterly insufficient for the demands of trade that urgent calls have been made for its enlargement or the addition of other and more capacious channels of transport. The streets are broad and straight. Main Street, 100 feet in breath, extends for a distance of four miles, and is built very compactly with stores, hotels and expensive private dwellings. Distant from Chicago 533 miles from Cincinnati 438 miles, from Albany 298 miles, from Detroit 310 miles, from Goderich, C. W., 165 miles, and from Toronto, C. W., 60 miles. CHICAGO, ILL.—A City and Port of Entry very advantageously situated on the west side of Lake Michigan, at the mouth of Chicago River. The manufactures of Chicago are various and extensive; and its favorable maritime position, in connection with an extensive grain-growing district, has given it an increase in wealth and population within the last ten years that is scarcely to be equalled by any place in any country. Besides the lake navigation, in which it largely participates, the city is the terminus of no less than thirteen railways, as also of the Illinois and Michigan Canal; and our wonder must be excited when it is borne in mind that the population of Chicago twenty years ago was insufficient to constitute her an incorporated city, and twenty-five years since the Indians possessed a large portion of the surrounding country; nor scarcely could it be perceived at any time that the rapidity of its growth received the least check from the scourges of sickness that have occasionally visited its population. Distant from Buffalo 533 miles, from Sault St. Marie 445 miles, from Cincinnati 273 miles, and from Windsor, C. W., 286 miles. Population about 100,000.

KERSHAW, C. J.

CLEVELAND, OHIO.—A City and Port of Entry, situated in a commanding situation on Lake Erie, at the mouth of the Cuyahoga River. The greater part of the City occupies an elevation about 80 feet above the lake, affording a fine and extensive prospect. The streets cross each other at right angles, and are 80 feet wide, Main street being 120 feet wide. It is the emporium of Northern Ohio, and next to Cincinnati, the most important town in the State, as it is also one of the most beautiful Cities in the Union. The harbor of Cleveland has been by art made one of the best on the Lake. It is naturally formed of the mouth of the Cuyahoga River, which has been improved by a pier on each side extending 425 yards into the lake, 200 feet apart, and faced with substantial stone masonry. Cleveland is the great mart of the greatest grain-growing State in the Union; and its connections by rivers, railways, and canals are numerous. Among its excellent institutions may be noticed the Western College of Homeopathy, which was founded in 1850, and has 8 professors and 62 students. Ohio City, on the opposite side of the Cuyahoga River, although having a separate incorporation, constitutes virtually one place with Cleveland. Distant from Chicago 340 miles, from Cincinnati 255 miles, from Buffalo 183 miles, and from Port Stanley, C. W., 80 miles. Population (including Ohio City, 8000) about 35,000.

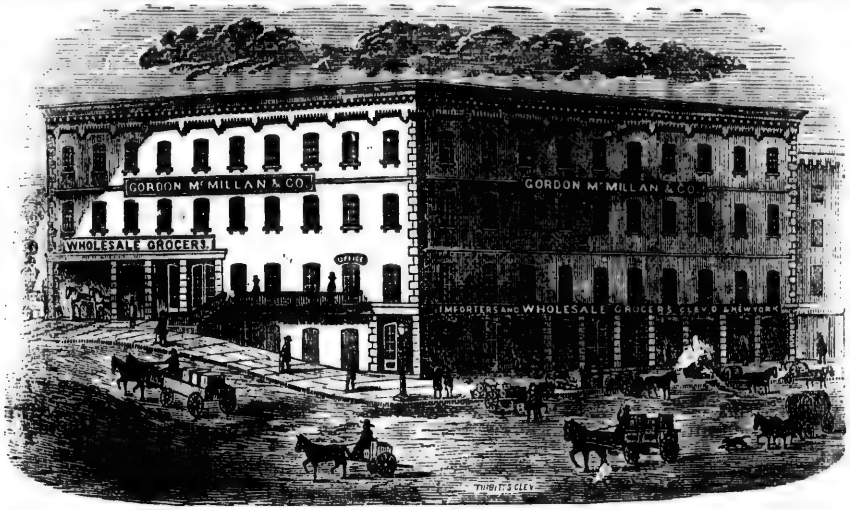
COMPLETION AND OPENING OF GORDON, McMILLAN & Co.'s NEW WAREHOUSE.



AS citizens of the Forest City, it is with no ordinary degree of satisfaction and pride that we avail ourselves of this opportunity to exhibit to our readers the above cut of the extensive Jobbing Grocery House of GORDON, McMILLAN & Co., of this city, just completed for their exclusive use, on the site of the old "New England Hotel," which, we think, renders the important commercial position of our city a fixed fact. It will be remembered that this firm has also a House at 14 and 16 Beaver Street, New York, under the style of GORDON, FELLOWS & McMILLAN.

The large trade Mr. G. has secured in this city, and his long experience before forming his present co-partnerships, peculiarly fit him to judge accurately of the many advantages our city has for importing from the various cities East and South, and the cheap and prompt distribution of merchandise, and who can suppose that Mr. G. and his associates would devote their large resources and valuble experience to this large enterprise, without clearly foreseeing the many advantages of our position.

Their building is a plain, substantial four story structure, with cellar under the whole, has 178 feet front on Merwin and Superior Streets, and 140 feet depth on Merwin Street, with five floors, of an area of 17,000 square feet on each, (is 85,000 square feet) or about two acres in all. Is thoroughly fire proof, with eleven doors for receiving and delivering from the first story on Merwin street and four from the same, rear; also a drive-way from Superior street, in the second story, of 15 feet in width, and room inside for several drays to turn, load and unload at one time. An arrangement is also made with the C. C. & C. R. R. Co., to locate a track and switch from their main track in the rear of the second story of the premises, for the special accommodation of this Ware House.

The sales rooms and offices occupy a space of 36 by 80 feet, and are heated by "Gold's Patent Stream Apparatus," producing an agreeable and healthful atmosphere;—also are tastefully and conveniently arranged and furnished with chandeliers, wash-stands, closets, and every modern convenience for the supply of water and gas. Sample cases, counters, railings and desks of the book-keepers, cashiers, entry, receiving and shipping clerks, salesmen and partners, are very handsomely made from the native ash and oak of our own forest, and are very creditable to the skill and taste of the mechanics, Messrs. Pratt, Brown & Co., and Wm. Hart. There is 1,500 feet of Gas pipe, and 150 gas burners in the premises; five hoist-ways; also two capacious vaults for books and other valuables, and a large vault in the rear and *outside* of the main walls, for storage of extra hazardous property.

In short, these premises seem perfect for the use designed, and are five times the size of the building on the corner of St. Clair and River Streets, recently occupied by this firm, (and for many years by W. J. Gordon,) and is fully *four times* the size of any one Jobbing Grocery building now in use in New York city; thus affording convenient storage in all departments for Teas, Coffees, Sugars, Spices, Fruits, Molasses, Syrups, Paints, Oils, Fish, Tobacco, Segars, Indigo, Brandies, Whiskies, Wines and Liquors of all kinds. Staple Drugs, Ship Chandlery, Wooden Ware, (assorted) Produce, and all of their large and varied stock, and all can and will be so arranged and systematized, and the labor of the twenty employees so divided, that there can scarcely be any limit to the amount of business that may not be done on the premises with accuracy and despatch.

We are credibly informed that the business of the old firm of this house (here and in New York,) reached nearly a million and a half dollars the past year; add to this the large trade their new associate, Mr. McMillan, (of the late firm of Fenner, McMillan & Arthur) must bring, with the constant natural increase that such *reliable* and *straightforward* men (as this firm is composed of) always command, with all their other facilities and advantages, and we confidently predict an annual trade of millions for them in future, affording them at once the very great advantage of being the largest buyers of goods in their line in this country; enabling them at any time to take entire lots or lines of goods, and thus almost invariably save a commission at least from the price.

Their large shipments ought and will give them same advantage in price of freights. In short, the conclusion cannot be avoided that this concern must be able to furnish goods in this market, to almost any extent, at prices lower than thy can possibly be obtained from any other source.

A market so cheap and convenient, saving time, expense, delays, and hazards unavoidable in a foreign market, must attract the attention and prove of incalculable advantage to the buyers of groceries in this and adjoining States, and its influence must be sensibly and forcibly felt upon every branch of business, and constitute *a new era* in the trade and commerce of our city.—*Commercial Gazette.*

MANUFACTURERS AND WHOLESALE DEALERS IN ROOFING SLATE.

SLATERS in any part of the country supplied upon the MOST favorable terms. We are also prepared, if desired, to contract for LAYING ROOFS in any of the States or Canada.

ADVANTAGES OF SLATE OVER OTHER ROOFS.

1st. Slate roofs are fire-proof—far more so than Tin or Composition. 2nd. OUR Slates are WARRANTED not to CRACK or BREAK by exposure to the weather, hence they will never wear out. 3rd. A slate roof when properly put on will never leak. 4th. A Slate roof can be made tight in any spot or place where one of shingles can. 5th. Slate is used on stone, brick or wood structures; of the several hundred roofs which we have covered, four-fifths have been upon wooden buildings. 6th. They can be and are often laid over old shingles. Our Slates have been used for some of the best work in the country, many government and other public buildings having been covered with them. Full information concerning Slate Roofs may be obtained by addressing the Subscribers.

We are thankful for the liberal and steadily increasing patronage which we have received, and in further soliciting favors we pledge ourselves to promptness in our transactions.

LAWRENCE, MASS.—A City situated on the Merrimack River, which is spanned here by a fine granite dam, 35 feet thick at the base by 12½ feet at the top, from which the fall of water is from 25 to 27 feet, affording 5,000 (and sometimes in freshets 60,000) cubic feet per second. The construction of this dam cost $250,000, which has been amply repaid in the establishment of several extensive manufactories, the consequent very rapid growth of the place. Distant from Boston 26 miles, from Lowell 13 miles, and from Montreal ... miles. Population about 20,000.

ATLANTIC COTTON MILLS—manufacture heavy sheetings and shirtings of various widths, employing 1200 operatives; capital $1,800,000; Henry A. Oliver, manufacturing agent; William Gray, treasurer and selling agent, Court st. Boston.

BAY STATE MILLS, Andrew T. Hall, president; Samuel Lawrence, treasurer; G. V. Fox, agent.

LAWRENCE MACHINE SHOP—manufactory of locomotives, stationary steam engines, and machinists' tools; J. H. W. Page, treasurer, 16 Kilby st. Boston, J. C. Hoadley, agent.

LAWRENCE DUCK MILLS, incorporated in 1853, capital $300,000; I. Thacker, treasurer, 25 Commercial st. Boston, I. Hoyden, agent.

PEMBERTON MILLS — manufacture fancy cotton goods; J. Pickering Putnam, treasurer, 71 Milk st. Boston, John E. Chase, agent.

ROLLINS, JOHN R., mayor of city.

RUSSELL, WILLIAM, & SON, manufacturers of book, news, manilla, and wrapping paper; factory bailing, straw and manilla, furnished to order; at Mills over mouth of Spicket River.

LOWELL, MASS.—A City noted for its cotton manufactures, which have been so extensively prosecuted as to obtain for it the designation of the "Manchester of America." These alone furnish employment for 48 mills, 310,000 spindles, 7644 looms, the same number of females, and 3620 males. In 1815 the site of this City was almost a wilderness. Distant from Boston 25 miles, and from Montreal 296 miles. Population about 36,000.

BOOTT COTTON MILLS, for the manufacture of drillings, sheetings, shirtings, jeans and printing cloth, Linus Child, agent.

HAMILTON MANUFACTURING COMPANY, manufacturers of prints, flannels, ticks and sheetings, Thomas G. Cary, treasurer, Boston; J. W. Paige & Co., selling agents, Boston; John Avery, agent at the Mills.

LADD, JONATHAN, counsellor at law.

MIDDLESEX MILLS, manufactory of broad and narrow cloths, doeskins, cassimeres and shawls, John Humphreys, agent.

NEW YORK, U. S.—The Metropolis of the United States, and the second commercial City in the world, is situated on the southern extremity of Manhattan Island, at the confluence of the Hudson with the East River or Strait of Long Island Sound. This great city, from its admirable position and magnificent harbor, possesses facilities for trade unsurpassed by any other on the American Continent. The bay or inner harbor is one of the most capacious and finest in the world; it is completely land-locked, and affords the best anchorage. The rise of the tide is about six feet, and even at ebb-tide there are twenty-one feet of water on the bar. The water in the outer and inner bays, and in the river, is so deep, that ships of the largest burden lie close to the quays, and may proceed to a great distance up the river. The navigation of the bay is but rarely impeded by ice; the entrance to it, through the Narrows, is extremely beautiful. Either side of the shore, though wooded down to the water's edge, is thickly studded with farms, villages, and country seats. At the upper end are seen the spires of the City, and in the distance the bold precipitous banks of the Hudson. The commerce of New York is most extensive, and its tonnage is greater than that of Liverpool, or of any other city with the exception of London. It is scarcely possible to give, in the necessarily restricted compass of this description, any adequate idea of the existing results of the enterprise of the inhabitants; but it is deemed that a few striking statistics on this point will be found interesting. In the year ending June 30, 1852, the exports were, of domestic produce, $38,853,757; foreign, dutiable, $5,333,572; specie, $37,273,703: making a total of $81,461,032. The imports were, of dry goods, $48,000,935; other dutiable goods, $15,444,890; free goods, $11,926,912; specie, 2,528,391: giving a total of $98,801,134. The duties collected at the port, during the same year, amounted to $28,678,010; being considerably more than one half (exactly 60.6 per cent) of all the duties levied at all the ports of the Union. The domestic trade of New York, especially that furnished by means of the Erie Canal, is equally immense; and to this the numerous and extensive railway communications contribute very largely. Steamers, sailing packets, and merchant vessels are constantly leaving for nearly all the ports of the habitable globe. When, with the above particulars, it is stated that the population, ascertained to be 60,489 in 1800, was estimated to have increased in 1854 (embracing a period of little more than half a century) to 700,000,—more than eleven-fold increase,—no comment is required to establish the fact of the amazing rapidity with which this great city has advanced in population and wealth,—a character which, despite the occasional recurrence of monetary crises necessarily affecting every commercial emporium, it still continues to exhibit to the admiration of the world. New York is ornamented with many commodious and beautiful buildings; its principal street (Broadway) will compare most favorably with the finest street in any city of Europe,—it is now the great mart and the fashionable promenade. The City is supplied with water from the Croton River, by an aqueduct 41 miles in length. It has upwards of four thousand manufacturing establishments, many of them very extensive. From all parts of the railway and steamboat routes of Canada there are convenient lines of communication with this EMPIRE CITY: at Quebec, by the Grand Trunk; at Montreal, by the Champlain and St. Lawrence and Montreal and New York; at Ottawa, by railway to Prescott, and thence by ferry to Ogdensburgh; and at numerous points westward to Buffalo. Distant from Liverpool 2980 miles, from Quebec 550 miles, from Montreal 460 miles, and from Toronto 500 miles. Population, including Brooklyn, nearly 1,000,000.

MARKS'

PATENT

AND

IMPROVED

ARTIFICIAL LIMBS.

THESE LEGS, as now improved, are without doubt the nearest approach to nature of anything of the kind ever yet produced, both in external appearance and mechanical operation, all external deformities are avoided in their construction, and the machinery is perfectly adjustible and easy of access without any obstructions. They are WATER PROOF and LIGHT, yet STRONG and DURABLE, are worn with the greatest ease, and applicable to all kinds of amputations.

ARTIFICIAL HANDS, containing many valuable improvements both as to appearance, ornament and usefulness, are applied with the very best of success.

These Limbs are all furnished at moderate prices, and can be made from measurements and sent to any part of the World. Full descriptions and certificates, references, &c., sent free to all applicants, by mail or otherwise.

ARTIFICIAL LEGS AND HANDS.

IMPORTANT TO THOSE REQUIRING ARTIFICIAL LIMBS.

SELPHO'S ANGLESEY,

WITH his newly invented PATENT ELASTIC LATERAL JOINTS (Patented May 6, 1856,) combining all the advantages of his celebrated ANGLESEY LEG with the addition of the elastic and lateral or side motion of the ancle joint, by means of which the foot accommodates itself to uneven surfaces (similar to the natural ancle, giving great firmness to the steps and real comfort to the wearer. W. S. having had nearly 30 years practice in his profession offers the above with confidence as a really great improvement; and all who have had the misfortune to lose a *Leg* may rely upon obtaining the best substitute the world affords. It is now 18 years since W. S. introduced the ANGLESEY LEG into this country, its superiority was quickly seen, and as a natural consequence numerous imitations have sprung up, but the ANGLESEY LEG has never been surpassed because it is nearer the principle of the Natural Leg. The Marquis of Anglesey, (from which it derives its name) found none equal to it, and wore it from the time he lost his *Leg* at the Battle of Waterloo till his death, in preference to all others. It has been tested in every possible way by all classes, male and female, and improvement added as experience shewed necessary, until it has attained its present perfection, and certificates can be shewn to those who wish it, from numbers who are wearing pairs, and others, and the subscriber is prepared to apply it in all cases of amputation and guarantee success.

ALSO,

SELPHO'S ARTIFICIAL HAND,

A really useful substitute for a lost *Hand*, so arranged that the wearer can open and shut the fingers, pick up and hold articles, &c., &c.

BILLIARD TABLE

MANUFACTORY,

No. 106, FULTON STREET,

(Late of 61 Ann St., and formerly of the firm of Penn & Moore,)

NEW YORK,

ESTABLISHED IN 1833,

WHERE he keeps on hand, and makes to order, BILLIARD TABLES of the best quality and workmanship. Also, for sale, Billiard Cloths, Silk and Worsted Pockets and Fringe, Cues, Maces and Counters, Printed Rules for the Game, &c.

N.B.---Billiard Tables repaired in the best manner.

New York, October, 1857.

PHELAN'S MODEL BILLIARD TABLES & COMBINATION CUSHIONS.

PATENTED 19TH FEBRUARY, 1856.

FROM an elaborate and discriminating review of those improvements in the billiard table for which Mr. Phelan has received a patent,—which review appeared in the *Scientific American* of Dec. 23rd, 1855,—we condense the following summary of those improvements, and respectfully commend them to the consideration of parties interested in the progress of the game.

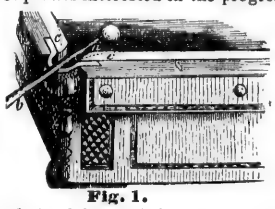

Fig. 1.

The dotted lines *c c* in Figure 1, show the old style of curving "jaws," in use before Phelan's improvement. Their gradual slope deceived the eye, and they could not "take" a ball as neatly and easily as those in use on the models. By extending the cushions to their natural length in a straight line, as seen in cut, some thirty inches of correct rectilinear surface is added to the space to be played on, and many strokes can be made on these tables which were impossible on the old. The pocket irons, it will be seen, are both lower and stronger than those previously in use—their thickness being uniform throughout, and not weakened, as in the old style, at the very part where strength was most required. From their downward curve they admit of the cue being held in a horizontal position when playing on a ball which hangs over the pocket.

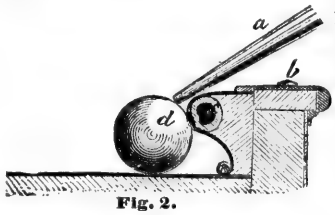

Fig. 2.

In Figure 2, *b* represents the old style of "sight," raised above the level of the side, and therefore inconveniencing the player. By contrasting the height of the cushion and the consequent elevation of the cue, with the horizontal position in which the cue may be held, while playing at ball *e* under one of the Combination Cushions, (Fig. 4) the immense advantage of Mr. Phelan's alteration must be at once perceived. The cushion represented in Figure 2, is made of India rubber, sometimes "solid," at others "hollow," and when the ball comes in contact with this kind of cushion, it sinks in and imbeds itself as shown by the dotted line upon the ball *d* in Figure 3.

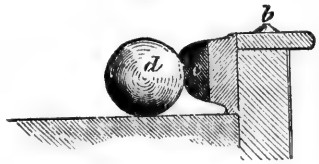

Fig. 3.

In Figure 3, the part marked *c* represents a section of the "English pattern" india rubber cushion; and the dotted line on *d* shows the depth to which, on account of its excessive elascity, the ball may imbed itself. Striking any of these india rubber cushions at an angle, and imbedding itself as represented, the india rubber displaced by the shock is forced to swell out in front of the impinging ball, thus making in fact a second cushion *before it*, and consequently causing it to rebound at an improperly acute and irregular angle of reflection.

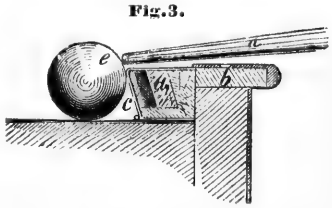

Fig. 4.

Figure 4 represents a section of the patent combination cushion, in which, after a long series of experiments, the patentee succeeded in fulfilling the various requirements of science. The "sights" are inlaid so as not to impede the player's action. The cushions are so low as to admit of the cue's being held in a horizontal position while striking over them; and yet from their peculiar form and the substance of which they are composed, the ball after striking them is not liable to "jump," or "hop." Neither so absurdly elastic as the india rubber, nor so dull as "cloth," they are made of materials which no change of climate can affect, and which throw back the impinging ball at an angle of reflection mathematically correct and certain. To all who love the stirling science of the game—to all, in fact, except those who play for "frantic scratches"—the beautiful precision of rebound in the Combination Cushions will give unlimited satisfaction.

Upwards of a year has now elapsed since their first introductiion to the public, and the proprietor has yet to hear the first complaint against their durability, and the excellence which they originally exhibited. Numerous improvements have been made in the tables since the first were manufactured, and the patentee now flatters himself that he has succeeded in bringing them to as great a state of perfection as our present knowledge of the arts will admit.

They have received the warm approval of the first amateurs and professional players in the country; they have been adopted, even in the first year of their existence, by many of the best clubs and hotels of New York, Philadelphia, Boston, Baltimore and elsewhere; and scarcely a day passes that we are not called upon to replace the false and exploded cushions formerly in use, with new sets of Mr. Phelan's improvement.

JOHN C. RIKER,

PUBLISHER AND WHOLESALE BOOKSELLER,

315 BROADWAY, NEW YORK,

Invites the attention of Booksellers to the following valuable Works:—

The Marsh Series of Works on the Practice of BOOK-KEEPING.

The Course of Book-Keeping by Double Entry. Printed in Colors. 220 pp. octavo, bound in cloth. Price, $1.25.

This work contains a complete set of Account Books and Mercantile Forms, with an ORIGINAL DIAGRAM, and ninety pages of familiar explanations, dated to apply directly to the entries and transactions in the account books; also, thirteen pages of Mercantile Calculations, Discount and Interest, Insurance, Equation of Payments, Exchanges, &c. It is admirably adapted for Schools and Counting Houses, and for Private Instruction.

The Course of Book-Keeping by Single Entry. Improved by the introduction of a Proof or Balance. (New Edition.) Printed in Colors. 142 pp. octavo. Price, 75c.

This work embraces a thorough course of instruction in keeping books by Single Entry. A complete set of books filled with a good variety of business transactions, through which the instruction conducts the student by progressive steps. Most particularly adapted to schools.

Blank Books in Sets, for Practice of Book-keeping. A very neat and appropriate set of Blanks, with instructions, got up expressly for the use of Pupils in Book-keeping, on superior paper. By C. C. Marsh. Price, per set, 75c.

Mr. Marsh is also author of the above works in the **SPANISH LANGUAGE,** and of an elaborate work on "The Theory and Practice of Bank Book-keeping, and Joint Stock Accounts."

"Most of the works heretofore issued make 'confusion worse confounded;' but THE ADMIRABLE SYSTEM OF JOURNALIZING ORIGINATED BY MR. MARSH, is so plain and comprehensive that the student cannot possibly misunderstand.

"The work is dedicated to the clerks of this country—to them we cordially recommend it."

THE COMPLETE WORKS OF THOMAS JEFFERSON.

Printed from the Original Manuscripts, by authority of Congress, comprising his Autobiography, Correspondence, and other writings, Official and Private; also, his celebrated Manual of Parliamentary Practice. 9 vols. 8vo. Price, Cloth, per vol., $2. Do. half-calf antique, $2.75.

"The work is admirably gotten up, well arranged for reference, and illustrated by satisfactory and intelligent notes. The first volume contains an elegantly engraved likeness of Jefferson, and a specimen of his autograph, being a FACSIMILIE OF THE ORIGINAL DRAFT OF THE DECLARATION OF INDEPENDENCE.

This work is an individual donation to the people of America, and to the whole world also, as it contains the germs of Republicanism that developed themselves so gloriously in this land, and are sinking in the hearts of the oppressed in every nation under the heavens. It is the duty of every American citizen to familiarize himself with the teachings of this inspired Apostle of Freedom. All of us profess to belong to the Jeffersonian school; yet how few are acquainted with his lessons of wisdom! We have now an opportunity of acquiring them."

For other works, THEOLOGICAL, SCHOOL and MISCELLANEOUS, also, AUTOGRAPH BOOKS, ALBUMS, SCRAP-BOOKS, &c., see J. C. RICKER'S TRADE LIST.

Country Merchants, Booksellers, Librarians, School Committees, &c., furnished at the lowest Prices. Orders promptly attended to.

THE BOOK OF

MEN, WOMEN AND BABIES,

Or the Laws of God applied to the Obtaining, Rearing, and Developing the Natural, Healthful, and Beautiful in the Human Being.

BY DOCTOR PORTER, OF NEW YORK. (PRICE ONE DOLLAR.—POSTAGE FREE.) OFFICE 216 FULTON STREET.

TO THE PUBLIC.

READ THIS.

Do you wish to obtain, retain, and enjoy a pleasing countenance, a well formed body, glorious health, and mental happiness? Do you wish to know all that is known of the human body, Male and Female, and of Health and Disease, with the means for preserving the former and healing the latter? Then read this book—it will teach you.

PARENTS.

The United States Journal thus addresses you—

"Here is a book that all mamma-and-papa-dom ought to read—aye, and study and adopt as part of their practice. It is full of valuable hints, and dispenses instruction which, if known and acted upon, would give our babies a fair start in life, *at the start* and enable them to grow up well developed men and women.

"Racy, interesting, and instructive, however, on the whole, is this book about Men, Women and Babies—*almost the dearest trinity of human interest.*"

MOTHERS.

Says the *Daily Times*, "will find in this book many practical hints, and such instructions as will supersede the necessity of calling in a physician upon all occasions, and otherwise tend to the promotion of health and contentment in their household."

WIVES.

Who desire a correct knowledge of the whole science of the Human Body may read this book with great profit.

YOUNG MEN AND WOMEN.

This book shows you *why* Health in a human being, is the perfection of bodily organization, and the full expression of all the faculties and passions acting in harmony together with reason. It will show you that Health is Beauty, Energy, Purity and Happiness. As the *N. Y. Sunday Atlas* says—

"Such is the title of a book of real, practical utility, and which contains more sound philosophy and good sense than we have ever seen in a book of the kind before. The Doctor's observation in choosing mates for life, and upon marriage and the rearing of children, meet with our cordial approbation."

☞ TO CLERGYMEN AND TEACHERS—This is a treatise on the whole science of MAN; it contains the highest and deepest truths in each department of human Physiology, with their individual application; discusses the effects of Food, Drinks, Clothing, Air, Exercise, Sleep, on both body and mind; and points out the means of removing the terrible evils which are destroying Health, shortening Lives, and sacrificing the Happiness, here and hereafter, of millions.

Just Published, by the same Author,

HOW TO LIVE 100 YEARS, OR MORE.

THE BOOK OF LIFE, HEALTH AND DEATH, HOW TO KEEP YOUNG,

AND HOW TO KEEP GOOD LOOKING.

Price one Dime; 12 *copies* $1; *Post Paid.*

"This admirable little work is written in an easy, intelligible style, and arranged in short chapters. It is worthy to be in the possession of all who desire their own or the world's welfare."—*N. Y. Sunday Times.*

"This is a valuable pocket volume for man, woman and child; there is more wholesome information compressed into it, on the conduct of life, than ever before was in print."—*N. Y. Sunday Courier.*

PROFITABLE EMPLOYMENT FOR THE YEAR.

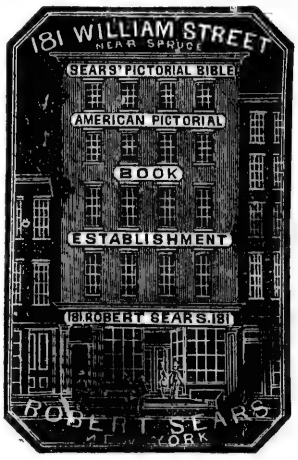
PLEASE TO READ THIS! AGENTS WANTED! EXTRA INDUCEMENTS FOR 1858.

☞ ALL PERSONS IN WANT OF EMPLOYMENT will at once receive our CATALOGUE OF BOOKS for the New Year, prepaid, by forwarding us their address. Particular attention is requested to the liberal offers we make to all persons engaging in the sale of our Large Type Quarto **PICTORIAL FAMILY BIBLE**, with about ONE THOUSAND ENGRAVINGS. Our books are sold only by canvassers, and are well known to be the most saleable. To men of enterprise and tact, this business offers an opportunity for profitable employment seldom to be met with. Address (postpaid)

ROBERT SEARS, Publisher, 181 William st. New York.

☞ We feel anxious to introduce our "LARGE TYPE QUARTO PICTORIAL FAMILY BIBLE," with about 1000 Engravings, into Canada, and trust you will order at least one Copy for your own family. It will be forwarded at the New York retail price, SIX DOLLARS, prepaid, to any central point, on an Express Route; or two Copies for TEN DOLLARS, remitted in Canada Money. SUCH A WORK IN ENGLAND WOULD COST ABOUT THREE TIMES THIS SUM.

The $25 Box of Specimen Books, assorted, as per Catalogue, at the Wholesale Prices, will be forwarded, FREE OF EXPENSE, to any well known place in Canada.



☞ An Elegant GIFT for a father to present to his family. Price only SIX DOLLARS, well and substantially bound.

CHRISTIAN READER! HAVE YOU A FAMILY BIBLE?

☞ *Secure without delay this precious gift for your Wife and Children.*

☞ The following Work is destined, if we can form an opinion from the Notices of the Press, to have an unprecedented circulation in every section of our wide-spread continent, and to form a distinct era in the sale of our Works. It will, no doubt, in a few years become the FAMILY BIBLE OF THE CANADIAN PEOPLE:

SEARS' LARGE TYPE QUARTO BIBLE,

FOR FAMILY USE, ENTITLED

The People's Pictorial Domestic Bible;

Being the OLD and NEW TESTAMENTS, *according to the Authorized Version.* Illustrated with about One Thousand Engravings, representing the Historical Events, Landscape Scenes, Antiquities, Costumes, Beasts, Birds, Insects, Plants, and Trees, Minerals, Coins, Medals, Inscriptions, from the most Authentic Sources.

WITH FIFTY THOUSAND MARGINAL REFERENCES.

To which are added, Ancient Chronology, by Abraham Colovius; a Summary of the whole Scripture; an accurate Copperplate Map of Palestine; a beautiful engraved Family Record, etc., etc.

☞ *Each Chapter commences with an Illuminated Letter.*

The whole printed upon superior paper, and substantially and elegantly bound in one quarto volume of FIFTEEN HUNDRED PAGES.

☞ The Text, together with the marginal references, is printed from the standard edition of the American Bible Society.

☞ On the receipt of SIX DOLLARS we will forward, free of all expense, to the agent or purchaser, a copy of the BIBLE, with a bound SUBSCRIPTION BOOK, carefully boxed; and guarantee its safe delivery and perfect condition to any central town or village throughout the United States, or any part of Canada, Nova Scotia and New Brunswick.

*** Register your letters at the Post Office, and your money will come safe. It will cost you five cents on each letter. Use a whole sheet when you inclose bills, and have the letter well and securely sealed.

*** Any further information you may desire relative to this enterprise will be cheerfully given by addressing as above.

OR PERAMBULATOR.

GOULD'S PATENT.

This Carriage is superior to every thing of the kind now in use, both for safety, ease, comfort and elegance. There is no doubt but that they will supersede all other kinds, as they have done in Europe, where none who have children would be without them. The great advantages are that you have always the children before you. They are so easily managed that they can safely be trusted to the care of a child. In crossing streets where there are high curbstones, or wide or deep gutters, they pass over with equal ease and safety. They are so built that they cannot possibly turn over—can be used in the nursery as well as in the streets or parks. They are recommended by all physicians as being conducive to children's health and comfort. Ladies giving their children an airing in this Carriage will find it a pleasing and elegant recreation, as they do in London or Paris.

Are Proprietors for the United States.

Price, as above, $18; if with top, $22.

THOSE AWFUL AND TERRIFIC ACCIDENTS,

daily happening from the careless handling of Camphene and Burning Fluid, can forever be stopped by the use of

PRATT'S PATENT

SAFETY LAMP AND FEEDER.

This Lamp cannot explode from overturning while lighted.

This Lamp cannot explode by filling it while lighted.

This Lamp cannot explode from overflowing while lighted.

This Lamp cannot explode from any known cause.

This Lamp cannot explode when filling if the Fluid takes fire.

This Lamp cannot explode by the wick (if too small) dropping inside while lighted.

New York, October, 1587.

This Lamp is the cheapest, best and safest ever offered to the public.

With this Lamp and Feeder in conjunction, the most explosive compounds may be carelessly used, with no greater danger than Sperm or Lard Oil.

Prices of Pratt's Patent Safety Fluid Lamps, with extra strong brass mountings:

Planished Tin—No. 1, five inches high, 50 cents each; No. 2, seven and a half inches high, 62½ cents each; No. 3, nine inches high, 75 cents each.

Extra Fine Britannia Lamps—No. 20, eight inches high, price $1 each; No 21, ten inches high, price $1 25 cents each.

Air-Tight Fluid-Saving Cans—One quart, 50 cents each; half gallon, 62½ cents each; one gallon, 75 cents each.

THROUGH IN SIX MINUTES.

AUSTIN'S PATENT

CREAM FREEZER,

An extraordinary and astonishing improvement in
CREAM FREEZING.
Will freeze in
SIX MINUTES,
by a simple and elegant application of well-known principles, producing this desirable and surprising result. A child of ten years can manage it without difficulty.

Three SILVER MEDALS, awarded by the Maryland Institute, and FIRST CLASS DIPLOMA of the Metropolitan Mechanics' Institute, attest the superiority of this apparatus over all others.

As a further and convincing proof of the excellence of this Freezer, the undersigned would state that THOUSANDS have been sold since the patent was issued.

The largely increasing demand for this popular article induces the Agents to remind dealers to forward their orders early, and thereby prevent delay.

Orders by mail will meet with prompt attention.

Annexed is a list of the retail prices of the Freezer, for the convenience of those wanting a single one:

PRICES OF FREEZER.—Two quarts, $2: Three quarts, $3; Four quarts, $4; Six quarts, $5; Nine quarts, $6; Fourteen quarts, $8; Twenty quarts, $11.

No. 601 Broadway, New York, Agents for Patentee.

AUSTIN'S ICE-WATER PERCOLATER.

FILTER AND COOLER COMBINED.

This apparatus will be found, on trial, admirably adapted to the speedy and effectual purification of turbid hydrant, rain or river water, for drinking, cooking and washing purposes, where perfectly clear water is requisite. Southern and Western merchants visiting New York are specially invited to call and examine this article, as it is believed that one of the prominent causes of fevers arise from the use of impure water.

For all localities where the water is impure—for the use of Ocean and River Steamers, Hotels, Public Institutions and families, we offer this FOUNTAIN OF HEALTH. For sale by J. & C. BERRIAN.

B. T. BABBITT'S A[illegible]RATUS

FOR

ENEMA-GIVING,  OR INJECTION,

PATENTED, MARCH 17, 1857,

Is one of the most simple constructions that has ever appeared before the Public, and is called the

FOUNTAIN PORTABLE INJECTOR.

It operates by gravity or weight of water, or whatever fluid employed. It has *no valves*, no cocks, no pump, no pistons to dry up and become unfit for use; and it operates without *labor*,—it is easily kept clean, and is cheaper than any other offered in market, and will not get out of order in twenty years, nor *dry up* like some.

What led the Proprietor to *invent* this INJECTOR, was, that to his great astonishment, he cured the Dysentery with an Injector in a very short time, which he had been subject to for months, and nothing would cure until the application of the Injector, and he has not been troubled with it since—it acting like a charm.

No *child, woman or man*, need suffer with the Cholera, Dysentery, Piles, Vomiting, Fevers, Inflammation in the Bowels, etc.

Evacuate the bowels independently of any cathartic or purgative effect.

Shield the intestines from irritating matter or secretions.

Relieve painful and spasmodic affections of the intestines and stomach.

Dislodge worms from the rectum.—Produce a cathartic, tonic, or other Medicinal effect where the stomach is too irritable to tolerate medicine.

Relieve the sufferings from Piles, and other disorders of the rectum.

Afford nourishment to the system when there is an inability to swallow. Injections make a prompt impression upon the general system, and are useful in a variety of diseases, as Croup, Hysteria and Convulsions, Determination of blood to the head, Inflammation also of the Liver; Kidneys, Tetanus or Lock-jaw, Hydrophobia, etc.

The rectum and adjacent organs are powerfully impressed by injections, and consequently they exercise a beneficial influence in inflammation of the bladder, and womb, as also in retention of urine, painful stricture of the urethra, flooding after childbirth, &c.

Persons of a costive habit who are troubled with tedious or painful stools, or who suffer with a disagreeable or uneasy sensation in the rectum for many hours after a stool, will find injections of great value in relieving the bowels, as they will procure an immediate evacuation, and greatly diminish the sufferings which would otherwise ensue; in suspended animation, warm stimulant injections are sometimes of great importance in arousing the dormant energies of life, and deserve to be remembered, when other means are likely to fail. *Life* has been sustained for *sixty* days by injections, where the individual has been unable to swallow.

There are very few ailments in which injections are not more or less beneficial, and in the slighter disorders to which the people are exposed, they will be found to constitute a safe and efficient class of domestic remedies.

SOMETHING NEW.

B. T. BABBITT'S BEST MEDICINAL SALERATUS

IS MANUFACTURED FROM COMMON SALT. B. T. BABBITT'S BEST SALERATUS

68 AND 70 | Is prepared entirely different from other Saleratus. All the deleterious matter extracted in such a manner as to produce Bread, Biscuit, and all kinds of Cake, without containing a particle of Saleratus when the Bread or Cake is baked: thereby producing wholesome results. Every particle of Saleratus is turned to gas and passes through the Bread or Biscuit while baking, consequently nothing remains but common Salt, Water and Flour. You will readily perceive by the taste of this Saleratus that it is entirely different from other Saleratus. When you purchase one paper you should take the old paper with you, and be very particular and get the next exactly like the first (name and picture, twisted Loaf Bread, with a glass effervescing water on the top, as you see in the bill.)

Full directions for making Bread with Sour Milk and Cream Tartar, and all kinds of Pastry: also, for making Soda Water: also, directions for making Seidlitz Powders, will accompany each package. | 68 AND 70

WASHINGTON STREET, N.Y., AND AT 38 INDIA STREET, BOSTON.

PURE POTASH IN TIN CANS.

B. T. BABBITT, 68 Washington Street, N. Y.; and 38 India Street, Boston.

The proprietor of this POTASH has for many years seen the necessity of having some reliable standard for the strength of Potash. The adulteration has become so general, that it has, notwithstanding its valuable properties, gone nearly out of use.—The proprietor has taken the responsibility of subscribing his name to every package, and warrants the strength to be uniform, and when used always producing the same results. Potash many times is adulterated with salt, which is destructive in making soap. It makes the Ladies say they did not have good luck, &c. One other reason why Potash has gone out of use is, because it is so unpleasant to handle, being put up in wooden casks, and becoming a liquid in many cases, and very troublesome to the retailers.

Now the proprietor first obtains pure Potashes, always being of the same strength, and producing the same results; and will warrant it in all cases, if the directions are followed, to produce double the effect in making soaps, and all other purposes for which Potash is used, with full directions for making the best of Soft, Hard, or Fancy Soaps. It is made with little trouble; the lye is all prepared in five or ten minutes.

1 lb. Potash warranted to cut 5 lbs. of grease into good Soap.
12 lbs. will make one barrel of beautiful Soft Soap.
Directions for making Soft Soap.
Directions for making Hard Soap.
Directions for Laundries and Hotels.
Directions for cleaning cotton waste that has been used for cleaning machinery of all kinds.
Directions for using this Potash in place of Sal Soda.
Directions for sticking india-rubber soles on Shoes.
☞ All the above directions accompany the can.

A BEAUTIFUL HEAD OF

RICH GLOSSY HAIR;

Completely Preserved to the Greatest Age.

And who that is gray would not have it restored to former color; or bald, but would have the growth restored; or troubled with dandruff and itching, but would have it removed; or troubled with scrofula, scald head, or other eruptions, but would be cured; or with sick head ache, (neuralgia) but would be cured. It will also remove all pimples from the face and skin. PROF. WOOD'S HAIR RESTORATIVE will do all this, see Circular and the following:—

ANN ARBOR, November 5, 1856.

PROF. O. J. WOOD.—Dear Sir: I have heard much said of the wonderful effects of your Hair Restorative, but having been so often cheated by quackery and quack nostrums, hair dyes, &c., I was disposed to place your Restorative in the same category with the thousand and one loudly trumpeted quack remedies, until I met you in Lawrence county some months since, when you gave me such assurance as induced the trial of your Restorative in my family—first by my good wife, whose hair had become very thin and entirely white, and before exhausting one of your large bottles, her hair was restored nearly to its original beautiful brown color, and had thickened and become beautiful and glossy upon and entirely over the head; she continues to use it, not simply because of its beautifying effects upon the hair, but because of its healthful influence upon the head and mind. Others of my family and friends are using your Restorative with the happiest effects; therefore, my scepticism and doubts in reference to its character and value are entirely removed; and I can and do most cordially and confidently recommend its use by all who would have their hair restored from white or gray (by reason of sickness or age) to original color and beauty, and by all young persons who would have their hair beautiful and glossy.

Very truly and gratefully yours,

SOLOMON MANN.

WAYLAND, MASS., Feb. 5, 1857.

PROF. O. J. WOOD & Co.—Gents:—Having realized the good effects of your Hair Restorative, I wish to state, that finding my hair growing thin, as well as gray, I was induced from what I read and heard, to try the article prepared by you, to promote its growth and change its color as it was in youth; both of which it has effected completely. In the operation I have used nearly three bottles.

Yours &c.,

JAMES FRANCIS.

CARLYLE, ILL., June 28, 1852.

I have used Prof. O. J. Wood's Hair Restorative, and have admired its wonderful effects. My hair was becoming, as I thought, prematurely gray; but by the use of his Restorative it has resumed its original color, and have no doubt permanently so.

S. BRESSE, ex-Senator, U. S.

DOVER, N. H., Feb. 2, 1857.

PROF. O. J. WOOD & Co.—Gents: Within a few days we have received so many orders and calls for Prof. O. J. Wood's Hair Restorative, that to day we were compelled to send to Boston for a quantity, (the 6 dozen you forwarded all being sold,) while we might order a quantity from you. *Every bottle we have sold seems to have produced three or four new customers*, and the approbation and patronage it receives from the most substantial and worthy citizens of our vicinity fully convince us that it is a MOST VALUABLE PREPARATION.

Send us as soon as may be one gross of $1 size; and one dozen $2 size; and believe us yours very respectfully,

(Signed) DANIEL LATHORP & CO.

HICKORY GROVE, St. CHARLES Co., MO., Nov. 19, 1856.

PROF. O. J. WOOD.—Dear Sir:—Some time last summer we were induced to use some of your Hair Restorative, and its effects were so wonderful, we feel it our duty to you and the afflicted to report it.

Our little son's head for some time had been perfectly covered with sores, and some called it scald head. The hair almost entirely came off in consequence, when a friend, seeing his sufferings, advised us to use your Restorative, we did so with little hope of success; but, to our surprise, and that of all our friends, a very few applications removed the disease entirely, and a new and luxuriant crop of hair soon started out, and we can now say that our boy has as healthy a scalp, and as luxuriant a crop of hair, as any other child. We can therefore, and do hereby recommend your Restorative, as a perfect remedy for all diseases of the scalp and hair. We are, yours respectfully,

GEORGE W. HIGGINBOTHAM,
SARAH A. HIGGINBOTHAM.

GARDINER, MAINE, June 27, 1855.

PROF. O. J. WOOD.—Dear Sir:—I have used two bottles of Professor Wood's Hair Restorative, and can truly say it is the greatest discovery of the age for restoring and changing the hair. Before using it I was a man of seventy. My hair has now attained its original color. You can recommend it to the world without the least fear, as my case was one of the worst kind.

Yours respectfully,

DANIEL N. MURPHY.

PRESERVATION OF THE HAIR.—In all ages and among almost all tribes of men, a beautiful head of hair has been, and still is, regarded as the fairest ornament of the fairest works of the Creator. The patrician dames and damsels of ancient and modern Rome bestowed that attention upon the hair which has added the crowning beauty to the *chef d'œuvre* of the sculptor and the painter; and no lady, and indeed no gentlemen, of modern times, is unmindful of this exquisite shield and lovely ornament of the race. To maiden beauty it is the finishing touch; to manhood it is the symbol and warrant of strength and nobility, to-day as in the days of the patriarchs; indeed, such it always has been and always will be.

But unable as we are to withstand the ills of time and life, it often happens that through disease and misfortune we become gray in early life, and bald before we reach the full grace of womanhood or the full stature of manhood. Then it is that, however much we may venerate the gray locks and reverence the wisdom of bald heads among the honored remnants of the generation of three score and ten, we know that our gray hairs are no more venerable than beautiful; while our bald heads are neither the one nor the other; but, on the contrary, are quite the reverse of both, and impose upon us many social and sanitary disadvantages and discomforts.

Then it is that the man who can relieve us of the misfortune, and restore the fleecy locks to their original color and growth, becomes a real friend and benefactor, by the force of this single exhibition of his genius and skill. And much as we are opposed to empiricism, and empiric as we instinctively regard the pretensions of every one proposing to accomplish such a miraculous work, until we have seen the triumph of his undertaking, we nevertheless esteem it a pleasure, resting upon our absolute knowledge of its merits, to recommend Professor Wood's Hair Restorative as the best article of the kind with which we are acquainted, and one which has done, under our own observation, all that it claims—and it claims everything implied in its name.

This article, in short, will restore gray hair to its original color, and add to its growth and beauty wherever any blight or disease has checked that growth or marred that beauty. It has been proven in our own family within a few weeks, and in numerous other cases related to us, without the knowledge of the proprietor. We have only to add, that this most valuable article is for sale by the proprietor, at No. 312 Broadway.—*New York News.* Sold by all respectable Druggists.

O. J. WOOD & Co., Proprietors, 312 Broadway, New York, (in the great N. Y. Wire Railing Establishment,) and 114 Market st. St. Louis, Mo.

And sold by all good Druggists in the United States and Canada.

New York, October, 1857.

BATCHELOR'S HAIR DYE.

THIS CELEBRATED HAIR DYE is the Best in the World; its celebrity has reached the whole circumference of the globe; every country where civilization exists have patronized this surpassingly excellent HAIR DYE; 20 Years' attention to its Manufacture, its practical application at Batchelor's Establishment in New York, upon over 200 Thousand persons, the Diplomas, &c., attest the fact that the superiority of this Dye can never be lessened; observe the Hundreds of Dyes, so called, put forth to rival this grand original—note the ridiculous dilemmas they lead those into who unfortunately use them; the Rainbow Tints, the Blisters, the Fits, the destruction of the Hair, &c., &c. Avoid the risk of these evils, use your judgment, and avail yourselves of the Lustrous Black or Beautiful Brown, produced by WM. A. BATCHELOR'S HAIR DYE, made, sold, and applied at the

FACTORY, 233 BROADWAY, NEW YORK.

And to be obtained of every respectable Druggist in Canada and the States.

INDIAN DOCTOR.

DOCTOR RUFUS WRIGHT,

OF

No. 74 East Broadway, New York,

Is well known as the INDIAN DOCTOR having been in practice for near Thirty Years, most of the time in New York City. He is at liberty to refer to some of the first families in this city, some of them professional gentlemen, well known to the public, where he has performed wonderful cures. Dr. Wright's practice is *unique*. He follows no man, copies no man, has a theory of his own, differing from all other practitioners in this city. Dr. Wright's theory is that of *restoration* in opposition to that of *prostration*. He does not believe in knocking a person down to show his skill in picking him up, in other words, to reduce a person to the lowest extremity, and then show your wisdom in raising him. He considers it wrong to give a patient an article of medicine which would destroy life if given to a certain extent. He believes that in all cases the *food and medicine should agree*, the food to nourish and strengthen the body, and the medicine to act as a friend, who carefully supports his patient with one hand while he (as far as possible) with the other removes his diseases; that animal heat is the life of the blood and the blood is the life of the body, the heat is derived from the food, this being decomposed by the organs of digestion; the caloric which is contained in the food is liberated and taken up by the lacteals with the chyle, and carried into the circulation of the blood. Furthermore, that all articles of medicine, whether they be mineral or vegetable, that do not agree with the above principles, should be rejected as unsound in theory and injurious in practice. For over a quarter of a century, Dr. Wright has tested his theory in a *successful practice*, and in all cases where there was life enough left for medicine to act upon he has met with universal success.

Dr. Wright has treated with success all the cases which are described by medical authors. He has cured *Consumption, Dropsy, Hydrophobia, Lock Jaw, Hip Disease, Amaurosis*, and Fevers of every kind. He can prepare medicine which will break any fever in from one to three hours without injury to the patient. The Doctor keeps constantly on hand a general assortment of Roots and Herbs of American growth.

Let none despair who are afflicted with any of the diseases to which flesh is heir; but be sure to give the Doctor a call. Dr. Wright has been very successful in the cure of patients who were given up by other physicians.

LYON'S MANIFESTO.

WHEREAS, Counterfeiters and Imitators, moved by a desire to share the profits accruing from the sale of LYON'S MAGNETIC POWDER and PILLS with the Inventor of those articles, have got up a variety of POISONOUS COMPOUNDS to represent the same; Therefore, be it known, that the only POISONLESS, INFALLIBLE and IMMEDIATE MEANS of DESTROYING BEDBUGS, ROACHES, PLANT LICE, ANTS, MOTHS, FLIES, and other insects, is LYON'S MAGNETIC POWDER; and that the only preparation which can be depended upon for cleaning houses, &c., of RATS and MICE, is LYON'S MAGNETIC PILLS. The Certificates to this effect are of a higher character than were ever before given to an inventor or discoverer of any article used for domestic purposes. LYON has received four national medals, together with letters from Prince Albert, the King of Prussia, the President of the United States, and the first Scientific Men in Europe and America. He invites attention to the same, at his Central Depot.

HALSEY'S

FOREST WINE & GUM-COATED FOREST PILLS.

PUBLIC CAUTION.—In 1845, after years of study and labor in the discovery of my Recipes, I began the preparation of my FOREST WINE AND PILLS on an extensive scale to meet the wants of suffering humanity, having had ample proof of their great efficacy. Their merits soon became known to liberal minded Physicians and the Invalid public, and the good effects experienced by all who used them, rapidly spread the demand for them throughout the United States and Foreign countries.

The high reputation and great popularity of the Forest Wine and Pills soon began to excite the avarice of unprincipled men, who issued bogus spurious articles under the name of "Forest Wine Bitters," and other similar names, presuming by this proximity of name to that of the genuine, to deceive the public, at the same time evade the law. These vile attempts to impose upon the public seldom met with success. Respectable Druggists and Dealers readily discovered the fraud and shunned the imposition, which such as innocently became the victim of Bogus imitations no sooner attempted to sell it than, to their disgrace, it was at once returned to them. Nevertheless, it is our duty to place the Public on their guard against such fraudulent articles. It should be understood that the *Original* and *True Forest Remedies* bear the names *Halsey's Forest Wine* on each bottle, and *Halsey's Gum-coated Forest Pills* on each box. The public should examine the label and purchase of men of integrity.

The following are the names of some of my Wholesale Agents in Upper and Lower Canada, where Country Dealers may rely on getting the Genuine Forest Wine and Pills, and on as favorable terms as they can be procured at my General Depot in New York.

Joseph Bowles, John Musson	Quebec.	Hamilton, Muir & Co	Hamilton.
Lyman, Savage & Co., Carter Kerry & Co.	Montreal.	Fred. Pafford	St. Catharines.
John Roberts, Jennings & McCarthy	Ottawa City.	John Leslie, Joseph P. Thornton	Dundas.
W. C. Allen	Cornwall.	O. C. Mills	Brantford.
C. H. Peck	Prescott.	John Mitchell	London.
Allan Turner	Brockville.	N. Higginbotham, Andrew Oliver	Guelph.
John S. Combe	Perth.	Parker & Cottel	Owen Sound.
E. W. Palmer	Kingston.	R. B. Reynolds	Goderich.
E. C. Chandler, R. Holden & Co	Belleville.	John Lloyd, S. W. Farrel	Port Sarnia.
Chapman & Stuker	Picton.	C. B. Donnelly, Hegley & Cross	Chatham.
Ormond & Gilmore	Peterboro'.	David Parish, L. M. Sprague	St. Thomas.
Chas. Brant	Port Hope.	N. H. Smith	Watertown, N. Y.
Lyman, Brothers & Co., S. F. Urquhart	Toronto.	Isaac Post	Rochester, N. Y.
J. Birkle & Son, Winer, Moore & Co	Hamilton.	Demorst & Holman	Buffalo, N. Y.

And for sale by the appointed Agents in almost every Town and Village in the United States, Canada and British Isles, and by the Proprietor at the General Depot, 64 Walker st. New York. Should there be any Village where Halsey's Forest Wine and Pills are not kept for sale, some one of the Druggists or Storekeepers will send for it for their Customers if requested to do so.

PIANOS,

MELODEONS & MUSIC.

PRICES GREATLY REDUCED!!!

HORACE WATERS,

333 Broadway, New York,

AGENT FOR THE SALE OF THE BEST BOSTON & NEW YORK

PIANOS & MELODEONS.

THE LARGEST ASSORTMENT OF MUSIC MERCHANDISE IN THE UNITED STATES. PIANOS from five different Manufactures, *of every variety of style*—from those in plain rosewood cases, for $200, to those of the most elegant finish, for $1000. No House in the Union can come in competition for the *number, variety* and *celebrity* of its instruments, *nor the extremely low prices at which they are sold.* The Boston Pianos referred to above are Chickering's and Gilbert's.

HORACE WATERS' MODERN IMPROVED PIANOS,

with or without iron frames, have, in their NEW SCALE and IMPROVED ACTION, a *power* and *compass* of tone equalling the grand, with the *beauty* and *durability* of the square piano. The Press and first Music Masters have justly pronounced them equal if not *superior* to any other make. *They are guaranteed to stand the action of every climate.*

HORACE WATERS' MELODEONS (tuned, the equal temperament), *superior in each desirable quality*—sole agent for the sale of D. & H. W. Smith's celebrated Melodeons—can also furnish Melodeons of all other makers. Prices from $45 to $125; for two sets of reeds, $150; two banks of keys, $200; Organ pedal bass melodeons, $275 and $300.

MUSIC.—One of the *largest* and *best* Catalogues of Music now published; *sold at greatly reduced prices.* Music sent to wherever ordered, post-paid. Personal attention paid to all orders received by mail. Second-hand Pianos taken in exchange for new. Catalogues sent by mail. Great inducements offered to Agents to sell the above. A liberal discount to Dealers, Teachers, Seminaries and Clergymen.

Each Instrument guaranteed to give satisfaction, or purchase-money refunded. SECOND-HAND PIANOS AT GREAT BARGAINS constantly in store; prices from $30 to $140.

TESTIMONIALS FROM PROFESSORS AND OPINIONS OF THE PRESS.

"The Horace Waters' Pianos are known as among the very best. We are enabled to speak of these instruments with some degree of confidence, from personal knowledge of their excellent tone and durable quality."—*N. Y. Evangelist.*

Says "The Christian Intelligencer:" "Having inspected a large number of the Horace Waters' Pianos, we can speak of their merits, from personal knowledge, as being of the very best quality."

"Nothing at the State Fair displayed greater excellence in any department than the Piano-Forte manufactured by Horace Waters, of this City."—*Churchman.*

The following is taken from the "Christian Inquirer:" "The finest among the many pianos at the Crystal Palace are those placed there by Horace Waters, whose instruments are always popular."

"The treble is clear, pure, powerful, and very melodious, the bass is deep, rolling, and sonorous; the middle part is rich, and sympathetic, and possessing the power of singing, *i. e.* of uniting the sound of each tone, in a degree but rarely achieved."—*Henry C. Watson.*

"For power of tone, depth of bass, and brilliancy of treble, together with accuracy of touch, they are equal to any make I am acquainted with, and I cordially recommend them to those wishing to purchase."—*V. C. Taylor.*

"Our friends will find at Mr. Waters' Store the very best assortment of Music and of Pianos to be found in the United States, and we urge our southern and western friends to give him a call whenever they go to New York."—*Graham's Magazine.*

"We consider them worthy of special attention, from the resonant and exceedingly musical tone which Mr. Waters has succeeded in attaining."—*N. Y. Musical World and Times.*

"Waters' Pianos and Melodeons challenge comparison with the finest made anywhere in the country."—*Home Journal.*

Speaking of the Horace Waters' Pianos and Melodeons at the Crystal Palace the "New York Dispatch" says: "A number of these Pianos and pedal bass organ Melodeons, from their great power, and fullness and richness of tone, attract the very general attention and commendation of visitors. Waters' "New Scale" is recognized by artists as not only a *sensible* but *important* improvement in pianos."

The "New York Express" says: "The Horace Waters' Pianos are pronounced by musical amateurs as a decidedly superior article in *all* the requisites of this instrument, and it is fast superseding those of other manufacturers."

Says the "Evening Mirror:" They (the Horace Waters' Pianos) are very superior instruments, and the Maker may confidently challenge comparison with any other manufacturer in the country, as regards their outward elegance and quality of tone and power."

The "New York-Evening Post" says: "The Horace Waters' Pianos are *excellent* as well as *cheap;* but he has those of other makers, as well as second-hand ones, capitally adapted to limited means."

Says the "Knoxville (Tenn.) Standard:" "Mr. Waters has *long experience* in the business, and has gained a *reputation unsurpassed* for selling the best instruments in the country."

"The Sunny South" reaches us with the following: "This gentleman is one of the most extensive music-dealers in the Union. His Pianos and Melodeons have obtained great celebrity for their *excellent tone and durable quality.*"

Says "The Valley City Advocate:" "We have taken a look at a Piano which has just arrived from the celebrated Establishment of Horace Waters, and must say that for tone and beauty of finish, it surpasses any we ever saw for the price."

"Horace Waters' Piano-Fortes are of full, rich, and even tone, and powerful."—*New York Musical Review.*

KEROSENE OILS,

DISTILLED FROM COAL.

SECURED BY LETTERS PATENT.

KEROSENE LUBRICATING OILS,

Prepared to suit the finest and all other kinds of Machinery; burns brilliantly in Locomotive Head Lights, Car Lamps, and all the ordinary Solar and Hand Lamps, and stands as great a degree of cold as the best Sperm Oil.

This Oil does not gum, and possesses the property of dissolving the gum occasioned by the use of impure Oils.

KEROSENE BINNACLE OIL,

Prepared expressly for Ships' use, and will be found admirably adapted for use on Steamships, Men-of-War, Merchant Vessels, Lake and River Craft, and burns in all the Cabin, State Room, Binnacle, Forecastle Lamps, Signal Lanterns, &c.

Binnacle Oil will remain fluid as long as best Sperm, and will burn all night without requiring to be trimmed—an advantage that will be obvious to every Shipmaster.

KEROSENE ILLUMINATING OIL,

NOT EXPLOSIVE.

This Oil, being a pure distillation from Coal, without the admixture of alcohol or spirits of turpentine, is entirely inexplosive. By the statement of E. N. Kent, chemist, it will be seen that Kerosene is not explosive, even when heated to 212 deg. F., and, being less volatile than camphene, is not liable to smoke, and is well adapted for lighting Mills, Factories, and for general Family use.

INSURANCE COMPANIES allow it to be used without additional charge.

THE attention of the Trade is invited to our varied and extensive Stock of new and desirable Goods; our facilities being such, that in BEAUTY OF STYLE, EXCELLENCE OF QUALITY and CHEAPNESS, we are enabled to offer inducements unequalled by any other Manufacturers.

Our goods being all manufactured under the immediate supervision of the Firm, and our facilities being such that we are enabled to obtain all our materials direct from the original Manufacturers in different parts of the world, we can guarantee their QUALITY to be UNEXCELLED, and the STYLE in which they are put up we are confident in pronouncing UNEQUALLED.

In addition to the unprecedented popularity of our Goods with the Trade, we have received the most flattering encomiums from the Press throughout the country. We have space, however, for the following specimens only.

The *Boston Chronicle* says:—

"We take pleasure in calling the attention of dealers in Perfumery and Toilet Articles to the advertisement of HEATH, WYNCOOP & Co., of New York, extensive manufacturers, whose reputation for producing the very best articles of every kind stands unrivalled in the country. No dealer should neglect to give them a call."

The New York *Evangelist*, in concluding an editorial on our Perfumery, says:—"In addition to the excellence of their Perfumery, the beautiful manner in which it is put up, we are convinced, cannot be excelled."

The *Merchants' and Manufacturers' Journal* says:—

"Messrs. HEATH, WYNKOOP & Co., of No. 63 Liberty st., New York, famous as proprietors of the celebrated "Lyon's Kathairon," have gone very largely, also, into the manufacture of Perfumery of all kinds. For beauty, excellence and cheapness, we are confident their goods cannot be excelled, if we are to believe the reputation they have amongst the Trade."

We shall be happy to mail our Catalogue to the Trade upon request.

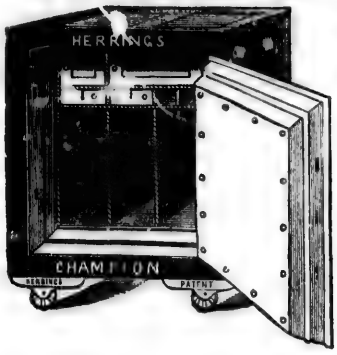
HERRING'S

Patent Champion

FIRE AND BURGLAR PROOF SAFES.



THE great interest manifested by the Public to procure more perfect security from Fire for valuable papers, such as Bonds, Mortgages, Deeds, Notes, and Books of Account, than the ordinary SAFES heretofore in use had afforded, induced the Subscribers to devote a large portion of their time and attention, during the past FOURTEEN YEARS, in MAKING IMPROVEMENTS and DISCOVERIES for this OBJECT; and they now beg leave to assure their numerous Friends and the Public generally, that their efforts have been crowned with complete success, and now offer their

IMPROVED HERRING'S PATENT

WORLD'S FAIR PREMIUM FIRE-PROOF SAFE,

AS THE

CHAMPION SAFE OF THE WORLD,

HAVING BEEN AWARDED MEDALS AT BOTH THE

World's Fair, London, 1851, & in New York, 1853,

AS SUPERIOR TO ALL OTHERS.

It is now undoubtedly entitled to that appellation; and, secured with **HALL'S PATENT POWDER-PROOF LOCKS** (which was also awarded MEDALS as above), forms the most perfect

FIRE & BURGLAR PROOF SAFE EVER OFFERED TO THE PUBLIC.

THE SUBSCRIBERS ALSO MANUFACTURE ALL KINDS OF

STEARNS & MARVIN'S

WILDER'S PATENT

SALAMANDER SAFES.

THIS thoroughly fire-proof article of OUR MANUFACTURE, has been in use throughout the country for fifteen years, and has been severely tested in TWO HUNDRED AND TWENTY-EIGHT ACCIDENTAL FIRES, and has invariably maintained its fire-proof qualities. Numerous Certificates from all parts of the United States can be seen at the Depot; also, TESTED SAFES, with the books and papers, which have passed through the hottest fires. They are now secured by the

CELEBRATED PATENT "LA BELLE LOCK,"

Which is both thief and powder-proof, with a small key, which can be carried in the vest pocket.

They are finished in a superior manner, with or without inside iron vaults, and are fitted with the interior arrangements, as may be desired by the Purchaser.

Our Plate Chests are specially adapted for Private Families, Public Houses, Churches, Lodges and Societies, to preserve Plate, Jewellery and other valuables from Burglars.

We invite the attention of all Merchants, Bankers, Professional Men, Hotel Proprietors, Public Officers, Manufacturers, and others in need of the above, to our extensive stock of Safes.

ROBINSON & ROPER'S

PATENT

"Hand Stitch" Sewing Machine,

For Tailors' & Family Use,

The only Machine that sets a "REAL LIFE-LIKE" hand-stitch, perfectly simple and every way reliable.

This Machine ACTUALLY SEWS; uses but a SINGLE thread, THEADS its own needles, and takes every variety of THROUGH stich WITHOUT LOOP OR CHAIN. It will HEM OVER-HAND, FULL, HALF & QUARTER BACK-STITCH, SIDE-STITCH, RUN AND GATHER, and is the only Machine that can be practically used for the various kinks of FAMILY SEWING. The stitches are formed the SAME as in HAND sewing, and except in the Perfection of their accuracy and regularity cannot be distinguished from Hand work. The work is performed with at least SIX times the RAPIDITY, while being of vastly superior QUALITY to the best hand sewing.

IMPROVED

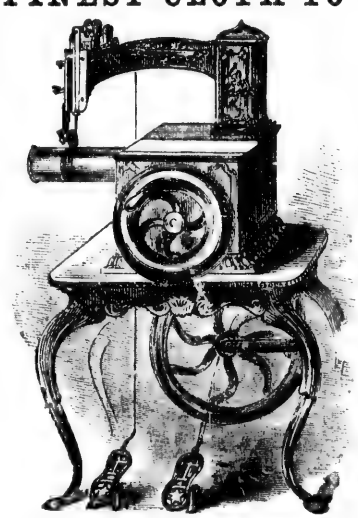
SEWING MACHINES;

FOR

STITCHING AND CLOSING,

FROM

FINEST CLOTH TO HEAVIEST HARNESS WORK,



Either with or without

WAXED THREAD,

RUNNING AT ONE THOUSAND STITCHES A MINUTE!

No other Machines have ever been offered to the Public that combine so many advantages, or can equal them for beauty and strength of stitch, certainty of operation, durability, convenience and power of execution. Their construction is simple and execution rapid.

Being adapted for sewing all kinds of **CLOTH** or **LEATHER,** they are invaluable aids to **Boot, Shoe,** and **Ladies' Gaiter Boot Manufacturers; Tailors, Saddle, Harness,** and **Carriage Makers; Cloak, Bonnet, and Mattress Manufacturers,** and all others whose work is done with the needle.

They make a strong seam with a fair stitch on both sides, impossible to rip, as it cannot be unravelled. They use less than one-half the amount of thread which is used by Ravel Stitch Machines, thus making a saving of one to three dollars a week when silk is used. **Also, they save much by using Cotton and Linen Thread as well as Silk.** For Custom Made Clothing our Machines combine advantages which cannot be found in any other.

On enamelled leather they sew regularly, without applying any oily substance to the enamelled surface.

These are the only Machines ever manufactured which make a fair stitch on both sides with a waxed thread. The thread is waxed by the Machine while in operation.

As many Sewing Machines heretofore sold have been so liable to get out of order, and important parts become useless from want of sufficient strength, we have been particularly careful to give great strength and efficiency to all parts of our Machines. **Every Machine is carefully Inspected and Warranted before it is sold.**

Corn Starch	**Starch, Ground**	**Corn Flour**	**Maizena**
For Laundry Purposes.	For Manufacturers.	For Confectionery.	For Culinary Purposes.

THE Subscribers are furnishing the Trade with the above named articles, manufactured from the best selected Indian Corn; warranted equal, if not superior, to any similar articles made in the world—an opinion fully sustained by all who have examined or used them.

Their Factory is located at Glen Cove, L. I., at easy distance from the Metropolis, and is possessed of advantages which do not attach to any other establishment of the kind. The water employed is drawn from boiling springs, and is remarkably pure and wholesome. No water could be better fitted for the production of an extraordinary quality of Starch, and substances destined to be used largely for food.

The apparatus has been got up and arranged with a perfect knowledge of the most successful contemporaneous concerns; and embrace many new inventions, the use of which we have secured to ourselves exclusively, which greatly facilitates the production of articles of a superior and invariably uniform quality—a desideratum of the utmost importance both to the Trade and Consumer.

The Starch and other preparations from Indian Corn offered by the Subscribers are all manufactured under their immediate supervision, and are warranted of the best possible quality. The purchase money will be refunded and all expenses made good in any case of discrepancy between the real and alleged merits of their articles.

The Trade in general are respectfully invited to call at the Depot and examine for themselves, before purchasing elsewhere.

All orders addressed to WILLIAM DURYEA, Agent, 201 Fulton Street, New York City, or to the Glen Cove Starch Manufacturing Co., Glen Cove, L. I., will receive prompt attention.

CARPENTER'S SPELLERS ASSISTANT, 18mo., half-bound or full linen.
FENNING'S UNIVERSAL SPELLING BOOK, 12mo., " "
READING MADE EASY, large 24mo., half-bound. Illustrated with numerous wood-cuts.

This edition of the "READING MADE EASY," presents the following great advantages to beginners: It commences with the simple elements of learning and proceeds from the letters through a regular, well-arranged, and comprehensive course of *Spelling Lessons;* so that any one conversant with them, will be found prepared to begin and make rapid progress in any of the improved Spelling Books and Dictionaries in the language. The same easy and systematic arrangement has been followed with regard to the *Reading Lessons;* and such pieces only have been selected as were thought would most attract the attention, and best improve the minds of the young. It is hoped, when its price is considered, and the easy and useful selection it contains, fairly examined, that it will be allowed to be the cheapest and best Reading Made Easy now in use.

OSWEGO, N. Y.—A City and Port of Entry situated on both sides of the river of the same name, at its entrance into Lake Ontario. The harbor (one of the best on the Lake) is formed by a pier built by the U. S. government, 1219 feet long, with an entrance 250 feet wide. There are owned at this place several steamboats and schooners, with an aggregate tonnage of more than 20,000; besides canal boats with nearly the same amount of tonnage. A considerable portion of the trade between New York and the West passes through Oswego and the Welland canal around the Falls of Niagara. The canal here, called after the name of the City, besides affording the means of transportation that has so greatly contributed to the prosperity of the place, furnishes a very large amount of manufacturing power that has been made available to a considerable extent. The City is regularly and handsomely laid out with streets 100 feet wide, which intersect each other at right angles. Daily lines of steamboats ply between this and other ports on both sides of Lake Ontario. Distant from Albany 183 miles, from Rochester 80 miles, and from Kingston 80 miles. Population about 18,000.

Webster's Series of Dictionaries.
Porter's Chemistry.
Day's Rhetoric.
Cartee's Physical Geography.
Wright's Analytical Orthography.

The above list, except some slight variations, has been recommended by the Principals of all the Academies, nearly all the Superintendents of Schools in St. Lawrence, Franklin, Clinton, Essex, Jefferson and Lewis Counties, and officially recommended by four Boards of Supervisors.

This list of Text Books was first adopted by regular organization in St. Lawrence county, and since adopted by the five counties above mentioned, and are now in general use.

The same uniformity has been recommended by the President of the University, Secretary of the Board of Education, and many of the Superintendents of Schools in the State of Vermont.

The popularity of rapid sale of the leading books in this list is unprecedented in the history of School Books, and is still on the increase.

The progressive Series of Readers, though published but a short time, have been adopted by the Boards of Education in several of the large cities in the State of New York, and are rapidly going into use in New England.

The National Series of Geographies, recently published, are in use in the New York State Normal School, New York City Normal School, New Jersey State Normal School, Kentucky State Normal School, Ohio State Normal School, Michigan State Normal School, Brooklyn Polytechnic and Collegiate Institute, Washington Co. College Institute, Leroy Seminary, Cooperstown Seminary, Binghampton Academy, Claverack Academy, Cortland Academy, Bloomfield Academy, Clarence Academy, Ellington Academy, Fort Plain Seminary, Fredonia Academy, Friendship Academy, Genesee Academy, Genesee and Wyoming Seminary, Genesee Wesleyan Seminary, Hartwich Academy, Jamestown Academy, Jordon Academy, Macedon Academy, Medina Academy, Middleburgh Academy, Minda Academy, Ogdensburgh Academy, Oxford Academy, Plattsburg Academy, Rogersville Union Seminary, St. Lawrence Academy, Gouverneur Academy, Utica Female Academy, Wilson Collegiate Institute, Windsor Academy, Susquehanna Seminary, Franklin Academy, Canton Academy, &c., in the Union Schools of Newark, Lockport, Fredonia, Genesee, Mount Morris, Little Falls, Corning, Bath, Painted Post, &c., &c. Also in the Public Schools of New York, Brooklyn, Lockport, Binghampton, Palmyra, and in very many of the other public and private Schools throughout the State.

The Public Schools of the following large cities have adopted MONTEITH and McNALLY'S NATIONAL SERIES OF GEOGRAPHY, in whole or part, viz.: New York, Philadelphia, Brooklyn, Marblehead, Newark, Cleveland, Columbus, Hartford, New Haven, Springfield, Pittsburg, Lancaster, Chicago, and smaller towns too numerous to mention.

DAVIES' ARITHMETIC AND MATHEMATICS, have been officially adopted, and are used in a very large proportion of the Academies and Colleges in the State of New York, New England, the Western and Southern States.

The following States, (through their Superintendents of Public Instruction,) have given their official Sanction to the Mathematics, Geographies, and some other Books in the list: Michigan, Wisconsin, Illinois, Indiana, Ohio, Missouri, North Carolina and Alabama. Also, Minnesota Territory.

*** School Committees and Teachers will be supplied with single copies of these Books for examination, with a view to their introduction. Also, a first supply to Classes for introduction, on the most liberal terms, on application to the Subscriber.

PHILADELPHIA.—The Capital of the State of Pennsylvania, founded by William Penn in 1682, and next to New York is the largest City in the Union. Many of its principal edifices are raised on basements and entered by flights of steps of white marble, and the city generally has a very handsome appearance. Among the educational and literary establishments are the University, occupying two handsome edifices, comprising three departments,—the academical, collegiate, and medical,—the last the oldest and largest in the Union, Jefferson Medical College, Pennsylvania Medical College, and Gerard College for Orphans, named after its founder, who left funds so ample that he directed half a million sterling, or more if necessary, to be expended on the buildings alone, but coupled the bequest with the very singular restriction, that no ecclesiastic, missionary, or minister, should hold any appointment in the college, or be admitted for any purpose within its premises. One of the most fortunate events in the history of Philadelphia was the selection of it for a residence by the celebrated Dr. Franklin, to whom it is indebted for many of its most important improvements. In 1787 the Convention which arranged the Constitution of the United States met in it; in 1790 the first Congress, by selecting it for their place of meeting, eventually made it the capital of the Union, which it continued to be considered till 1800, when it was supplanted by Washington; from which city it is distant 125 miles, from New York 87 miles, from Montreal 473 miles, and from Toronto 485 miles. Population in 1852, 409,354.

PORTLAND, MAINE.—A very thriving City and the Metropolis of the State, situated on a peninsula at the western extremity of Casco Bay. It has one of the finest harbors on the whole sea-coast of the Union, seldom or never closed by ice, and certain of becoming the seaport of a very extensive commerce. It has a large foreign and coasting trade, and many vessels engaged in the cod and mackerel fisheries. The superiority of the harbor has induced a decision on the part of the proprietors of the Great Eastern steamer to despatch her to this port on her first voyage, there being indeed but very few other ports in America that can receive a vessel of her dimensions and draught. The enterprise of the citizens induced the commencement, in 1844, of the Atlantic and St. Lawrence Railway, with a view of promoting commercial reciprocity with this Province, and which is now incorporated with the Grand Trunk Railway of Canada. The steamers of the Canadian Ocean Steamship Company arrive and depart here fortnightly during winter. Rapid as has hitherto been the growth of Portland, this important undertaking will yet further accelerate its destiny as an important commercial city. It is handsomely built, and its views, landward and seaward, are really beautiful. It has access by regular steamers with Nova Scotia, several ports in New Brunswick, and with Boston and New York; as also it has many railway connections. Distant from Boston 105 miles, from New York 336 miles, from Montreal 292 miles, from Quebec 317, and from Stratford, C. W. (by Grand Trunk Railway throughout) 714 miles Population about 26,000.

PROVIDENCE, R. I.—A City and Port of Entry situated on both sides of Providence River, and is, in wealth and population, the second city in New England. Its literary and scientific institutions are very creditable; and the public spirit of the citizens is still further evidenced by the erection of an arcade, which, although not strictly a public building, is deserving of mention as one of the finest of its kind in the United States. It extends from Westminster to Weybosset street, 225 feet, is three stories high, has 82 shops or warehouses, in which is chiefly displayed a great variety of dry goods and similar articles. It is built of massive dressed granite, with two imposing Doric porticoes, one fronting on either street. The manufactures are of various kinds, and very extensive, averaging annually about $6,000,000 in value, and more than $100,000 is paid annually as wages in manufacturing jewellery alone. This interesting and substantial city was first settled in 1636 by Roger Williams, who was banished from Massachusetts on account of his religious opinions, and who adopted in his new establishment the principle of universal toleration. Distant from Boston 42 miles, from New York 173 miles, and from Montreal 376 miles.

THREE GREAT AND SURE CURES.

RHODES' FEVER AND AGUE CURE,

OR, ANTIDOTE TO MALARIA,

THE ANTI-BILIOUS PURGATIVE PILLS,

AN AUXILIARY TO RHODES' FEVER AND AGUE CURE.

Dewitt's Pain Reliever,

FOR EXTERNAL AND INTERNAL USE.

RHODES' FEVER AND AGUE CURE,

FOR the Prevention and Cure of INTERMITTENT and REMITTENT FEVERS, FEVER and AGUE, CHILLS and FEVER, DUMB AGUE, GENERAL DEBILITY, NIGHT SWEATS, and all other forms of disease which have a common origin in *Malaria* or *Miasma*. This subtle atmospheric poison, which at certain seasons is unavoidably inhaled at every breath, is the same in character wherever it exists,—North, South, East or West,—and will everywhere yield to this newly discovered antidote, which is claimed to be the *greatest discovery in medicine ever made*.

This specific is so harmless that it may be taken by persons of every age, sex or condition, and it will not substitute for one disease others still worse, as is too often the result in the treatment by Quinine, Mercury, Arsenic, and other poisonous or deleterious drugs, not a particle of any of which is admitted into this preparation.

The proprietor distinctly claims these extraordinary results from the use of this NATURAL ANTIDOTE TO MALARIA.

It will entirely protect any resident or traveller, even in the most sickly or swampy localities, from any Ague or Bilious disease whatever, or any injury from constantly inhaling Malaria or Miasma.

It will instantly check the Ague in persons who have suffered for any length of time, from one day to twenty years, so that they need never have *another chill*, by continuing its use according to directions.

It will immediately relieve all the distressing results of Bilious or Ague diseases, such as general debility, night sweats, &c. The patient at once begins to recover appetite and strength, and continues until a permanent and radical cure is effected.

Finally, its use will banish Fever and Ague from families and all classes. Farmers and all laboring men, by adopting it as a preventive, will be free from Ague or Bilious attacks in that season of the year which, while it is the most sickly, is the most valuable one to them.

One or two bottles will answer for ordinary cases; some may require more. Directions printed in German, French and Spanish, accompany each bottle. Price One Dollar. Liberal discounts made to the Trade. Trade Circulars forwarded on application, and the article will be consigned on liberal terms to responsible parties in every section of the country.

Prepared and sold by the Agent,

W. B. CHAPIN.

THE ANTI-BILIOUS PURGATIVE PILLS,

AN AUXILIARY TO RHODES' FEVER AND AGUE CURE.

Although these Pills are expressly made for use with "RHODES' CURE," still experience has proved that in all cases where the biliary organs are diseased, or a physic required, they are unequalled as a remedy, and as they have been in constant use by a physician and chemist in his practice, during the last twenty years, which practice has extended over the *States*, *Central America* and California, the proprietor feels perfect confidence in offering them to the public as an unequalled and unrivalled *family medicine*.

DEWITT'S PAIN RELIEVER,

FOR EXTERNAL AND INTERNAL USE.

The best and most reliable remedy ever offered to the public for the cure of Coughs, Colds, Cuts, Burns, Bruises, Sprains, Swellings, Chillblains, Toothache, Cholera. Cholera Morbus, Pains in the Chest, Back and Sides, Indigestion, Rheumatism, Colics, and all external and internal Pains.

This Medicine is prepared from articles purely Vegetable, and one trial will establish its valuable qualities for the cure of any of the above ailments. It justly has the supremacy over all others because,

1st. It is stronger, quicker in its action, and more certain in its *cure* than any known remedy.

2d. Its composition affords a pleasant perfume, and is therefore perfectly agreeable to use on the person.

3d. It is purely vegetable, and therefore cannot harm the most delicate constitution.

4th. It will not stain or injure the most delicate fabric, and the clothes of the patient and the bandages used are therefore free from the unsightly and generally unremovable stains that accompany the use of any other known remedy.

In short it is what it pretends to be, a "Cure for all pain." Numerous certificates might be attached in proof of this assertion, but space will not here allow.—The trial of a single bottle will convince the most skeptical.

It is put up at a small price, so as to be within the reach of all.

Price 25 cents per Bottle.

For sale by all Agents for Rhodes' Fever and Ague Cure, and by respectable dealers generally.

MANUFACTURERS AND PROPRIETORS OF PERRY DAVIS'

VEGETABLE PAIN KILLER.

Manufactory, 74 High Street, Providence, R. I.

PERRY DAVIS. EDMUND DAVIS.

DAVIS' PAIN KILLER.

From the reports of dealers in this city, we think no proprietary medicine has had a more rapid sale. Its valuable properties, as a speedy cure for pain, cannot fail to be generally appreciated, and no family should be without it, in case of accident, or sudden attack of dysentery, diarrhœa, cholera morbus; and even Asiatic cholera yields to its magic power, as we see by reports from those sections in the south-west where the disease has been particularly virulent the past summer.—*Montreal Transcript.*

Messrs. Perry Davis & Son,

Permit me to acknowledge the benefit of your valuable medicine, the Pain Killer. I have been afflicted for two years and a half with a severe pain in the stomach and breast, and never found any relief until I tried Davis' Pain Killer, to which I cheerfully attribute my restoration to good general health. I consider it the best family medicine in use, for restoring and building up a debilitated system to its natural vivacity and vigor of life.

L. DSE. TOUCHET, Montreal, L. C.

PERRY DAVIS'S VEGETABLE PAIN KILLER.

Somstly celebrated for the cure of so many of the afflictions incident to the human family, has now been before the public about TWELVE YEARS, and has found its way into almost every corner of the world; and wherever it has been used the same opinion is expressed of its real medicinal properties.

Its almost instantaneous effect in RELIEVING PAIN is truly wonderful.

It is used as an internal and external remedy, and when used according to directions is true to its name, a

PAIN KILLER.

It is almost infallible in the cure of **Sudden Colds, Coughs, Fever and Ague, Asthma' Pain in the Head and Back, Rheumatic Complaints, Bruises, Sore s, Severe Burns, Canker in the Mouth, &c., &c.**

It is in truth a FAMILY MEDICINE, and should be kept in every family for immediate use. Oftentimes long priods of suffering are saved by the timely application of this *Friend to the Afflicted*, the **Pain Killer.**

It has been used in severe cases of the **CHOLERA,** and never has failed in a single case wkere it was *toroughly applied on the first appearance of the symptoms.* In any attack where prompt action upon the system i required, the **PAIN KILLER** is invaluable. Get a copy of the **People's Pamphlet,** which an be obtained from any of our Agents, and read the facts stated, every one of which can be certified to by ddressing the parties.

The **PAIN KILLER** is sold by all respectable Druggists throughout the United States and British rovinces in America, also by Agents in Foreign Countries, whose names are to be found on the People's Pamphlet.

☞The **Pain Killer** is put up in 1 oz., 2 oz., 6 oz., and 15 oz. Bottles.

ROCHESTER, N. Y.—A City and Port of Entry, situated on Genesee River, 8 miles from its entrance into Lake Ontario. It is noted for its important literary and other institutions, and for its extensive manufactures, mainly promoted by the great water power here afforded by the Genesee River. Within the City limits there are three successive perpendicular falls of 96, 20, and 105 feet; and through the entire distance from the upper to the lower fall the river flows through a ravine more than 100 feet deep. Rochester, from its contiguity to the Erie Canal and Lake Ontario, and from its extensive railway connections, enjoys great facilities for transportation of its imports and exports. In 1812 there were only two wooden frame buildings on the spot, each consisting of a single room and when, a few years before, a proposal was made in the State Legislature to build here a bridge across the Genesee, it was strongly opposed, and a member declared that it was "a God-forsaken place, inhabited by muskrats, and visited only by straggling trappers.' Distant from Albany 229 miles, from Buffalo 68 miles, from Toronto 110 miles, and from Montreal (via Kingston) 280 miles. Population about 43,000.
